# Breathe new life into your aging drives

As the drives in your facility begin to reach the end of their life cycle, you face an important decision on their maintenance. What are your options? You can wait and risk downtime, upgrade to a new drive, or revitalize your current equipment.

For that last option, Schneider Electric offers a Drive Revitalization Service. It's an affordable and convenient replacement of critical components for aging Altivar 61 and Altivar 71 variable speed drives.

Taking this approach means you can extend the life of your current equipment and postpone renewal until a bit later, while reducing the risk of unplanned downtime.

# Meet your maintenance challenges with ease

With the Drive Revitalization Service, you get a complete solution that addresses your most essential needs when it comes to optimizing the life span of your equipment.

With all the labor performed by Schneider Electric experts and new original parts carefully selected to replace aging ones, you can confidently extend your drive's life up to five years.

As an affordable solution, our service enables you to use your OpEx budget, instead of CapEx. It also helps to reduce the risk of unplanned downtime and takes care of disposing of old parts\*.

# Make the right choice for your equipment

There are many factors to consider when choosing options for your facility. At Schneider Electric, we offer several solutions for your legacy equipment.

**The Drive Revitalization Service** is an excellent choice if you need to stay within a **limited budget** or **postpone renewal**. It allows you to **maintain existing product types** and avoid a potentially costly employee retraining program.

Our **engineering solutions** are good options if you would like to replace all key modules with the latest generation parts, while maintaining your existing enclosure and cabling.

Schneider Electric also offers a range of **new drives** if you are ready to fully replace your older equipment.

Alternatively, you may decide to do nothing, despite the risk of unplanned downtime.

# Why customers choose drive revitalization

Every facility presents different needs and challenges. Here are some of the reasons our customers requested the Drive Revitalization Service:

## Reliability:

“My current drives work well. I want to use them for longer.”

## Sustainability:

“I want to extend the life of my current drives for as long as possible.”

## OpEx/CapEx:

“I don't want to replace yet as we have plans to change our building infrastructure, including drives.”
