APC Back-UPS Pro Gaming

Keeping You Protected, Connected and In The Game

Protected

A gaming battery backup protects your valuable gaming system from more than seven different types of power interruptions.

Connected

After safely shutting down your game, a gaming UPS will continue to power your router and/or modem, enabling you to stay online with a mobile device.

In The Game

Power out? Don't worry. Stay in the game to finish your match, fight the boss, and reap the rewards you might have lost.

For PC and console gamers, APC™ by Schneider Electric forges a powerful Back-UPS™ Pro Gaming, the gaming UPS that relentlessly protects and powers your gaming station.

Gaming UPS Features

Reactor Circle

When the Gaming UPS is on battery backup power, the reactor circle ticks down so you can see how much time is left at a glance.

Sine Wave Power

Make sure your sensitive, high-end gaming gear stays powered when you need it most.

High Power Capacity

Industrial leading power capacity 2,200VA / 1,320W to support professional gaming consoles.

Customizable Lighting

Get the right look to seamlessly coordinate with your gaming rig.

Alert Lighting

Pulsing and flashing lights alert you to power anomalies like surges, dips, and wiring faults.

UK Plug Sockets

Build-in two UK sockets as a user-friendly design for truly plug & play.

Staying Connected

Power Your Router/Modem

Remember to plug the router/modem into the ups or when the power goes out, you will still lose internet connection.

Plugged In Devices

More devices plugged in means the more power your battery needs to supply. Make sure to only plug in the essentials to keep you gaming.

Power Protection

Automatic Voltage Regulation

Even the smallest fluctuations of power can shorten your gaming PC and console's lifespan. APC Gaming UPS keeps the power at stable levels with automatic voltage regulation (AVR) for your battle stations.

Sine Wave Power

Battery backups aren't created equal. Picking the wrong one could still leave you in the dark. APC Back-UPS Pro Gaming offers sine wave to ensure sensitive gaming gear stays powered when you need it most

Customizable RGB

Tailored to your gaming rig

A UPS that finally matches your gaming setup with twelve colors to choose from. RGBs also provide a function beyond aesthetics.

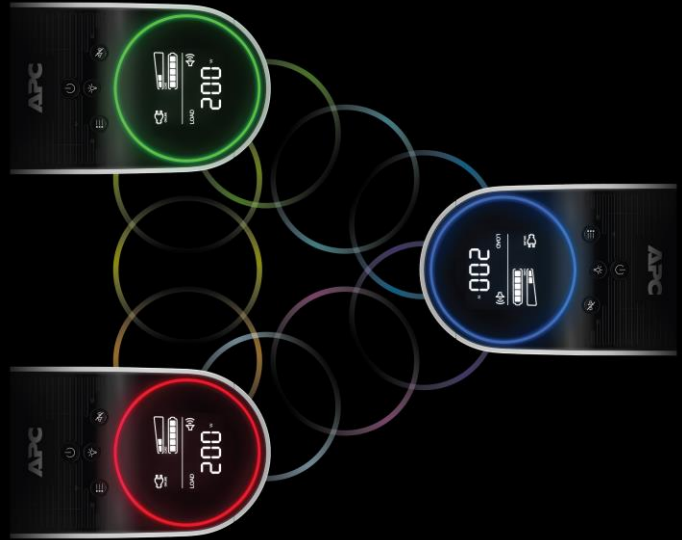

During a power outage RGB colors also demonstrate battery power left.

Green= 51% or more

Yellow= 21% - 50%

Red= 20% - 6% or less

Flashing Red= 5% or less

Rear RGB LED

Ease of access in the dark

APC Gaming UPS is fitted with rear LEDs that illuminate the outlets, so you see exactly where you're plugging in your gaming gear.

Rear LEDs color synch with the reactor circle and offer an ambient glow behind your gaming rig.

Technical Specs

BGM2200-UK / BGM2200B-UK

Output	
Power Capacity	2200VA / 1320W
Nominal Output Voltage	207VAC-253VAC
Output Voltage Frequency (Hz)	50/60Hz ± 1Hz
Waveform Type	Sine Wave
Power Factor	0.6
Input	
Nominal Input Voltage	230VAC
Total Outlet Number	4
Outlet Type	2*IEC (C13) and 2*UK
Protection	
Surge Energy Rating	1080 Joules
Coax protection	No
Dataline Surge Protection (Gigabit)	Yes
Input Over Current Protection	Circuit breaker 15A
Physical	
Unit Dimensions	H:29.1cm * W:10.5cm* D:40.8cm
Unit Weight	12.32 kg
Runtime (half load)	4 mins 15 secs
Runtime (full load)	50 secs
Colors	Midnight (BGM2200B-UK) & Arctic (BGM2200-UK)
USB Outlet	
USB Voltage Range	4.75V-5.25V; Load=3A
USB Outlets	Type A= 2 Type C= 1
USB Charger	5V/3A total
Battery Information	
Battery Type	Lead-acid
Battery User Replaceable	Yes
Management	
Alarms	On-battery, low battery warning, low battery shutdown, replace battery detected
Shutdown Software	PCSS
Conformance	
Certification and Approvals	CE
Warranty and Equipment Protection	3 years for UPS and 15 months for battery
