APC SurgeArrest P6WU2 How-to-Sell

Why do you need a surge protector?

Power is inconsistent. No power company or government can guarantee an uninterrupted flow of power to homes and businesses. This is because of the damaging and unpredictable nature of power.

Power disturbances such as surges and spikes can cause premature failure of computers, peripherals and other expensive electronics.

What protection does the SurgeArrest P6WU2 provide?

Power disturbances such as surges, lightning, and power grid fluctuations can have a devastating impact on the valuable electronics you rely on every day. However, with the APC SurgeArrest Essential P6WU2 protecting your computer, mobile devices, and other household electronics, you can have the peace of mind to know that all of your equipment has guaranteed protection from damaging power surges and spikes.

APC SurgeArrest P6WU2 How-to-Sell

APC by Schneider Electric is the most trusted name in power protection

- Prevent physical damage to your electronics caused by electrical surges and spikes
- Protect your data by preventing surges from interfering with devices that create and store data
- Save money by reducing the need to repair and replace damaged electronics
- Lifetime warranties and Equipment Protection Policies (EPP) are offered for all APC surge protection products, giving our customers the ultimate peace of mind.

Catastrophic event protection

Safeguards against lightning, surges, and spikes. Reliable thermal fusing helps ensure safe operation under all conditions, protecting your equipment.
