Life Is On | **Schneider**  
Electric

Your home is a reflection of your personality, passions, and preferences. It's the ultimate expression of *you*.

Renovation is an opportunity to enhance your home by adding a touch of style and a measure of safety. A bright splash of character and a dash of ingenuity.

We can help you transform your home – and your lifestyle – with a wide variety of switches, outlets, safety devices, and smart home solutions, together with support from one of our trusted electrician partners. That way you can be sure your renovation runs smoothly, from start to finishing touch.

# Protect your loved ones

When your little explorers set off on adventures, your house needs to be ready. Create a safer, more secure environment with best-in-class electrical equipment from Schneider to keep your family protected against the risk of electrocution and home fire.

## Circuit breakers

Protect your home's electrical installation against current overloads. These reliable circuit breakers automatically isolate faulty circuits to prevent fires.

## Residual current devices

Protect your family against electrocution threats by adding a residual current device to your panel board. These devices detect current leakage and isolate faulty circuits in milliseconds.

## Electrical outlets with shutters

Safeguard your children against burns and electrocution. Install outlets with shutters that block current flow unless a plug is in the outlet.

## Argus smoke detectors

Argus smoke detectors are designed to sense the slightest sign of fire. They can be ceiling-mounted in minutes and can run on the same batteries for up to 10 years.

# Protect your appliances and electronics

Renovation is the perfect time to assess and address electrical risks and hazards. Protect your home against surges by upgrading your panel board with tested electrical safety equipment.

Surge protection devices

Any overvoltage in the power network can destroy appliances and electronics. With our surge protectors, your equipment is better protected against damage.

Power strip surge arresters

Plug your equipment into this surge arrester to defend against surges. For even greater protection and reliability, combine it with a surge protection device in your panel board.

# Give your home a whole new look

There's more to a makeover than choosing the right paint and curtain – don't forget the details. Discover a huge variety of switch and outlet finishes, so it's easy to find the perfect color, shape, and material to complete your interiors. Create a stunning "after" effect and bring the home of your dreams to life.

Odace

Manufactured from high-quality materials, with reliability and safety in mind, the Odace range is designed to complement practically any interior style, taste, or creative concept.

Merten System M

Intelligent and beautiful, Merten switches give you a greater comfort of use, and come in a multitude of designs that fit any taste and style.

Exxact

With a wide palette of designs, colors, materials, and functionalities, the Exxact range is perfect for upgrades and modifications.

Lisse

Designed with great attention to detail, Lisse accessories have curves in all the right places. With the smooth lines of the Lisse range, you can add an understated elegance to modern interiors.

Orion

Match your switches to your lifestyle with this modular range, featuring almost 600 different products. From classical switches and outlets to electronic inserts, dimmers, and multimedia outlets, we've got what you're looking for.

# Add your own unique style

Give your home a feel that's uniquely *you* with customizable finishings. Choose from our wide selection of colors and patterns, or fashion your own design to bring a truly individual touch to your home.

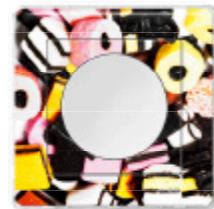

## Merten System M

Switches that you can personalize and decorate yourself: add a favorite photo or even something you've painted yourself. The motifs can be easily changed as often as you want.

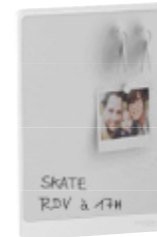

## Exxact

Discover endless design options with the Exxact range's transparent frames. Easily create your personal design using our Mix & Match web tool.

## Resi9 panel board

Turn your panel board into a work of art. Customize the new Resi9 panel board with attractive patterns for its magnetic front door.

## Odace You

With the Odace You range, switches become decorative elements in their own right. Choose your pattern, customize the switch, and make your home more... "You"!

# Upgrade to five-star comfort

There's more to a home than ambience. Make it truly comfortable by adding ingenious functions that enrich and simplify your everyday life. Enjoy extra coziness and fabulous interiors.

Argus movement detector

This device from the Merten range brings light to darkness as soon as it detects movement. Fit for both indoor and outdoor applications, Argus detectors combine intelligent technology with distinctive design.

Odace presence detector

Keep forgetting to turn your lights off? Let the Odace presence detector save energy for you.

Odace dimmer

Discover new shades of light with the Odace dimmer. Creating the perfect atmosphere for every occasion, has never been so easy.

Odace Practic

Small, ingenious accessories can bring a big improvement to everyday life. Charging your phone has never been more convenient!

# Add warmth to your place

Make your home smarter as well as more comfortable. With Schneider Electric heating control solutions, you don't have to worry about keeping your home temperature at the optimal level. Use smart control to create a perfect home environment and enjoy a relaxing atmosphere.

Wiser Air

Control both your comfort and energy consumption with Wiser Air, a state-of-the-art thermostat and a home energy management solution rolled into one.

Odace thermostat

Set and maintain the perfect temperature at home with our programmable Odace thermostat, which combines advanced functionalities with a sleek, modern design.

Exxact thermostat

Manage your home temperature in style with the customizable Exxact thermostat, suitable for both flush and surface installation.

# Give your DIY projects a step up

There are few things as satisfying as completing a successful renovation project on your own, especially when your guests keep asking for your contractor's phone number. With handy, reliable tools and easy-to-install products, you can pull off a major home transformation just by yourself. Renovate faster and with greater ease, and enjoy greater satisfaction every day.

## Cable reel

Don't let the location of power outlets limit your work. Use this reliable, robust cable reel to plug in your equipment anywhere you need it.

## Electrical tester

With our electrical tester, your electrical work and your home will be better protected.

## Work lamp

A robust, double-insulated lamp with an oil- and acid-resistant neoprene cable for indoor and outdoor use. You can make it stand, hang, or lie to shed more light on your renovation project.

## 7 tips for greater electrical safety at home

1. Ensure that all plugs and sockets are undamaged and all cables and cords are in good condition.
2. Never overload an extension cord by plugging in appliances that together will exceed its maximum current rating.
3. Only use one extension cord per socket and never plug an extension cord into another extension cord.
4. In the bathroom, make sure all light fittings that are not enclosed are out of reach of someone using, or still wet from using, the bath or shower.
5. In the kitchen, don't let cords from kettles, toasters or other appliances trail across your stovetop.
6. Choose only competent people with knowledge, skills, and experience to carry out electrical work in your home.
7. When doing DIY work, locate cables in your walls before drilling, nailing, or screwing to avoid the risk of electric shock.
