

EcoStruxure Plant Certifications Program

Note: Requires Adobe Reader for full interactive experience

Schneider
Electric™

What is the EcoStruxure Plant Certifications Program?

The EcoStruxure Plant Certification Program provides a framework for individuals, and for organizations, to qualify against the core competencies necessary for the implementation of solutions based on the Schneider Electric EcoStruxure Plant portfolios and corresponding architectures.

For individuals, the program provides recognition of advanced technical expertise in one or more of the specializations of the EcoStruxure Plant portfolios and related architectures.

For System Integrator organizations, it's the starting point for entry into the top-tier Schneider Electric System Integrator partner program, known as the Alliance Partner Program.

For End Users, it provides additional assurance that engineers have met the minimum requirements to implement solutions based on the EcoStruxure Plant portfolios and corresponding architectures.

Professional Level

The **Professional Levels** are introductory level certifications that are based on product offers, and are the first step towards the full Certified Status.

Where applicable, the examinations are written using the most recent version of the product.

The current list of Professional Levels are:

- Pass rate of 70% applies to all examinations
- 3 Year validity for Professional Certifications

How long is my certification valid for?

All certifications are awarded for a period of 3 years, at this stage there is an option to renew the certification via series of Upgrade examinations, without having to restart the entire process.

What training is available to help me prepare?

Schneider Electric offers a wide range of training courses on all aspects of EcoStruxure Plant architectures, e.g. SCADA, PAC, Networking, in addition training is available for many further topics. These training courses are typically available through Training Centres located in Carros (France), Singapore & Boston (USA). Training can also be organized in other locations, for more details related to training contact: Global-Education@schneider-electric.com
