

TeSys GV4

The result of 90 years of motor circuit breaker engineering and innovation.

The smartest choice for panel builders, OEMs, and consulting engineers.

From Schneider Electric™ the global specialist in energy management and automation.

Made to meet your needs.

- Simplicity – less commercial references to order.
- Reliability – 90-year history of circuit breaker engineering.
- Efficiency – space-saving design, quick and easy to install.
- Safety – creep compensation to maintain safe power connection.
- Innovation – smart phone access facilitate maintenance on-site.

Tough and reliable motor protection.

TeSys™ GV4 Motor Circuit Breakers.
Digital Intelligence. Robust Performance.

schneider-electric.com/tesys

A full range of motor circuit breakers from magnetic to advanced protections.

The TeSys GV4 Motor Circuit Breaker line, with its wider settings and fewer commercial references, is simple to select. It's engineered to perform in the harshest environments, such as wastewater treatment facilities, refineries, cement plants, crane hoisting machines and similar challenging applications. With its full set of special features and advanced functions, TeSys GV4 provides motor protection that's smart, reliable and tough.

- Motor circuit breakers with electronic capabilities up to 115A/55kW.
- Advanced protections: ground fault, jam, long start
- Pre-alarms and automatic reset.
- EverLink™ power connector.
- Smart, externally visible auxiliaries.
- Ergonomic rotary handles: direct, extended and side

Ensure continuous operation under even the toughest conditions.

Start smart.

Ergonomic rotary handles ensure quick and simple installation.

Run smart.

Patented creep compensation maintains safe and reliable power connection.

Stay smart.

Smartphone and NFC allow easy commissioning and maintenance.
