

56 Series™

IP66 Plugs and Connectors

16A – 50A

# Tougher Plugs for a Safer Workplace

Schneider  
Electric

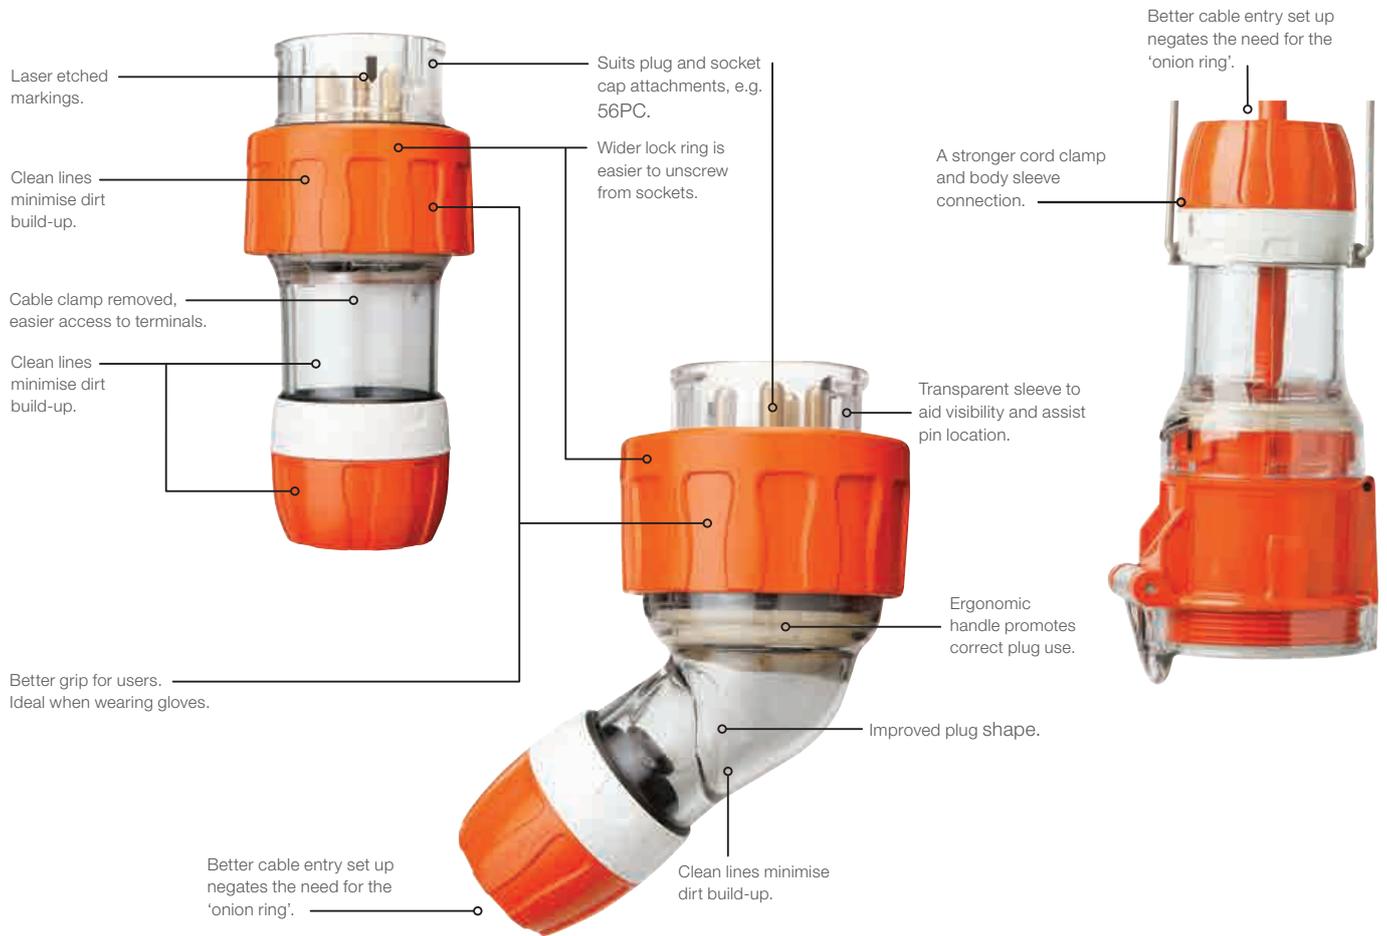

# Powerful design,

## Features & Benefits

When it comes to quality and reliability, 56 Series™ sets the standard for performance and durability.

- Available in 16A, 20A, 32A, 40A and 50A options.
- Quick Connect termination available in select 16A & 20A plugs.
- IP66 rating.
- Small and large cable seals provided to suit a wide range of cable dimensions.
- Macro™ Technology provides a revolutionary cord clamp and cable system all in one, with no need to remove the cable nut.
- Screw-less Snap Shut body assembly utilises latching spring and allows for speed, simplicity, strength and improved reliability.

### SNAP-SHUT BODIES USING MACTRO TECHNOLOGY

# trusted brand, built tough to last.

## The facts

### Performance

- ✓ Designed and developed in conjunction with practising electrical contractors, as well as dozens of factory visits reviewing usage and user requirements.
- ✓ Weak areas improved:
  - A stronger cord clamp
  - A stronger body and sleeve connection
  - New connector flap and latch design
- ✓ Difficult areas improved:
  - Easier to unscrew from sockets – a longer lock-ring
  - Easier access for maintenance
  - Better cable entry set-up (no more onion rings!)
  - Fewer parts
  - Easier to grip – promoting proper use
- ✓ 50% Time Reduction\* for Installation (approximately).

\* Time studies on independent contractors after learning new assembly technique

### Materials

As with the existing 56 Series™ plugs and connectors the same superior quality materials have been retained within these new products as we know they have a proven performance history.

**PLASTICS** – industrial grade resins with outstanding high-impact strength, and UV protection. Fully orange plugs & connectors are available and use a specially formulated chemical resistant material.

**METALS** – corrosion resistant stainless steel parts using proven grades of materials. High conductivity brass pins on the plugs and sockets.

### Testing

- ✓ Full Standards and Safety Testing Completed. Compliant with AS/NZS3123, AS/NZS3100, AS60529, and IEC60309
- ✓ Endurance Testing\*:
  - QC terminals – withdrawal force approximately 5 times above standards requirements
  - Snap-shut bodies – 800+ operations
  - MACTRO™ cord clamp and cable seal – operation in extreme heat (+55°C), and in extreme cold (-40°C)
- ✓ In-house testing\* (compared to existing):
  - Strength – cord clamp up to 12% stronger
  - Strength – snap-shut body clips => 18% stronger
  - Chemical resistance – body & sleeve area => withstands where existing fails (cracks)
  - Impact test (destructive) => various tests results in equal to or better than the existing

In-field testing:

- Prototypes and production samples have found their way to some of the harshest environments NZ can produce.

\*This is only a snap-shot of the full testing programme carried out

## Accessories

### Adaptor Modules

The 56AM25 and 56AM40 threaded adaptors are suitable for fitments of flexible conduit glands or hose adaptors.

To fit, simply remove existing locknut and replace with adaptor module.

- 56AM25 will suit 16A to 20A (size 1) plugs
- 56AM40 will suit 32A to 50A (size 2) plugs.

**56AM25,  
56AM40**

### Pendant Conversion Kits

56SHM and 56SHL Suspension Hooks enable 56CR Series Connectors to be easily converted to pendant outlets.

There are two models available (medium 56SHM and large 56SHL) for connectors; 16A – 20A and 32A – 50A respectively, both of which are manufactured from quality 316 grade stainless steel for long life and to withstand loads of up to 50kg.

**56SHM**

**56SHL**

### Plug cover:

When not in use, 56P and 56PA plugs can be additionally protected by utilising the 56PC Plug Cap. When in position, the cap provides protection for the pins from damage, dirt, grease, chemicals and water ingress.

The caps are simple to fit and fully enclose the plug face to provide IP66 protection.

**56PC**

## Accessories

Catalogue Number	Amps	Description
56SHM	-	Suspension hook (replaces 56POK and suits size 1 plugs and connectors)
56SHL	-	Suspension hook (replaces 56POKI and suits size 2 plugs and connectors)
56AM25	-	25mm cable adaptor module, suits size 1 plugs connectors 16A - 20A
56AM40	-	40mm cable adaptor module, suits size 2 plugs connectors 32A - 50A
56PC	-	Plug cover, suits both size 1 and 2 plugs 16A - 50A

### Important Notes

- QC = Quick connection terminals
- K = Special keyway for high cycle applications
- All products in Orange/Clear as standard, for chemically resistant orange order with a 'V' in the part number. Eg: 56PAV320 These plugs are fully orange

- QC plugs are not available in chemically resistant orange or 6 & 7 pin plugs
- 56CRs not available in QC
- 56CRs suit Cat 56SHM for suspension – replacing 56POK
- New products will be differentiated with new carton labels, and installation instructions.

## How they work

### MACTRO™ Cord Clamp & Seal

OPEN

No need to remove the cable nut! It can stay on as you feed the cable.

CLOSE

The clamp grips the cable better than any traditional cord clamp, and is locked in place by a locking tab, preventing users from unscrewing.

### The Legacy Continues

PDL's 56 Series™ range has a proud history for being the toughest and most trusted industrial switchgear available in New Zealand.

Our improved and extended range of plugs and connectors are manufactured with premium quality materials, tested to the highest standards and designed for easier, faster connection.

As New Zealand's leader in industrial switchgear for more than 30 years, you can be confident the 56 Series™ won't let you down when the going gets tough.

The 56 Series™ offers unrivalled flexibility – from modular enclosures, straight and angled plugs, and the ability to multi-gang up to 16 products.

When it comes to quality and reliability, 56 Series™ sets the standard for performance and durability.

### Quick Connect Terminals

#### To Terminate:

- 1) Push driver into slot to open terminal
- 2) Insert stripped, untwisted cable into terminal, & release driver from slot. DONE

#### To Release:

- 1) Push driver into slot to open terminal – pull out cable. DONE

The terminals act on spring tension and clamp the cable in place. They do this in a more consistent and reliable manner than traditional screwed terminals.

### New to the Mactro range are the size 2 plugs and connectors.

56 Series™ size 2 plugs and connectors have undergone a design upgrade. Following the successful acceptance of the size 1 plug and connector re-design, size 2 plugs and connectors are now faster and simpler to use. These too have adopted the Snap-Shut body design, and Mactro™ Technology.

### Snap-Shut Bodies

OPEN

The 'latching' spring clip stays down once it is pressed, so it is just a simple PRESS & TWIST.

CLOSE

Could not be easier! The spring clip when shut does not exert any stress on the housings, thus resulting in a stronger body and sleeve connection area.

## M A C T R O T E C H N O L O G Y

### Mactro™ Technology

A revolutionary cord clamp and cable seal system all in one. No need to remove the cable nut.

- Faster
- Stronger
- Fewer parts
- Reliable
- Patented

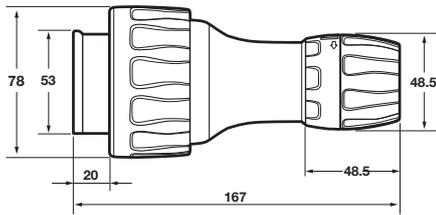

Secure cable seal.
