Wiser makes the most of your home

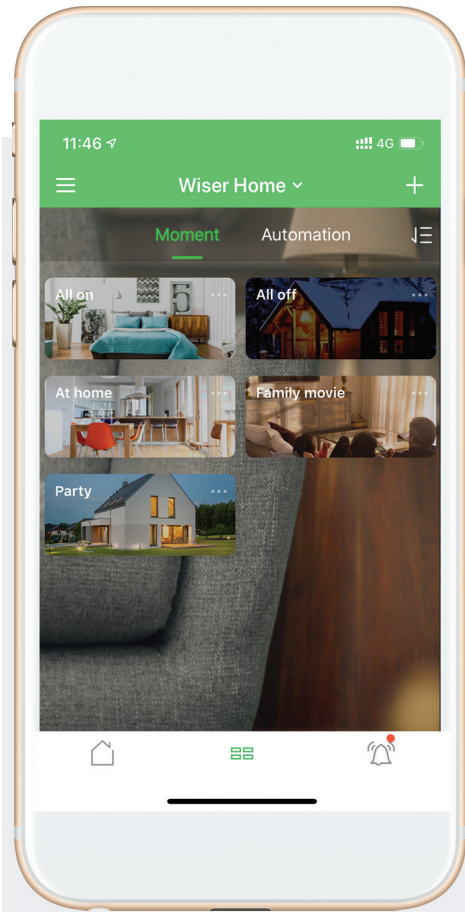

Wiser™ is a complete connected home solution that lets you control your home's systems locally or remotely with just a tap on the Wiser app or by voice control:

- Activate connected equipment like roller shutters or lighting
- Adjust the indoor temperature
- Take control of your energy bills

Adapt your home behaviour to your daily routines

Why do it yourself when you can let your home do the work for you? With Moments, your home can take care of itself.

Activate pre-set scenarios manually with just a tap.

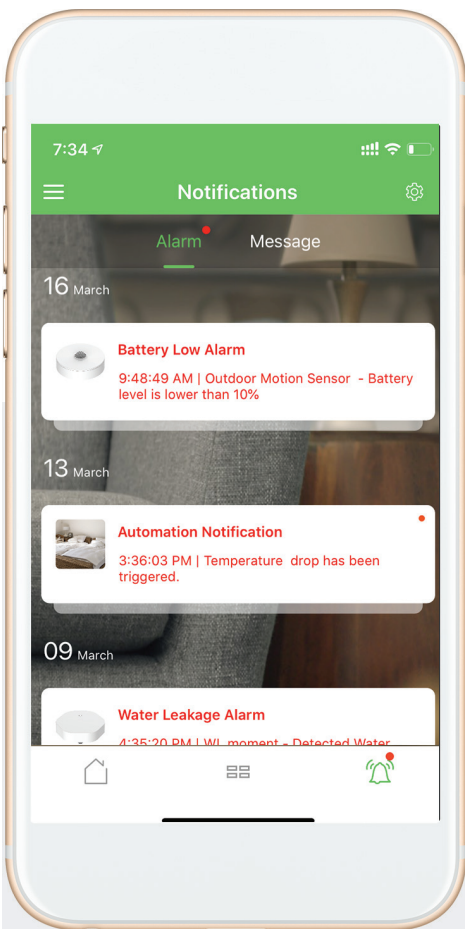

Your evening is about to begin. You settle in on the couch. The roller shutters close, the lights dim, and the TV switches on—everything you need for the perfect movie night. This is a Wisier Moment saved to your Wisier app. Once you create it, you can use it again and again, with just a tap on your smartphone's screen. Now every moment of your life can be a Wisier Moment. It's that easy!

Set and forget scenarios to match your daily routine.

The members of your family always come home at about the same time. With Wisier, your home can always be at the ideal temperature no matter the weather, the curtains can be closed to protect your privacy, and you can come home to the perfect lighting ambiance. Your Wisier scenario launches automatically according to your schedule. If you come home early, just activate your scenario manually with a simple tap on your Wisier smartphone app.

Let Wisier adjust your home's systems automatically.

If Wisier detects higher-than-normal humidity, for example, your air conditioning system will adjust itself automatically to ensure that your home is pleasant at all times. You can trust Wisier to keep an eye on your comfort, even when you can't.

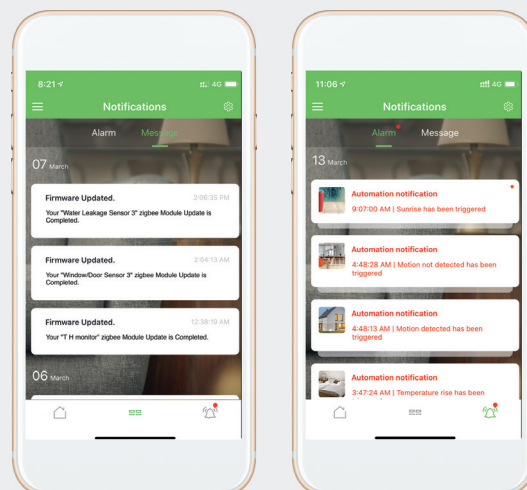

Wisier app alerts you on any issue at home

No matter where you are, Wisier is looking after your home.

Forget to close a window when leaving home this morning? With Wisier, a sensor detects the open window and sends you an alert to avoid wasting energy.

The Wisier app will also immediately let you know about issues such as leaks or intrusion, so you can act quickly to keep your home safe.

Users receive notifications when a device has been removed from or restored to the network, settings are changed, or when a moment is triggered.

Great looking switches for your connected home

Take full advantage of the great features your connected home has to offer, room by room, with AvatarOn switches. With a mirror-like flatness, smooth lines, and glossy white or gold finishes, AvatarOn switches look and feel great.

A LED indicator on the front of the switches can be set to blue or white to complement your room's style.

A trusted solution

Enjoy your connected Wiser solution designed by Schneider Electric. We've been making electricity in homes safer and more reliable for more than 100 years. Wiser is the culmination of decades of innovation that draws on our in-depth knowledge of connected homes. It is a robust, high-performance solution designed with the future in mind.
