

Product End-of-Life Instructions

Product Range: MiCOM P40 – 80TE Cases

Purpose:

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note:

This product family is not in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Size:

H x L x D (mm): 180 x 410 x 260

Weight :

Around 14kg

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy :
 Reuse → Separation for special treatment → Other dismantling → Shredding.

The components of the products that optimize the recycling performances are listed, identified and located on the schematics below.

Recommendation	Number on drawing	Components	Weight (g)	Comment
Special treatment	1	Battery	9	
	2	PCB Assemblies (incl. electrolytic capacitors & LCD)	≈2500	
Other dismantling		Rest of device	≈12000	Including transformers, that should be separated from the boards before treatments. Depending on the exact model number, there may be more than 1 transformers module
