BAPI Building Automation Products

Schneider Electric Collaborative Automation Partner Program

- Broad range, HVAC sensors including air quality and volatile organic compound sensing
- Rapid turnaround for custom, tailored sensor designs, challenging HVAC applications
- Commercial and industrial HVAC markets

Introduction to BAPI

Located in a small farming community in Southwest Wisconsin, Building Automation Products, Inc. (BAPI) manufactures sensors and solutions for the HVAC/R industry around the world. Many of the products and processes developed by BAPI over the past 20 years have become industry standards. BAPI's dedication to quality has earned the company and the products they manufacture a reputation for reliability and longevity.

Words you will hear being used on a daily basis at BAPI are, "innovative", "deliberate" and "original". All BAPI products – from concept to finished goods - are designed, engineered and manufactured by people who take those words to heart. Because of that focus, BAPI products perform out of the box and far into the future. The same words apply when it comes to material selection as well since BAPI uses only the highest quality sensing elements, boards…

More than words, BAPI commits to the following actions to make sure their products set the standard for accuracy and reliability:

- 100% testing at every step
- NIST traceable precision instruments
- ROHS Compliant
- Confidence of the BAI-Backed guarantee, we stand by everything we do

The Partnership

Rather than just bringing another sensor to the market, BAPI looks at all their offerings with one question in mind, "How can BAPI deliver a higher level of innovation with and through this device or system?" The answer to that question can only be answered by BAPI's customers. As a result, these exchanges are the basis of long lasting partnerships between BAPI and their customers.

Unique Value

BAPI provides a full line of Schneider Electric authorized temperature, humidity, pressure, air quality and wireless sensors to meet nearly all commercial and industrial sensing needs. The company also has the experience, engineering & CAD support to turn new solution "visions" into reality.

Markets served

End user					OEM

HVAC/R Applications

Authorized CAPP products

Authorized CAPP products	Product description
Temperature sensors	Room, Communicating, Echelon Compatible, Modbus RTU, button, Wall Plate, duct, Averaging, Immersion, Thermowells, Strap, Remote, Outside Air. [1]
Humidity	Room, Communicating, Echelon Compatible, Modbus RTU, Remote Sensor System, Dew Point, Duct, Outside Air. [2]
Pressure	Low, Standard & High, EZ Pressure, Touch Interface, Pressure Pickup Ports, Pressure Probes, Pressure Switch. [3]
Indoor air quality	VOC Room & Duct, CO2 room & duct, CO Sensor, Refrigerant Leak Detectors, CO2 Calibration Kit, VOC Verification Kit. [4]
Accessories	Voltage Converters, Power Supplies, BAPI-Guard thermostat Protectors, Adaptor Plates, Flexible Probe Bracets, BAPI-Box Cutting Tools, Water Leak Detectors. [5]
Wireless	Room, Duct, Immersion, Remote, Outside Air, Freezer/Cooler, BAPI Slim, Receivers, Repeaters, Output Modules, Field Verifiers, WAM, Food Probes, Blü-Test Probes. [6]
