DETAIL MATTER

Life Is On | Schneider Electric

Perfection is excellence in the smallest detail.

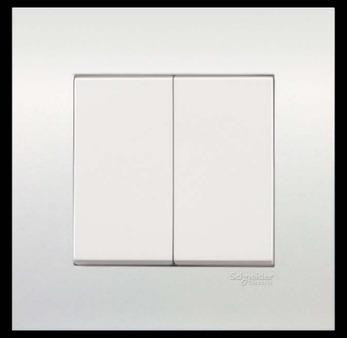
Bring your home to life with ambience.

The right ambience gives a space a sensual experience, from cosy peacefulness to passionate romance. The best way to achieve that is through fine lighting.

Fine lighting is the art of creating inspiration with light that's matched to the occasion. This is implemented by interplaying designer lighting fixtures with light intensities from various artificial and natural light sources.

Care must be taken with lighting fixtures, which extend from the lamp to the switch. Switches are located at eye level. Ugly switches become unavoidable eyesores, while beautiful switches explicitly enhance the overall interior design.

The choice is yours.



ULTI

The Ultimate Switch

The haute couture of lighting control. Exquisite. Exclusive.

LED@mechanical switch

impress™ mechanism

EZinstall WIRELESS TECHNOLOGY

ZigBee® Certified product

This exquisite blend of design and patented innovation is a modern classic statement of style. With its ultra-clean line, sleekly chic square profile and instantly identifiable round dollies, ULTI blends two contrasting geometries to create a modern simplicity of unprecedented freshness. The design also offers the maxinum scope to showcase the synergy of colour, material and finish in a standard-sized wall plate. Another brilliant touch is the LED locator rings that emit a pleasing glow to guide fingers to the switch at night. Offering everything from mechanical switches to sophisticated interoperable systems, ULTI is the haute couture of lighting control.

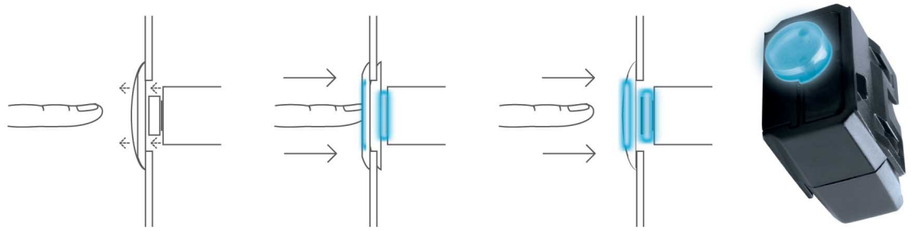
* Metal and mirrored finishes are exclusive to ULTI i.m.press switches and sockets.

i'm'press™ mechanism

iso-motion-press mechanism

ULTI's unique iso-motion-press (i.m.press) mechanism ensures switches stay in a uniform position and can be swiftly and surely operated with a simple motion. With dollies maintaining the same position whether on or off, i.m.press empowers the world's first ever fully flush-faced 250V-rated mechanical switch.



User-friendly interface

The ULTI EZinstall3 mini home control system GUI design is perfectly straightforward. Easy-to-understand icons represent your various devices or you can use your favorite images to symbolize scenes and scheduling. Keep your most frequently used functions on your home page. Resize the icons and personalize your interface.

Multi-mobile compatible

The ULTI GUI is simultaneously compatible with both IOS and Android platforms.

Green comfort living

Lighting and air-conditioning are the biggest consumers of energy in the home. ULTI's EZinstall3 time scheduling helps you to achieve the optimal balance of comfort and energy conservation.

Precise control over the functioning of your home's lighting, air-conditioning, curtains and heating means a living environment tailored to your ideal comfort. Pre-set programs can run automatically, helping you to conserve energy, become more eco-friendly and save money.

Out of home control

Remotely control your home from anywhere in the world, whenever you require it, via your mobile device with ULTI EZinstall3.

Forget to turn off your lights or air-conditioner? You can access your home with ULTI on your mobile device. And if you're out and about, you can select your desired temperature and lighting to greet you when you arrive home.

INTEGRATED SOLUTION

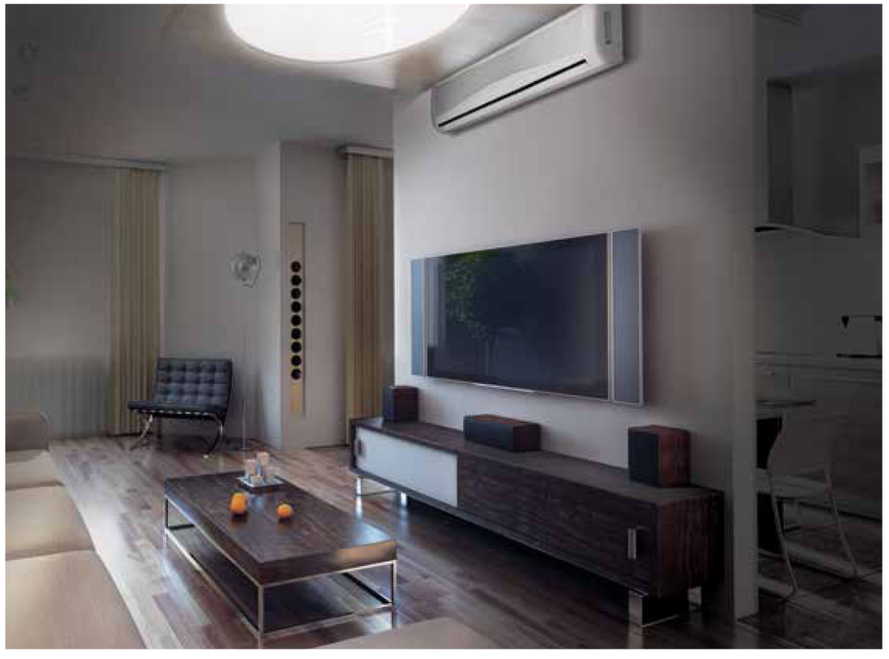
CONTROLS

The new generation ULTI EZinstall3 is much more than a wireless, lighting control system. Advanced technology has transformed it into a mini home control system when combined with the revolutionary ULTI IP gateway and IR converter.

ULTI IP gateway – your home's nerve centre

The ULTI IP gateway adds a whole new level of functionality and connectivity to ULTI EZinstall3.

Just connect your ULTI IP gateway with ULTI EZinstall3 devices to be able to run your home the smart way. The user interface is easy to understand and ensures effortless home control on a daily basis.



Remote TV and air-conditioning control

By adding a compact and inconspicuous IR converter, the ULTI EZinstall3 controls your TV. Use your mobile device to select your favorite channel, and access the volume and on/off controls.

ULTI EZinstall3 can also control your air-conditioning to keep you in your comfort zone and save energy when you're not at home.

Automatic dimmable light detection

With a single touch, ULTI can recall pre-programmed light combinations. Choose the perfect ambience for an evening of family fun, elegant entertainment or a romantic dinner.

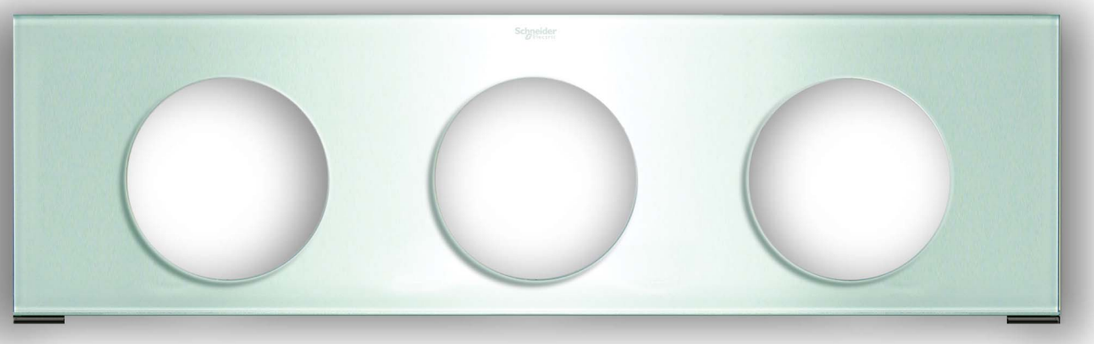
However, the light bulb industry is fast evolving. Although LED and CFL lamps are currently at the forefront of lighting trends, these lights create problems with traditional dimming devices.

ULTI's EZinstall3 dimtect technology automatically detects the type of bulb used and provides dimming when possible. Dimtect also provides on/off functionality for non-dimmable lamps.

A fully integrated home control system.

dimtect™
LAMP DETECT n MATCH

Total entertainment



USB2.0 port
With a high-speed 480Mbps-rated connection, this port enables mega-pixel digital photos to be shared in their full glory via in-room TVs without lag or delay.

Multi-Card reader
Compatible with WinME, Win2k WinXP, Vista, Linux and Apple MacOS, this 4-port mini-USB card reader empowers guests with simultaneous access to, and sharing of, data between SD/ MicroSD, MS, CF and XD memory cards.

RCA and S video socket
Compatible with all devices, this handy 4-socket enables guests to enjoy personal music and videos.

Starring Horizontal Dolly and LED – the forward switch for forward people.

LED@mechanical switch

Based on art deco and tech-chic, NEO is a breakthrough in switch design. It demonstrates horizontal thinking, with unconventional horizontal dollies and layered details, and is the first mechanical switch to use LED locators and indicators. This is the forward thinking switch for forward people.

White LED

Blue LED

Perfectly complemented by outstanding performance, reliability, lifespan and energy saving characteristics, NEO's subtle glow is the ultimate example of practicality and style in perfect harmony.

The use of fluorescent white-on-white locaters was yet another NEO exclusive. Unobtrusive by day, each indicator shines out with a soft luminescence when it gets dark.

ZENcelo
be in-standing

The first FULL-FLAT switch. An in-standing touch.

Inspired by the fully-flat design trend that has transformed everything from airplane seats and TVs to mobile phones and electric stoves, ZENcelo mechanical switches are ideal for interior design concepts that call for switches to be as unobtrusive as possible. Thanks to the patented “impress” (iso-motion-press) mechanism, mechanical switches can now achieve the same full-flat form factor as electronic switches in a slim profile. Instead of signalling the on/off status by the rocker position, the “Ondicator” is a clever device that reveals the operating status of a full-flat switch without increasing its cost or carbon footprint.

I'm'press™ mechanism

Ondicator

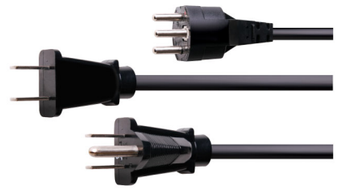
if product design award 2008

ZENcelo MAP (Media And Power) Panel

The MAP (Media And Power) Panel enables multimedia playback of guests' films and songs via in-room audio and video links. The standard RCA input is accompanied by HDMI, USB, Audio and Computer-to-TV input sockets. The MAP panel is available in the award winning **ZENcelo** design.

MAP-i

The **ZENcelo** MAP-i automatically detects which digital device is connected. The battery of the connected device can also be charged through the USB port of MAP-i too.



There are many universal sockets and adaptors in the world and hoteliers can choose a run-of-the-mill product, or they can choose our unique **TruGlobal** socket.

Compared to common universal sockets, the **TruGlobal** socket is superior for its total plug compatibility, proven safety and excellent quality. It's the pioneering global socket innovation that accepts more plug types than any in history. The **TruGlobal** solution is designed to be compatible with, and to meet the safety specifications of, Type A, B, C, E, F, G, H, I, J and L plugs – even the unique Israeli plug is covered.

Guests will appreciate hotels with **TruGlobal** sockets because they eliminate the hassle of travel adaptors. You also save the trouble of constantly responding to guest requests for travel adaptors, and the cost of replacing travel adaptors not returned.

Truly innovative, truly high quality, truly safe, and truly compatible with more plugs than any other, the **TruGlobal** socket is the truly smart choice.

ENABLED BY A NEW PHYSICS

Switch designs are limited by many factors, primarily the switch mechanism. The patented “impress” (iso-motion-press) mechanism ensures the switch dolly remains stationary when it is “on” or “off”, and at the same time occupying a much smaller footprint. Freedom in design has become a reality.

Enabled by impress.mechanism, ZENcelo makes the future flatter than you ever imagined.

impress™ mechanism

ZENcelo be in-standing

THE REVOLU TIONARY FULL-FLAT SWITCH

The Full-Flat form factor has redefined many facets in life. Aeroplane seats. TVs. Mobile phones. Electric stoves... And now switches.

Aesthetically pleasing flat switches are in fact available. But only exclusive to luxurious electronic switches and lighting automation systems. The ZENcelo Full-Flat switch has been created for the majority who use electro-mechanical switches. Even on switches you never imagined can be Full-Flat...

With ZENcelo, luxury is no longer defined by price. But by wisdom - and style.

ZENcelo be in-standing

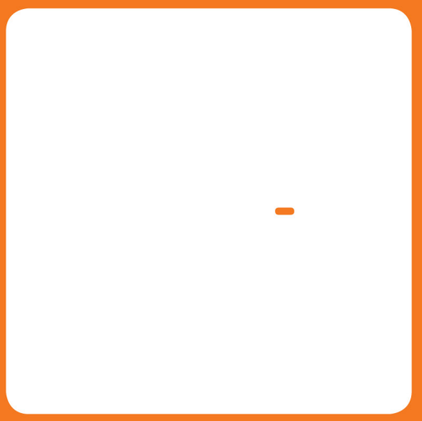
iF product design award 2008

INDICATE THE CURRENT STATUS

Form does not sacrifice function. Knowing when the Full-Flat switch is turned on is not taken for granted.

The patent-pending “Ondicator” changes to marigold when turned “on”. And blends into the same colour as the dolly when “off”.

Meticulously designed to the finest detail – Not only for looks, but also for practicality.

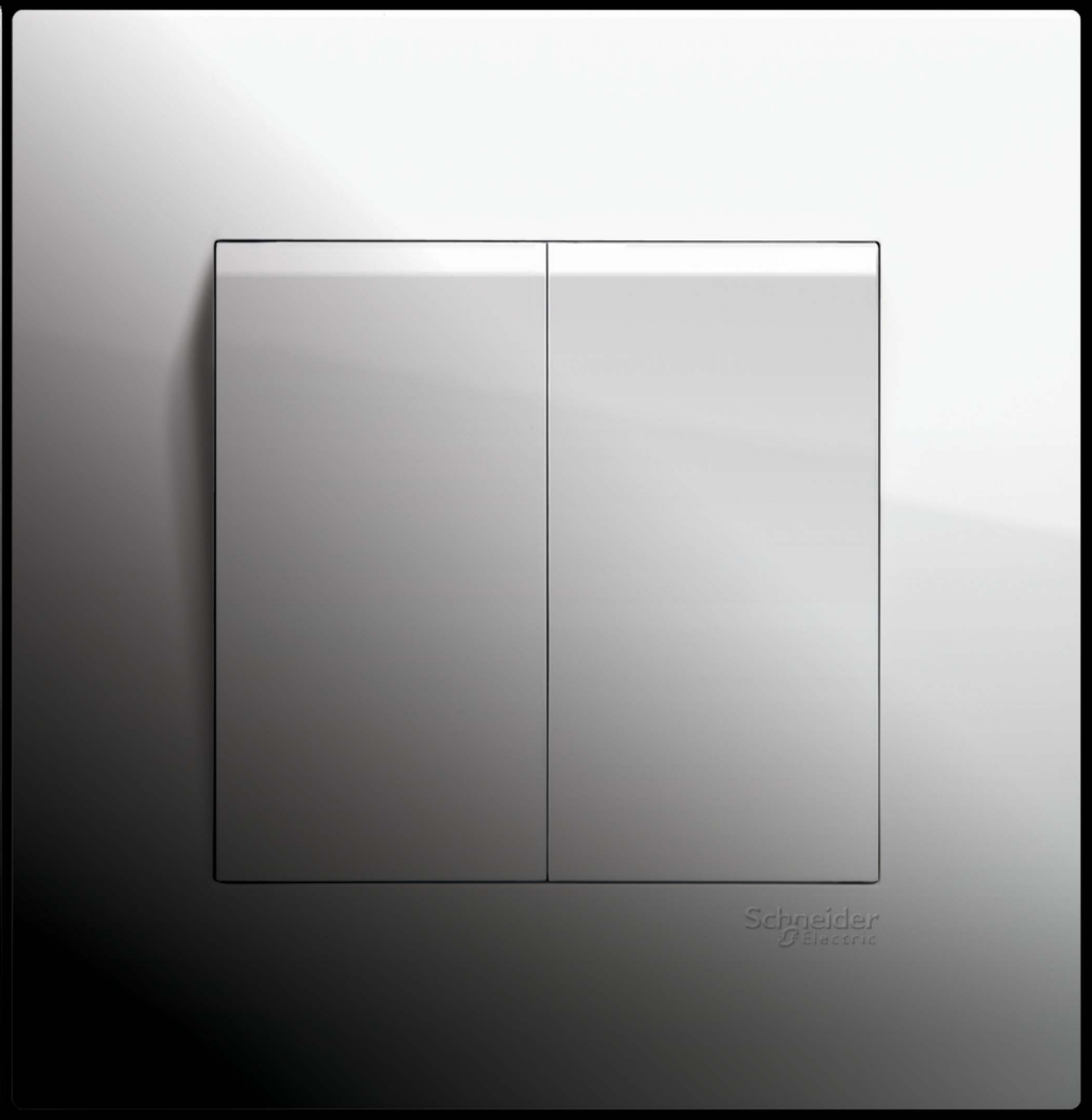


ZENcelo be in-standing

Style and Function

Vivace

Simplicity and beauty for everyone. A Bauhaus expression.



Inspired by the influential Bauhaus movement, Vivace expresses a pleasing form following function. With a slim and trim profile, the sleek clean lines and subtle curves manifest a simple, elegant minimalism. Every piece in this robustly constructed range sits perfectly within the context of any modern interior design. Vivace, a style of modern simplicity that is always within your reach.

impress mechanism

The patented iso-motion-press mechanism ensures the dolly travels just 1.8 mm when pressed. Operated with a simple motion, the dolly maintains the same position whether on or off. The switch occupies a much smaller footprint and features a remarkably slim profile.

PerfectFace
SWITCH ARCHITECTURE

Patented design with dollies and surround integrated into one piece, removing one installation step while keeping consistent distance between dollies and surround. The gap between the switch and uneven wall after installation can be perfectly covered by the PerfectFace faceplate. Aesthetic integrity as well as installation quality and efficiency are thus improved.

MECHANISM

"Slim Rocker" in 3 degree narrow angle dolly design (6 degree angle for normal rocker) makes possible an overall slim profile even with a jumbo dolly. "Sure Click" offers a flutter-free switching for improved durability and reliability.

Ondicator

The patent-pending "Ondicator" is a clever mechanical device which changes to marigold when the switch is turned on, and blends into the dolly colour when off. It's so easy to tell when a full-flat switch is on or off.

LED@mechanical switch

Schneider Electric was the first in the market to successfully deploy LED in a mechanical switch in an enticing soft white or blue. The beauty of this advanced mechanical switch complements its outstanding performance on reliability, lifespan and energy saving.

EZinstall
WIRELESS TECHNOLOGY

Enabling 2-wire retrofit upgrade of traditional switches, our patented EZinstall technology delivers ultimate one-touch remote light control and scene control without the hassle of rewiring.
