

# Altivar™ & Altistart™ Programming Cable

## 30-Pin Mobile to RS-485 Converter Cable

VW3A8151R20U

The VW3A8151R20U converter cable provides a link between Schneider Electric™ devices supporting half-duplex Modbus™ with RS-485 communication and Apple iPad™ mobile devices running iOS 5.1 or later<sup>1</sup>.

### Features and Benefits

Communicate directly with variable speed drives and soft starters via iPad device using the VW3A8151R20U converter cable and one of the five programming tools available today.

The Programming Tools allow users to create, save, upload and download configurations for variable speed drives and soft starters.

### Programming Tools include:

- Approximately 300+ programmable parameters
- Detailed parameter descriptions
- Help screens
- User manuals for the drive or soft starter

### Requirements in addition to VW3A8151R20U<sup>2</sup>:

- Compatible Schneider Electric drive or soft starter<sup>3</sup>
- Apple iPad device running iOS 5.1 or later<sup>1</sup>
- Altivar or Altistart Programming Tool installed on your iPad device

### Programming Tools

#### Drives

1. ATV12
2. ATV212
3. ATV312

#### Soft Starters

1. ATS22
2. ATS48

<sup>1</sup> iOS devices equipped with a Lightning port require a 30-pin to Lightning port adapter.

<sup>2</sup> The RJ-45 connector is not compatible with any PoE (power over ethernet) communication systems. If used with a PoE system, the converter will be damaged and require replacement

<sup>3</sup> The VW3A8151R20U converter is not compatible with the Schneider Electric Modicon range (Quantum and Momentum products)
