Trends shaping the hotel sector

The hospitality industry is undergoing a transformative evolution, brimming with both risks and incredible growth opportunities.

With evolving guest expectations, technological advancements, and the growing importance of decarbonization initiatives, the global hotel landscape is experiencing a paradigm shift. However, it's worth noting that labor shortages and cost volatility continue to exert additional pressure on the industry. These powerful forces are challenging traditional hospitality models.

Our promise

At Schneider Electric™, we are dedicated to empowering hotel owners and operators to achieve the highest standard of service. We provide tailored solutions that address your existing challenges and adapt to those yet to come.

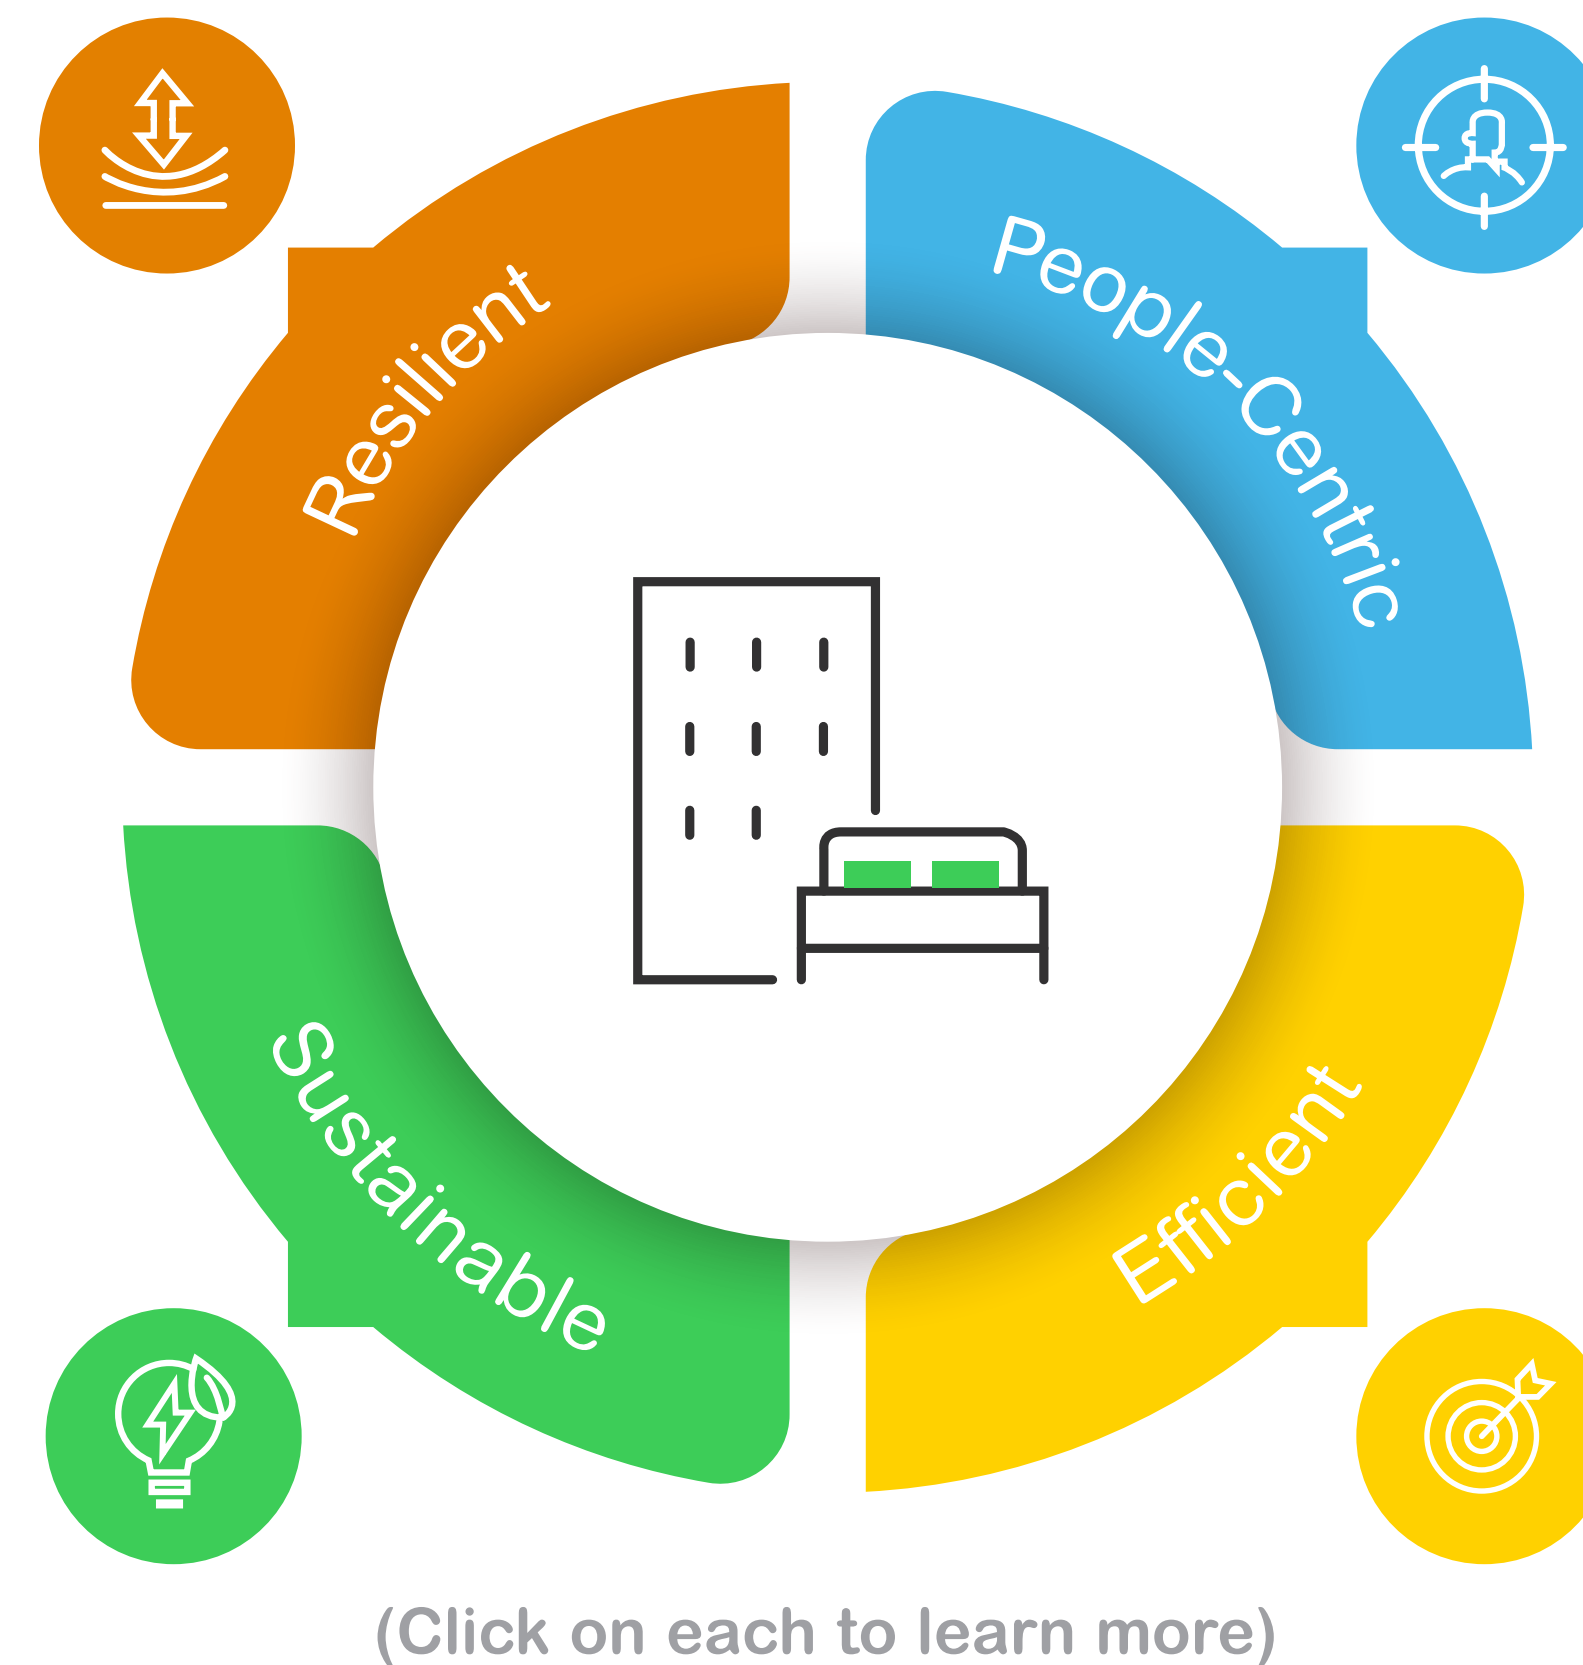

We take hoteliers places with purpose and personalization

We forge partnerships with hoteliers so they can focus on what matters most – the guest. We design, modernize, and optimize your entire hotel system, from compelling experiences to cost savings and zero-carbon emissions today.

Our philosophy revolves around delivering outcomes that truly matter. By embracing digitization and electrification, we help hotels become more **Sustainable**, **Resilient**, **Efficient**, and **People-centric**.

With Schneider Electric as a trusted advisor, you can confidently navigate the evolving hospitality industry while unlocking the full potential of your hotel.

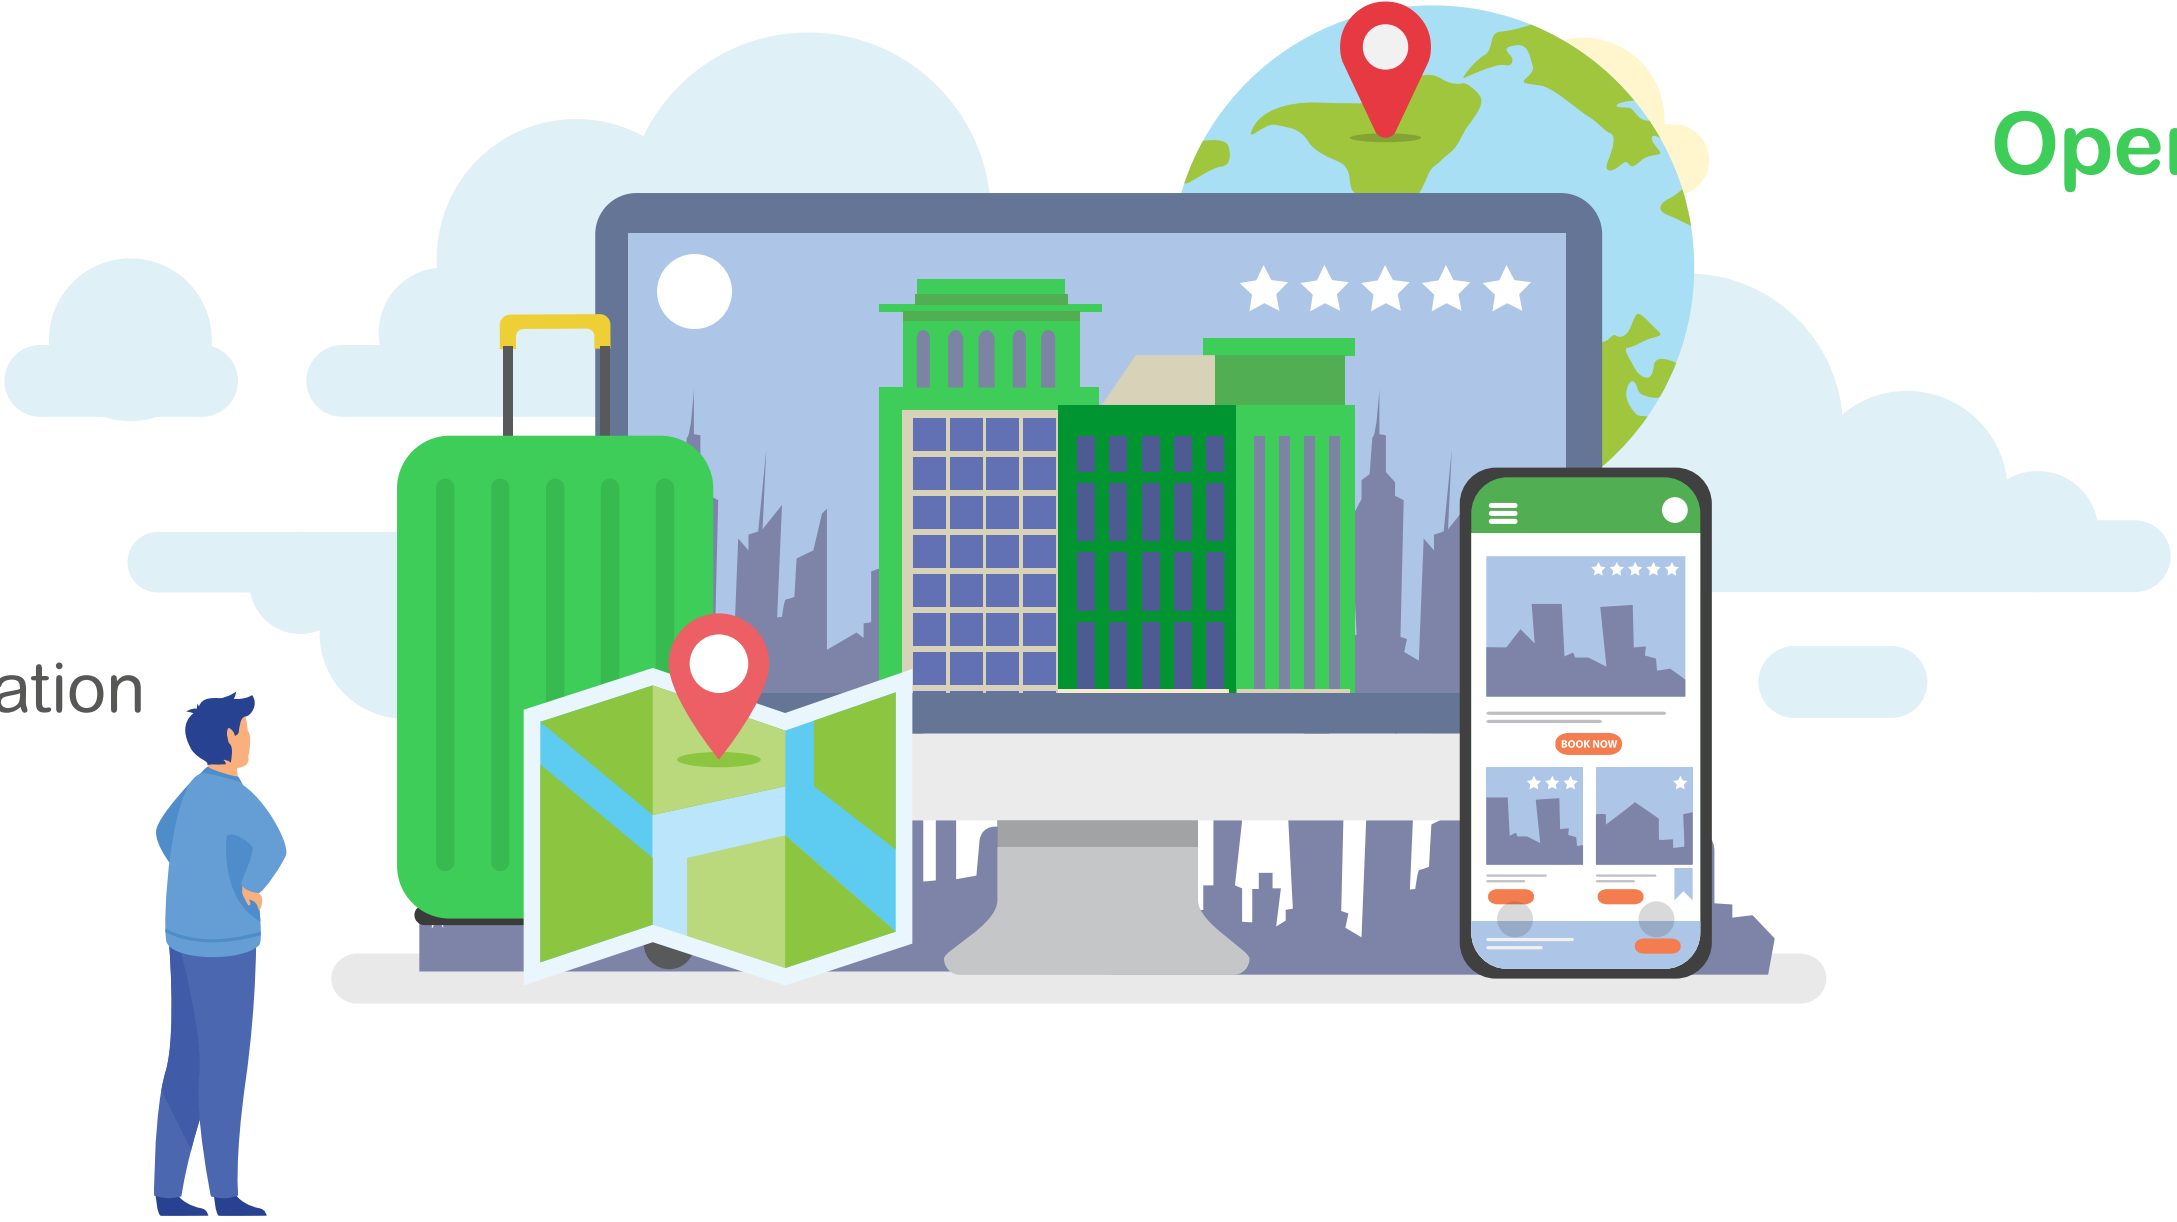

Enable more electric and digital hotels

EcoStruxure™ for Hotels unifies disparate systems and connects guest rooms to electrical systems, building automation, and beyond for **enhanced performance** and a **seamless experience**. Supported by an integrated range of **consulting, field, and digital services**, we help you do more with less across the entire lifecycle.

EcoStruxure for Hotels solutions

-  Guest room management
-  Integrated building operation platform
-  Power and infrastructure operation
-  Energy asset and maintenance services optimization
-  Sustainability and decarbonization strategies
-  eMobility infrastructure and services
-  IT management

Operational advantages

Discover more about integrated hotel solutions. [Learn more](#)

The sustainability imperative

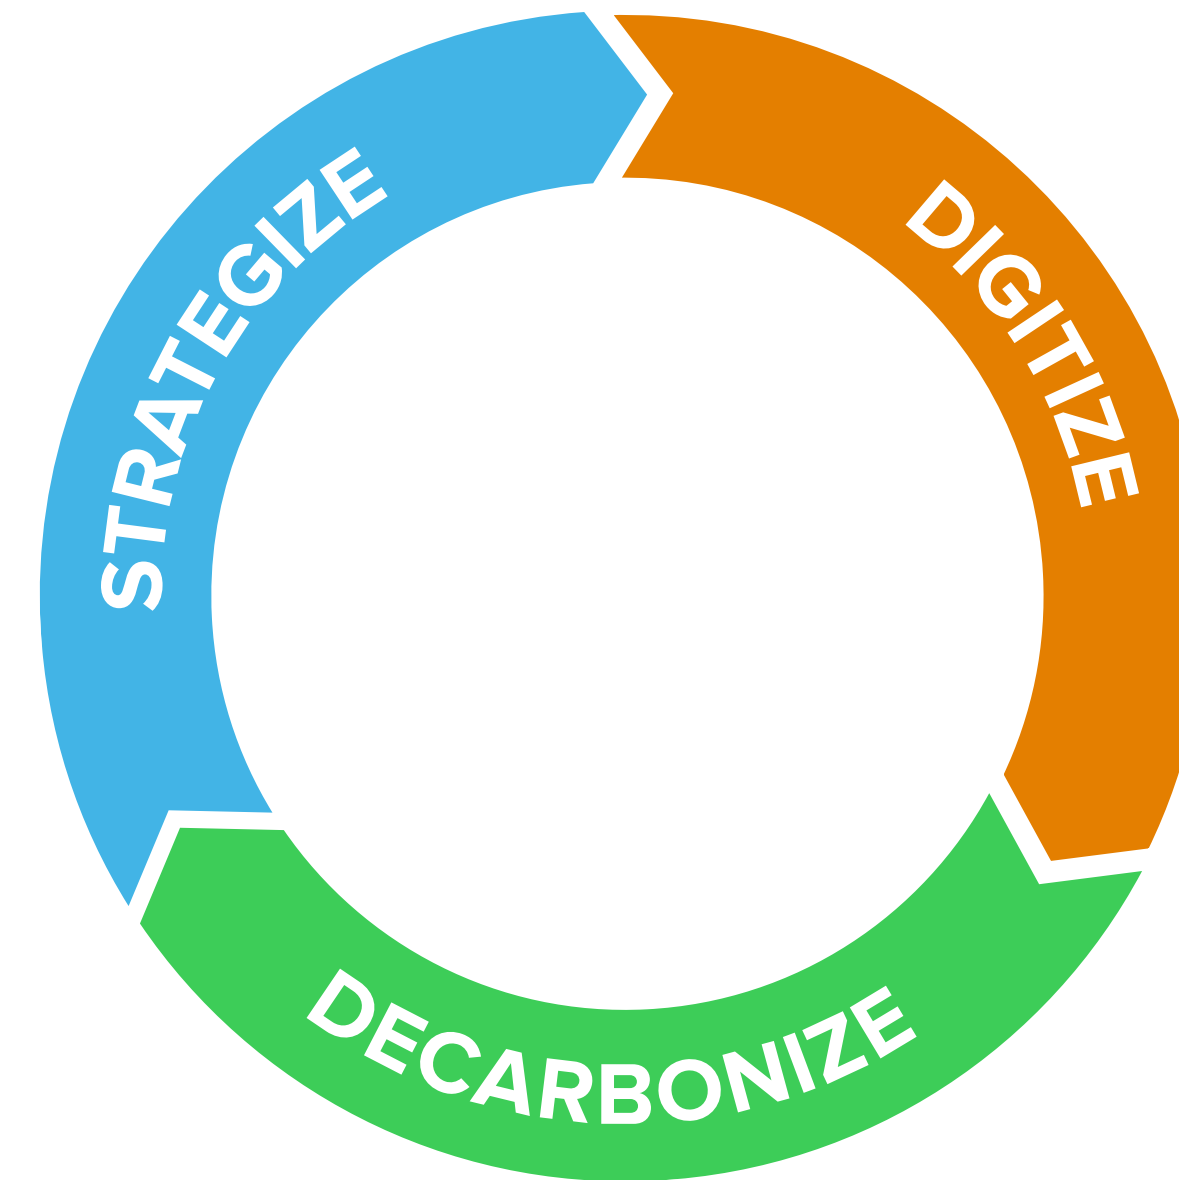

Hotel guests are keenly aware of global warming. 87% of travelers want to travel sustainably and may deliberately stay in chains that demonstrate a genuine commitment to CO₂ emission reductions.¹

Decarbonizing operations is no longer a “nice to have” but a “must do” – in the minds of both shareholders and guests. However, sustainability can only be effective and potentially drive future growth as part of a long-term vision and strategy.

From strategy to realization

Hotel owners and operators are in a race to net-zero, and we can support it with our **3-step process to net-zero**:

1. Strategize
2. Digitize
3. Decarbonize
