Extend the life of your modular UPS

As your critical infrastructure ages, it is exposed to more risk and unexpected issues or downtime due to the wearing of components. An important part of the product services life cycle is to understand your available options. This will help ensure you are maintaining your critical infrastructure while also maximizing your investment.

EcoFit™ Life Extension for UPS

EcoFit™ Life Extension Advanced for UPS formerly known as Modular Power Revitalization Service (MPRS) is an affordable service approach designed to help extend the reliable life of a modular uninterruptible power supply (UPS).

EcoFit™ Life Extension Advanced for UPS renews the internal components of a UPS at a more favorable price point than replacing each component individually.

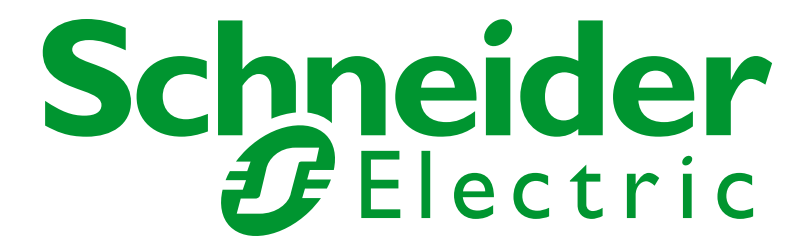

Three benefits of EcoFit™ Life Extension Advanced for UPS

1. Help reduce the total cost of ownership through upgrades and proactive replacement of parts.
2. Gain peace of mind knowing your aging infrastructure is maintained as per manufacturer's specifications.
3. Help reduce downtime and service calls with proactive approach of replacement of wearing components.

EcoFit™ Life Extension for UPS includes:

- New core components such as power module, fans, network card, and display
- Labor to remove/recycle old components and install new OEM components as well as start-up
- Customized Service Plan & Asset Monitoring
