… provide an entire solution for comfort and energy metering

The Wiser for KNX and spaceLYnk interface allows to control all building functions via one interface only – whether from a local or mobile device.

It provides a clearly structured over view of all functions, scenes, settings, and values. Plain icons and interactive floor plans guarantee intuitive

orientation and convenient operation. Easy access to the camera and the scheduler function provide safety and outstanding comfort.

Headline headline

Both logic controllers are able to display the measurements of energy consumption and record data on a daily, monthly and yearly basis.

This allows to identify energy saving potentials and thus increase the energy efficiency of a building.

Grow your business in home and building automation and …

Schneider Electric offers two new logic controllers for home and building automation, connecting different standards and protocols to increase comfort and allow energy monitoring. Each is optimised for a certain building type:

Wiser for KNX and spaceLYnk are ready to communicate with several protocols

Headline headline

Thanks to the customisable and comfortable user interface of both logic controllers you can offer a full solution with a competitive advantage.

Win new customers and generate more business in home and building automation with Wiser for KNX and spaceLYnk.
Wiser for KNX
Home automation

Wiser for KNX is the perfect choice for houses, collective homes and flats. With 150 BACnet points it is perfectly suitable for an integration in a large building management system of the complete residential building.

Wiser for KNX connects KNX systems and Modbus meters, which conveniently allows control of building functions like lights, shutters and heating and enables energy monitoring with record data on a daily, monthly and yearly basis. Wiser for KNX enables to create advanced logic functions in order to opti-mize energy efficiency and comfort at home.

Wiser for KNX
is perfectly set for
residential buildings

New functions

- Modbus templates
- Bloc functions
- Function Block Editor
- User administrations

spaceLYnk
Building automation

In buildings spaceLYnk provides the ideal solution. Thanks to 500 BACnet points spaceLYnk can easily be integrated into complete building management systems.

spaceLYnk allows efficient facility management thanks to the convenient web-based user interface with mainte nace information like lamp statuses and easy scheduling of all building functions. The webbased interface is accessible from everywhere, enabling remote maintenance.

spaceLYnk
is perfectly set for
commercial buildings

New functions

- Modbus templates
- Bloc functions
- Function Block Editor
- Modbus IP integration
- Application notes
- User administration
- BTL Certification
- Modbus certification

IP connection
for communication in BACnet (server), Modbus, KNX and web services,
access to web server to configure and display user interface; IP camera connection

| 150 points | **BACnet** | 500 points |

USB port
(3G modem, etc.)

Modbus serial port
links to any devices(Smartlink, IEM, PM, ie.)

| 10 devices | **Modbus devices** That can be connected simultaneously | 31 devices |

KNX connection
for communication with KNX products

| 8 users | **Number of Users** | 50 users |

RS232 connection
to control music players, video projectors, etc.

| Not available | **IP/TP KNX filtering** Quick IP/TP KNX filtering on object tab | Available |

A high innovative market requires up-to-date solutions

To meet increasing customers' requirements, spaceLYnk and Wiser for KNX is beeing continuously updated. The latest software version provide new useful functions for you and your customers.

Easy installation and configuration

Installation
The installation of Wiser for KNX and spaceLYnk is easy and efficient. They have a compact, ergonomic size and are mounted on DIN rail. No screws are needed for wiring and pre-programming is possible, which saves working time on site.

Configuration
The web-based configurator offers two different levels of programming: the basic and the advanced mode can be selected depending on the needs and required functions.
