Humidity Sensors

EH Series

Product Description

The EH Series room, duct and outdoor humidity sensors are a universal Relative Humidity transmitter that can be powered with either a +15 to 36 Vdc or 24 Vac supply voltage. The EH Series sensors are designed with a field-selectable 4-20 mA, 0-5 VDC, or 0-10 Vdc output signal that is equivalent to 0 to 100% RH. The EH Series is used in building automation systems, humidity chambers and OEM applications and is compatible with Vista, Continuum, I/Net and I/A systems.

Features

- Single-point field calibration
- Field selectable output signals
- $\pm 2\%$ accuracy
- Low drift
- Highly repeatable
- Integral temperature sensor
