More than a smart home

It's time to choose a Wiser by SE

As more homes become connected and the world increasingly relies on electricity, it's expected that global energy consumption will double by 2050.

Schneider Electric's vision for the sustainable, connected home of the future enables every device to be easily controlled and personalized through the Wiser by SE app, ensuring your home is not just smart but also sustainable.

Wiser provides an intuitive system with the tools you need to control your electricity usage and optimize your energy needs, without sacrificing comfort.

Efficiency pays off

To achieve net-zero carbon emissions by 2050, as set out in the Paris Climate Accords, governments around the world are implementing new policies and laws. These local decarbonization initiatives often include subsidies for energy-efficiency improvements in buildings.

That's where Wiser and its energy management capabilities come in.

20% of the world's CO₂ emissions come from homes*

Save yourself stress, time, and money

From busy schedules and endless to-do lists to high energy bills, everyday life at home can get the better of you. Wisier is here to help you live more comfortably and more efficiently – with minimum effort.

The Wisier smart home system is:

Energy efficient...

...to help you reduce your energy bills and live more sustainably.

Designed for a customized experience...

...so you can maximize comfort at home with intuitive control.

Modular and long-lasting...

...to create a durable solution that evolves with your needs.

Reduce your energy bills and live more sustainably

With Wiser, you have in-depth visibility of your energy consumption so you can use energy better and more efficiently.

Home energy management

Use Wiser energy insights to minimize your energy costs by taking advantage of the best electricity tariffs and avoiding exceeding your power usage limits.

Energy dashboard

Gain a clear view of how you use energy to make better-informed decisions, change your habits, and keep your budget under control.

Room-by-room temperature control

Adjust heating in every room individually, or turn it off while you're out via the Wiser by SE app to avoid wasting energy.

Moments and automations

Save energy with customizable pre-set actions. For example, set up the lights to switch off if no motion is sensed for a predefined time.

Maximize comfort with intuitive control

With Wisier, you can choose the most convenient way to manage your smart home system. That could be via the Wisier by SE app, a leading voice assistant, a wireless Free Located Switch, or automations. Or maybe traditional manual control. The choice is yours.

All-in-one app

The Wisier by SE app allows you to manage all your Wisier functions, like energy, heating and cooling, safety, lighting, and shutters, directly from your smartphone. The app also includes advanced user access settings and links to Wisier tutorials and support.

Moments

Create personalized Wisier Moments for all kinds of scenarios and situations in your home. A “Moment” enables you to set a specific scene – for example a “Movie Moment” can dim the lights and close the shutters so you're ready for a movie night. You can activate it manually, with a voice command, or turn it on automatically via a schedule.

Notifications

Wisier notifies you of abnormal events such as high humidity, smoke, water leakage, unexpected motion, or unusually high energy use, so you can address the issues before they turn into costly emergencies.

Choose a durable solution that evolves with your needs

Wiser is a modular, flexible system that lets you start small and expand later as you wish. For example, you may begin with lighting control, then add more Wiser functions. Robust and made with high-quality components, Wiser will serve you for years to come.

Robust connectivity

Wiser is based on a mesh network protocol (ZigBee) that helps ensure uninterrupted system service. If one device disconnects, other devices can still communicate with each other.

Regular updates

Frequent software updates keep Wiser in line with top-class security standards and help provide advanced functionality and compatibility with third-party devices.

A partnership ecosystem

The Connectivity Ecosystem Partnership of Schneider Electric and third-party companies helps ensure seamless interoperability between Wiser and other smart devices.

Quality

Wiser's quality stems from Schneider Electric's long experience in the residential market. Wiser devices come with transparent product information guaranteed by the Green Premium™ ecolabel.

Scalability

With ready-to-use connected devices that can be freely combined, Wiser is easy to set up and upgrade anytime you need.

Energy management

Keeping a close eye on energy consumption

With energy costs on the rise, knowing how you use energy is key to optimizing your bills. Wisier provides you with real-time information on electricity consumption and equipment status to help you maximize savings. It also lets you manage energy better via schedules and automations.

In the know

Wiser notifies you if an appliance's energy consumption suddenly spikes, so you can quickly identify and tackle the issue.

Understanding usage

On the Wiser energy dashboard, you can track in real time how much energy is being used by each device and how this usage translates into costs.

Smart choice

You can schedule electric vehicle charging in off-peak hours to take advantage of lower energy tariffs.

Make better-informed decisions

With just a tap on the app, you can check your heating usage in the current and previous months as well as savings enabled by Wiser.

Products for energy monitoring and EV charging

These connected devices collect information for the Wiser system, so you know exactly how much energy you are using and where.

Wiser Smart Plug

Connected Single Socket Outlet

PowerTag energy sensor

With the Wiser EV charger, you can charge your electric vehicle conveniently and safely at home while reducing costs and CO₂ emissions.

Temperature control

Connected temperature control

Wiser gives you advanced control over the temperature at home so you can lower your energy bills while boosting individual comfort.

Inside temperature
always right

Schedules for temperature control

Wiser can be set to adjust the temperature at home according to individual schedules. This way, you save on energy and costs while enjoying the highest level of comfort.

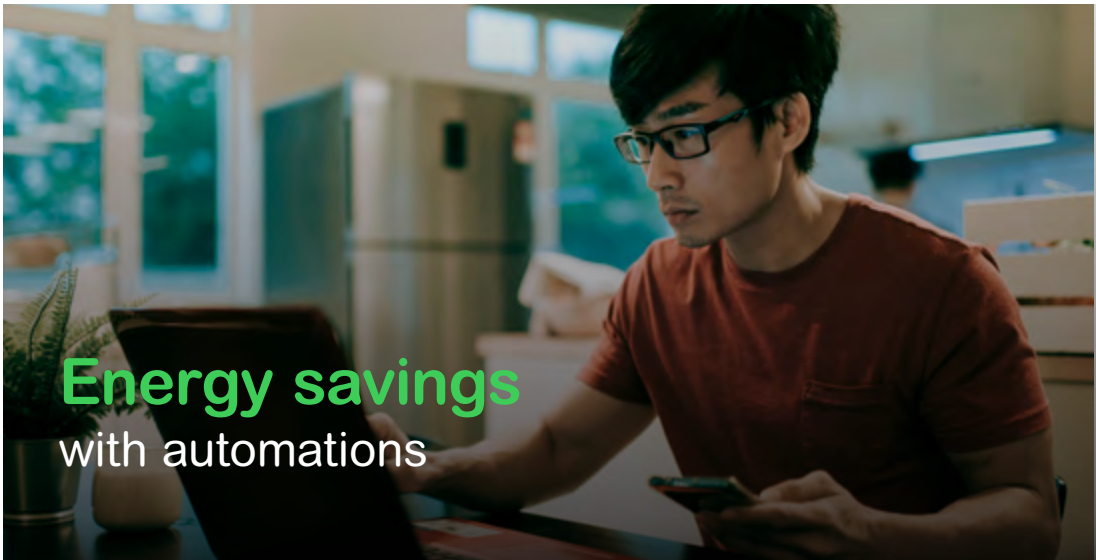

18%
energy savings with
thermostatic radiator valves*

Making every room just right

Everyone has their own rhythm and preferences. That's why with Wiser, every family member can heat their room independently.

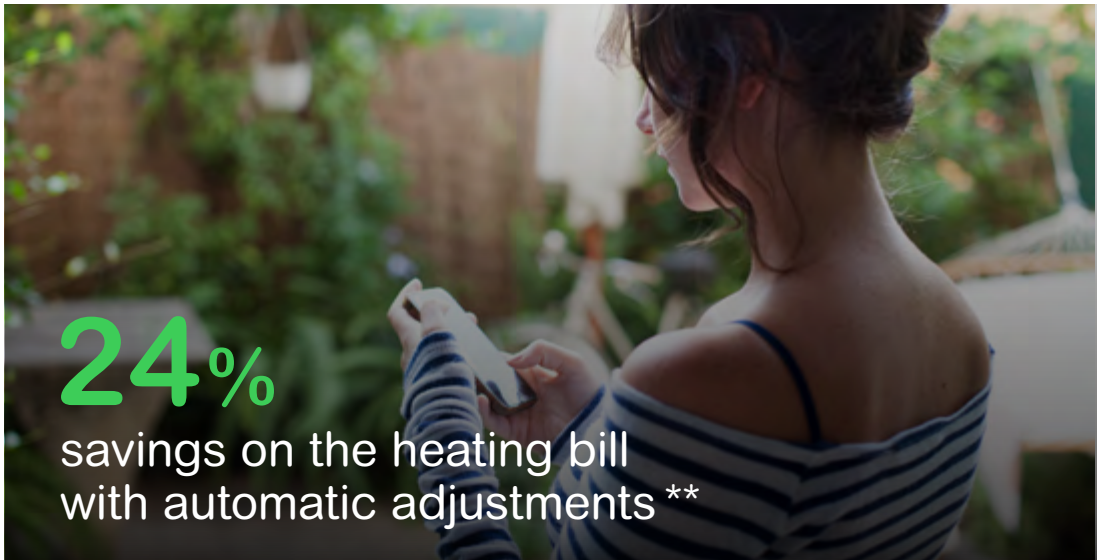

*Data source: Assessing the energy savings from Thermostatic Radiator Valves in a whole house test facility, BEAMA, 2018

Energy savings
with automations

Automatic heating adjustment

When a window is left open in a room with the heating on, Wiser will turn the radiator off to prevent energy loss.

24%
savings on the heating bill
with automatic adjustments**

Peace of mind when away

By activating the Away Moment before departure, you can be sure the heating is turned off and no energy is wasted. If the temperature gets too low, Wiser will turn on the heating automatically.

**Data source: Fraunhofer Institute

Products for temperature control

Add smart heating control to your home to enjoy the right temperature at all times. You'll also find devices that work with the Wiser by SE app to help you stay on top of energy bills. Here's what Wiser offers:

Lighting and shutter control

Connected lighting

Wiser enables you to create customized atmospheres, program scenarios, and turn all the lights on or off with a tap.

Intelligent control

Wiser automatically switches off lights when no one is detected in a room after a pre-set period of time.

The perfect ambiance

With a pre-set "Moment" Wiser adjusts lighting automatically to set the mood, whether it's party time, dinner time, or just ice-cream-and-chill time.

Saying goodnight in style

At bedtime, Wiser turns your lights off after a set time. It can also switch interior and exterior lights on at sunset.

Adapting to natural conditions

Wiser activates your outdoor lighting automatically when natural light falls below 300 lux at any time during the day.

Connected shutters

With Wiser, you can program the opening and closing of roller shutters – either completely or partially to the chosen percentage – according to your own needs or the rhythm of the sun. Advanced shutter control can also contribute to energy savings by helping prevent overheating and overcooling of your rooms.

Greater safety

Wiser can simulate presence at home by opening and closing shutters while you're away for a longer period, for example when you're on a work trip or vacation.

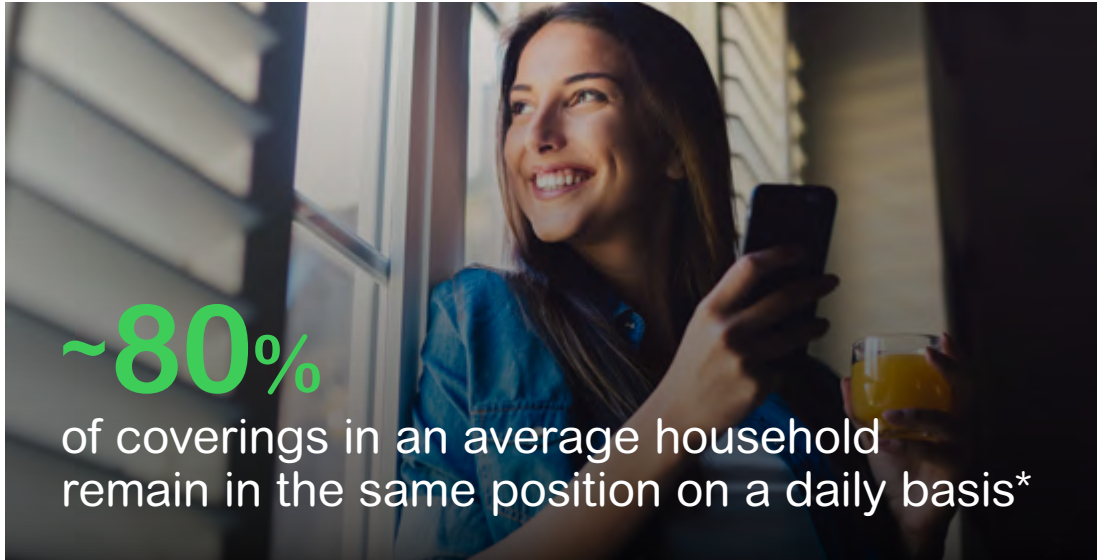

76% of sunlight that enters via windows in summer becomes heat*

You can keep your home office cooler during the summer and keep the glare off the computer screen by asking Wiser to shut the shutters and block sunlight.

~30% of a home's heating energy is lost through the windows*

Close your shutters remotely if weather conditions change, for security purposes, or to maintain the temperature inside and save energy on cooling/heating.

~80% of coverings in an average household remain in the same position on a daily basis*

Thanks to the astromode function, there's no need to do anything – your shutters will automatically close according to the sunset time.

Safety and security solutions

More than a smart home

Enhanced safety and security

With Wisier, you get greater peace of mind with improved home safety, thanks to smart sensors that detect unusual movement and situations, and alert the system to notify you.

Peaceful travels

With a simple tap on the Free Located switch, you can activate an Away Moment when leaving home and get notified if windows and doors have been left open by mistake.

Protection from intruders

Wiser can notify you and turn on the lights automatically if it detects presence around your home, for example when the Away Moment is active.

Flooding prevention

The water leakage sensor sends you a notification through the Wiser by SE app if leakage is detected, so you can address the issue quickly to avoid damage.

Smoke detection

With a connected smoke alarm integrated into your Wiser system, all the lights will switch on in case of an incident to facilitate evacuation. In the event of a network connectivity failure, the alarm system will still work normally.

Safety and security devices

Wiser sensors are the eyes and ears of your smart home system. They're unobtrusive and easy to install by yourself.
