Direct Current and Photovoltaic Systems
Applying Heavy Duty Safety Switches (Fusible and Non-Fusible) on dc and Photovoltaic Systems
Retain for future use.

General dc and Photovoltaic Systems, UL® Listed, CSA® Certified (Files E2875 and E154282)

NOTE: Heavy duty safety switches may be used on photovoltaic systems with a grounded feed. Refer to Figures 1B, 1D, 1F and 2 (negative grounding shown; positive grounded systems are similarly allowed). For ungrounded systems, see National Electrical Code® (NEC®) 690.35 (NEC 2008, NFPA 70).

All heavy duty safety switches with dc ratings (2-, 3- and 4-pole fusible and non-fusible) are Underwriters Laboratories® (UL®) Listed and CSA® Certified for use on dc applications when wired as shown in Figure 1 (A, B, C, D, E, and F). Additionally:

• Heavy duty safety switches are rated for 600 Vdc maximum open circuit voltage.
• Non-fusible safety switches may carry 100 percent of the nameplate current rating.
• Fusible safety switches may carry 80 percent of nameplate current rating (continuous use).
• Heavy duty safety switches are dc horsepower rated as indicated on the safety switch wiring diagram.
• Heavy duty safety switches have a 10,000 ampere dc short-circuit rating at 600 Vdc unless otherwise stated on the switch wiring diagram. Consult factory for short circuit current ratings at 250 Vdc.
• Refer to current Square D® Digest for lug wire range of heavy duty safety switches.
• Photovoltaic systems using ungrounded arrays must use two poles of the disconnect as shown in Figure 1 (A, C, and E) where one pole is placed in each of the two ungrounded conductors.
• Applications 1A, 1C, and 1E (see Figure 1) are for ungrounded photovoltaic arrays only.

(Non-Fusible Shown)
Alternate Photovoltaic System
Wiring, Evaluated and
Self-Certified by Schneider Electric

Not UL Listed

Figure 2: Grounded Feed per NEC® Article 690

- These photovoltaic connections are to be used only with grounded photovoltaic systems where the grounded conductor-to-ground bond is made inside the inverter by the dc ground-fault protection system. Do not duplicate this existing bond in the field.
- Positive grounded systems are similarly allowed.
- For ungrounded systems, see NEC 690.35 (NEC2008, NFPA70).

Current Ratings

### Non-Fusible

<table>
<thead>
<tr>
<th>Catalog Number</th>
<th>Switch Nameplate 600 V</th>
<th>Switch dc Rating per Pole</th>
<th>Photovoltaic Short-Circuit Current (I_sc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>HU361</td>
<td>30 A</td>
<td>20 A</td>
<td>16 A (20/1.25)</td>
</tr>
<tr>
<td>HU362</td>
<td>60 A</td>
<td>60 A</td>
<td>48 A (60/1.25)</td>
</tr>
<tr>
<td>HU363</td>
<td>100 A</td>
<td>100 A</td>
<td>80 A (100/1.25)</td>
</tr>
</tbody>
</table>

**NOTE:** The non-fusible disconnect is rated for carrying 100% of the test current, which makes the rated current 1.25 x I_sc.

### Fusible

<table>
<thead>
<tr>
<th>Catalog Number</th>
<th>Switch Nameplate 600 V</th>
<th>Switch dc Rating per Pole</th>
<th>Photovoltaic Maximum Circuit Current</th>
<th>Photovoltaic Short-Circuit Current (I_sc)</th>
</tr>
</thead>
<tbody>
<tr>
<td>H361</td>
<td>30 A</td>
<td>20 A</td>
<td>16 A dc per pole</td>
<td>12.8 A (20/1.56)</td>
</tr>
<tr>
<td>H362</td>
<td>60 A</td>
<td>60 A</td>
<td>48 A dc per pole</td>
<td>38 A (60/1.56)</td>
</tr>
<tr>
<td>H363</td>
<td>100 A</td>
<td>100 A</td>
<td>80 A dc per pole</td>
<td>64 A (100/1.56)</td>
</tr>
</tbody>
</table>

**NOTE:** For fusible disconnects where the fuse must be rated: 1.25 x 1.25 x I_sc = 1.56 x I_sc.

1. The switch per pole rating is I_sc multiplied by 125%.
2. The switch per pole rating must be at least the photovoltaic maximum circuit current multiplied by 125%.
3. From NEC 2008 and NFPA 70, Article 690.8: the photovoltaic maximum circuit current is I_sc multiplied by 125%.

- If a non-fusible disconnect is used, the inverter must not be capable of backfeeding currents into a short circuit or fault in the photovoltaic array or string.
- If a fusible disconnect is used, 600 Vdc rated fuses may be required.
- One inverter may be connected to each pole of the switch.
- Refer to the current Square D Digest for lug wire range of heavy duty safety switches.
