Make the most of the local generation (Photovoltaic, Battery, etc.) to cut on the energy bills

Peace of Mind

Best-in-class technology with local support from your preferred partner

How Microgrids can help to keep your business ON

As a leader in energy management technologies, Schneider Electric provides a full solution for helping to control your Microgrid: a touchscreen integrated cabinet with advanced management of the Distributed Energy Resources (photovoltaic, electric vehicles, batteries) and software-as-a-service for your site's energy performance.

Stay open when your customer needs you the most

"During CA blackout, not only did we lose valuable inventory, but as well customers wanting to buy food and other supplies. Hence, I want my infrastructure to be future-ready." – Supermarket owner

"The average grocery store stocks **\$367,943** in refrigerated inventory"

Help to optimize your energy profile to **reduce bills**

Facilitate guest-comfort with the best eco-friendly practices

"Being a part of the ever-growing industry, I want to contribute towards environmentally conscious hotels with eco-friendly best practices." – Hotel business owner

"One hotel alone manages to reduce night consumption by **32%** in four months"

Gear up your infrastructure for Electric Vehicles

"Having frequent operational peaks, I urge to turn my demand charges into monthly bill savings by knowing when and how the energy can be used at once." – Retail business owner

"Peak demand charges can account for minimum **30%** of your electric bill"

Shield your business from unexpected outages

Contribute towards **Sustainable Future**
