Schneider Electric in a few words

Schneider's purpose is to empower all to make the most of our energy and resources, bridging progress and sustainability for all. We call this Life Is On. Our mission is to be your digital partner for Sustainability and Efficiency.

We are leaders and pioneers in the field of energy management, as we are constantly developing innovative solutions to create more efficient and sustainable systems based on our long field-proven experience. Our mission is to be your digital partner for sustainability and efficiency, keeping in mind your need to deliver quality projects on time.

We drive digital transformation by integrating the world's leading process and energy technologies, end-point to cloud, connecting products, controls, software and services across the entire lifecycle, enabling integrated enterprise management.

Because we always want to be close to our customers and partners, we are constantly expanding and training partners around the world. This makes us the most local of the global companies

We drive digital transformation by integrating world-leading process and energy technologies, end-point to cloud connecting products, controls, software and services, across the entire lifecycle, enabling integrated company management, for homes, buildings, data centers, infrastructure, and industries.

We are the most local of global companies. We are advocates of open standards and partnership ecosystems that are passionate about our shared Meaningful Purpose, Inclusive and Empowered values.

Electrical distribution architecture in a building

As the global specialist in energy management and automation, we help contractors stay up to date with the swift evolution of markets, technologies, and knowledge. We provide solutions that are IoT-enabled, plug-and-play, open, inter-operable architectures and platforms, in buildings of all kinds.

Typical characteristics of a building

- | | | |
|--|---|--|
| Environment <ul style="list-style-type: none">• Room controllers• Network configuration• HVAC• Lighting• Emergency Lighting | Alternative power supplies <ul style="list-style-type: none">• One or more decentralized gensets• 1-phase and/or 3- phase UPS to maintain critical loads supply | Green alternatives <ul style="list-style-type: none">• Solar PV• Electric Vehicle Charging infrastructure• Home & Building Automation |
|--|---|--|

Building specificity

Beyond just connecting infrastructure to an energy source, our power solutions play a vital role in establishing sustainable and efficient buildings. Through our cutting-edge technology and innovative designs, we offer reliable, efficient, and sustainable options that elevate architectural capabilities. With our IoT-enabled systems, our power solutions can be monitored and managed remotely worldwide, resulting in decreased on-site intervention and access to preventive maintenance services that ensure optimal system functionality. Our approach also prioritizes sustainable building practices and advanced architecture, providing increased value to your project. Instead of relying on diesel or gas generators for critical and emergency loads, we offer a more efficient and sustainable alternative for alternate power sources.

What buildings need

There are five primary infrastructures in buildings: Mechanical, Electrical, Information and Communications Technology, Security, and Services. Each division of infrastructure functions to bind the physical environment to precise outcomes; to provide safe, connected, efficient, sustainable, and reliable environments for occupant quality; and to ensure the financial viability of the organization. This is what we call EcoStruxure™.

Schneider Electric can help you to optimize a global architecture solution for buildings

- Configuration tools for quick and optimized quotation
- Getting the best quality product for the budget
- Quick installation systems and easier commissioning
- Easy to maintain equipment and added-value services
- Training on innovations that work and informed of market evolutions.

Overview

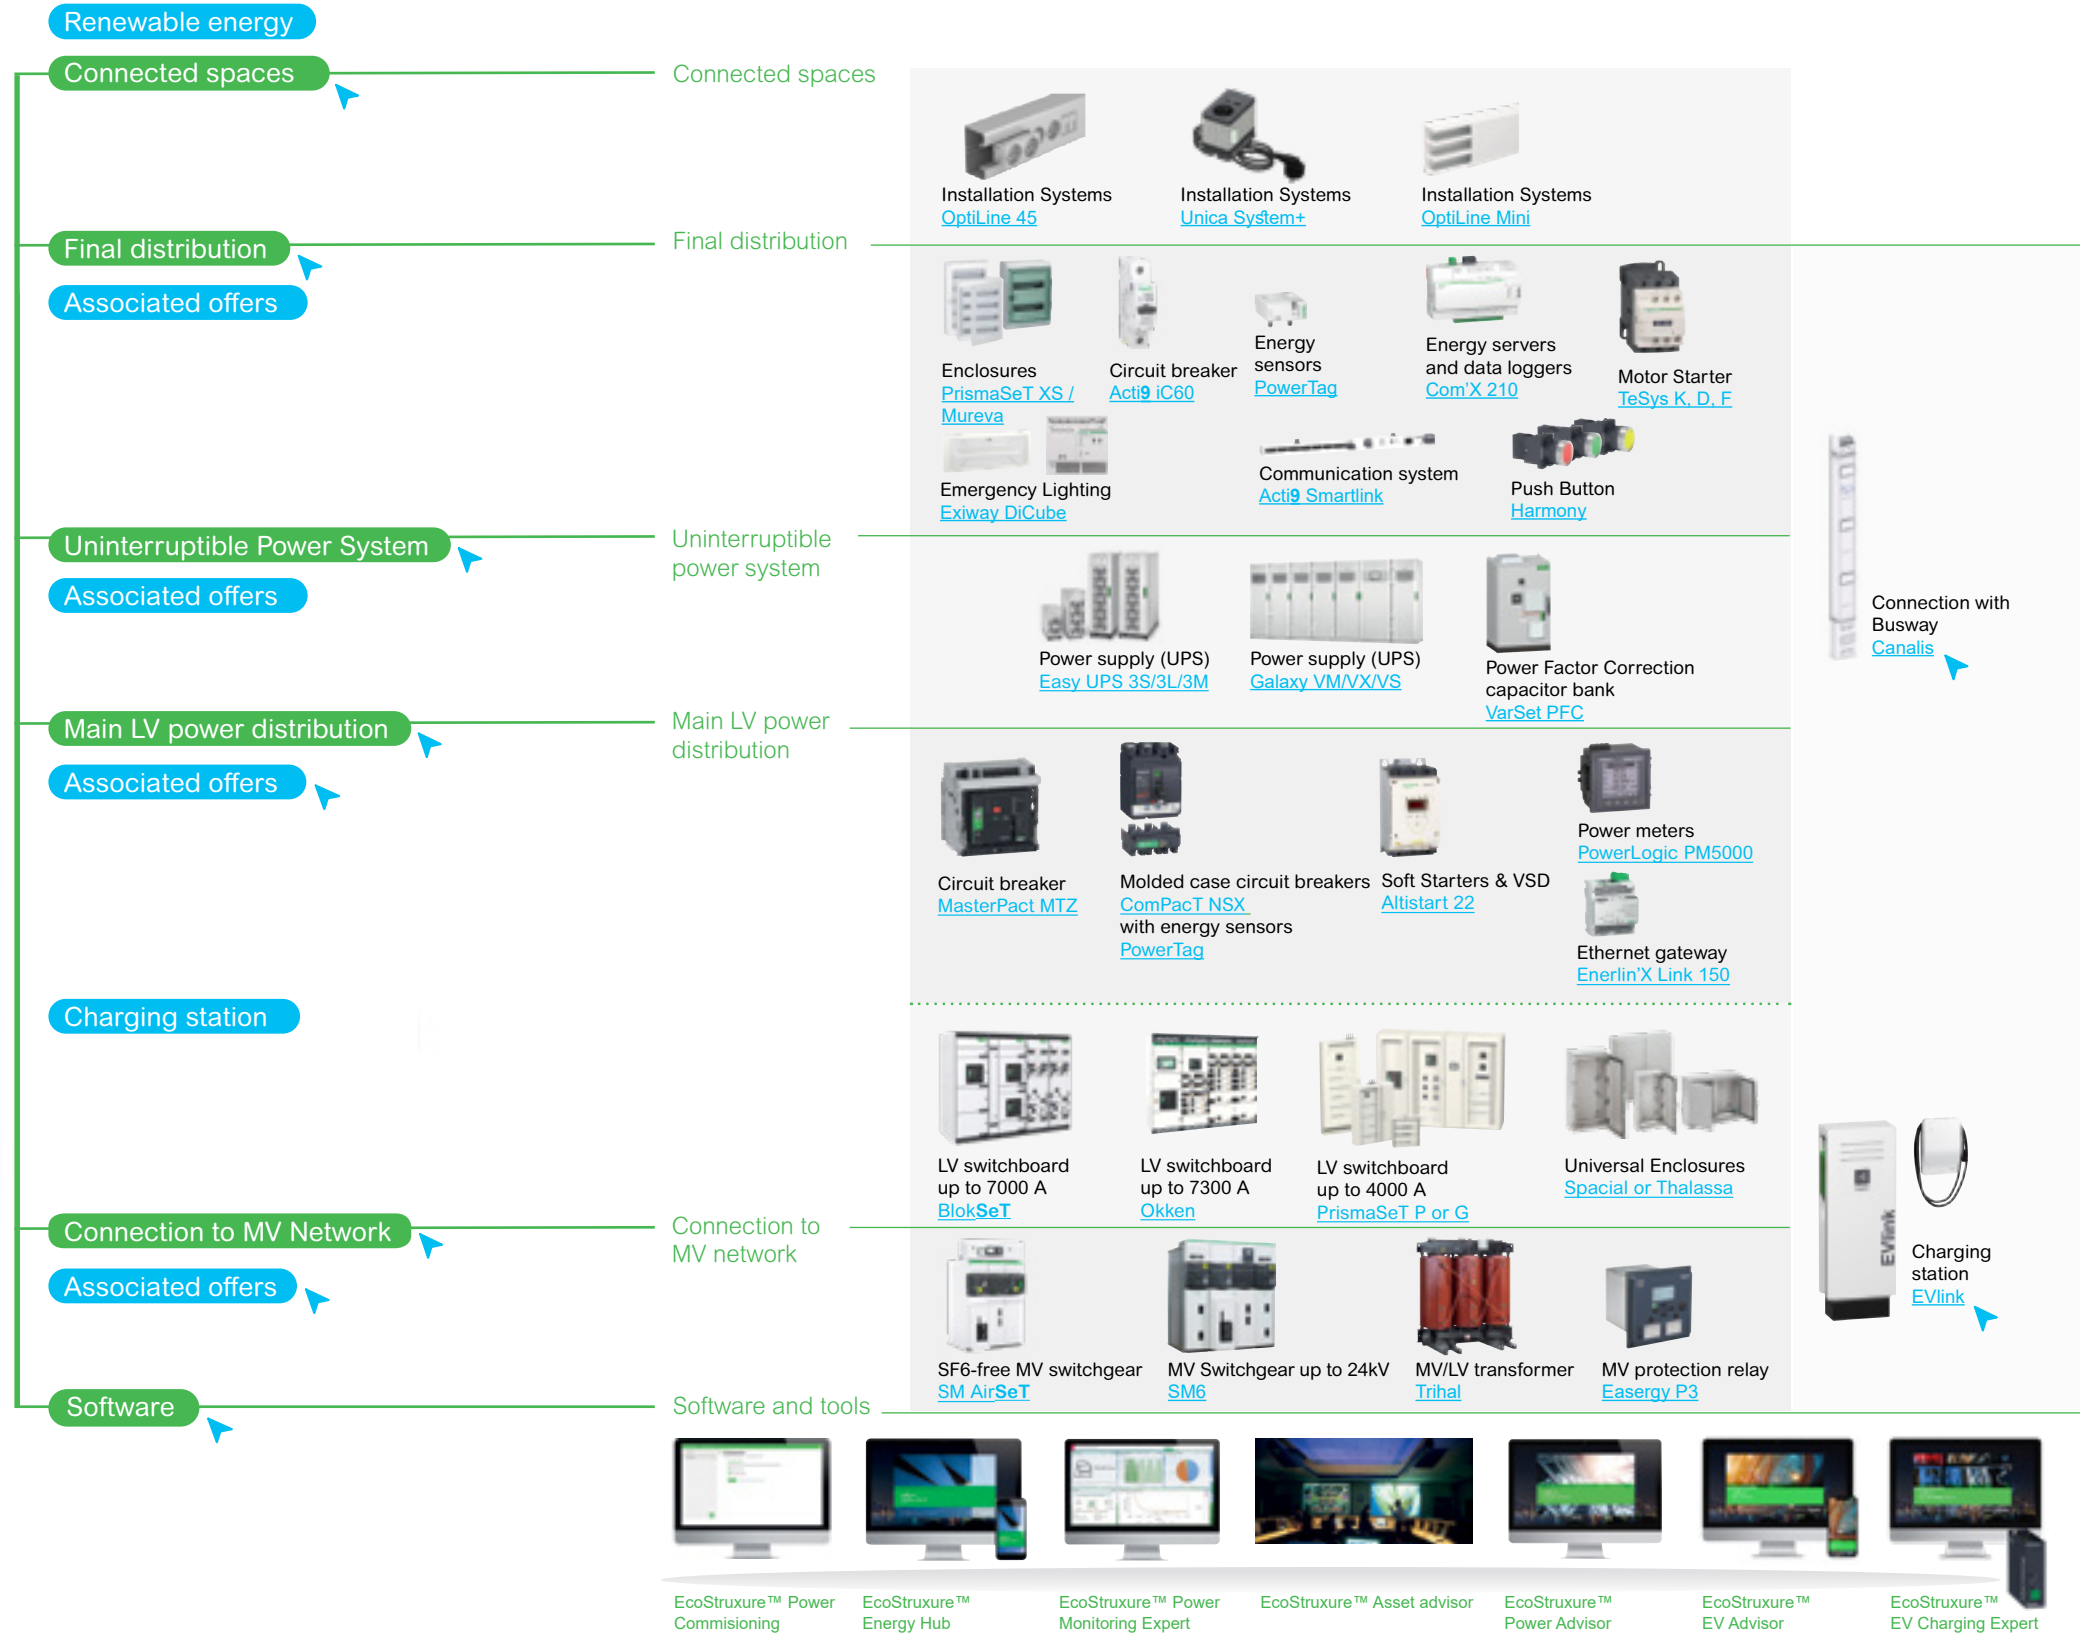

A complete solution of power distribution management

Electrical installations shall comply with more than one set of regulations, issued by National Authorities or by recognized private bodies. Schneider Electric™ complies with these constraints with IEC standards on all the product (from design to installation).

How To Use
EcoStruxure Power
Device App

SF₆-free Modular Air-Insulated MV Switchboard up to 24kV

Part of SeT Series

Green and digital modular AIS MV switchgear for secondary distribution networks and installations in commercial and industrial buildings sectors and utilities.

Characteristics

- SM AirSeT combines pure air for insulation and vacuum technology for arc interruption. Innovative Shunt Vacuum Interruption (SVI)™ is used for breaking without use of alternative gases, and producing no toxic by-products
- Rated current 630 and 1250 A
- Short-circuit current up to 25 kA
- Internal arc classification:
Basic A-FL: 12.5 kA 1s
Advanced A-FL(R): 12.5 kA 1s, 16 kA 1s, 20 kA 1s

Functions:

Switch, Switch-fuse, Circuit breaker, Riser, MV metering and measurement, Nearby control, Thermal monitoring, Environmental monitoring, Circuit breaker monitoring, partial discharge monitoring, QR codes, Internal arc detection, LPVT

Connectivity:

SM AirSeT also boasts other powerful digital capabilities extending beyond local visibility and maintenance.

[Now switched to PowerLogic P3](#)

SM AirSeT is easy to adopt. It retains the benefits valued by customers in former SF₆ equipment: identical compact physical footprint, 3-position switch, transformer protection via switch-fuse unit. By being compact, flexible, and easy to install and operate, the SM AirSeT helps to avoid changes to installations and working practices.

ASSOCIATED OFFERS

Easergy TH110

Battery free and wireless sensors perform the continuous thermal monitoring of all the critical connections made on field like:

- Cable connections
- Bus bar connections
- Withdrawable CB connections

It also allows the monitoring of any power connections of indoor installation like MV Transformers connections or LV Switchgears.

[More information on se.com](#)

Magelis

Easy to install, to set up and to operate, Schneider Electric's Human Machine Interfaces (HMI) provide a simple and effective means of connecting systems, collecting data and presenting information in a meaningful format.

[More information on se.com](#)

PowerLogic™ P3

Easy-to-use protective relays for Medium Voltage applications designed for unparalleled efficiency and greater connectivity.

From overcurrent to advanced protection, with Arc detection and Ethernet communication including IEC 61850.

SM6

IEC standard

Modular switchboard up to 24 kV Part of **SeT** series

An Air-Insulated modular switchboard that guarantees protection hi-reliability for your underground secondary distribution, flexible and easy to install and operate.

Characteristics

- Containing fixed or withdrawable circuit breaker, using vacuum breaking technology, switch-disconnector and contactor
- Rated current 400, 630 and 1250 A
- Short-circuit current up to 25 kA
- Internal arc withstand:
12.5 kA/1s and 16 kA/1s ,IAC: A-FL and A-FLR.
Additional internal arc withstand for 20 kA/1s, IAC A-FL and A-FLR upwards exhaust.

Functions

Circuit breakers, Fuse-switch, Metering, Switch

Connectivity

Thermal sensor TH110, Easergy Thermal App, QR Code, Easergy P3.

EcoStruxure™ Ready Distribution Transformers

EcoStruxure Ready distribution transformers

Cast resin distribution transformer up to 20 MVA 36 kV Part of **SeT** Series

Safer and environmental friendly solution for Medium Voltage and Electrical Distribution networks

Characteristics

- Rated power from 100 kVA to 20 MVA
- Rated insulation level up to 36 kV
- Rated frequency: 50 or 60 Hz
- MV windings encapsulated in cast resin
- Pre-impregnated LV windings
- Thermal insulation Class F
- Certification E4 ,C4 F1 as per IEC 76-2018 (new version)
- Deep temperature storage up to -50°C
- Resistance to high level of humidity > 95 %
- Naturally cooled (AN) or air forced (AF) on request
- Indoor installation or outdoor on request (with enclosure)
- Enclosure with protection up to IP44

Connectivity

Thermal sensor TH110, Thermal App.

[Learn more about this connected solution](#)

Options:

- For demanding application in EV Charging and Datacenters
- Enhanced reliability and safety for buildings and infrastructures
- Self-extinguishing dry type transformer to reduce fire risks
- High performance in severe and harsh ambient conditions, humidity and pollution
- Extended lifespan due to quality design with low partial discharge <5pc

IEC standard

Suitable for fire hazards (Self-extinguishing)
Totally insensitive to harsh environments (pollution or condensation)
Easy and quick to install with a minimum maintenance

ASSOCIATED OFFERS

PowerLogic

Battery free and wireless sensors perform the continuous thermal monitoring of all the critical connections. It also allows the monitoring of any power connections of indoor installation like MV Transformers connections or LV Switchgears.

Reliable
Durable low voltage switchboards that deliver intelligent power distribution and motor control.

Versatile

BlokSeT

IEC standard

[Product references](#)

Watch

High dependability low voltage switchboards for power distribution and motor control
Part of **SeT** Series

Description

- High performance
- Power feeder up to 6300 A
 - Motor control up to 250 kW
 - Main busbar up to 7000 A
 - Rated voltage up to 690 V
- iPMCC by BlokSeT, the smart and advanced TVDA solutions
- Optimize motor performance, energy efficiency, and fault prevention
 - Local/ remote real-time access, and automatic restarting

Compliance and certification

- Type tested as per IEC 61439-1 and -2

Protection and safety

- Isolated live parts up to IPxxD
- Thermal monitoring
- Type 2 coordination

Internal arc protection

- Compliant as per IEC TR 61641 edition 3, up to 100 kA / 0.4 s

Reliability in harsh environments

- Protection degrees up to IP54
- SO₂/H₂S resistant versions
- 2G resistant versions

Optimized architecture and footprint

- Compatibility with medium voltage equipment and Canalis power busways
- Rear/ front access, top/ bottom connection, double-front access
- Withdrawable, disconnectable, and fixed functional units
- Linergy horizontal and vertical busbars.

BlokSeT switchboard solutions contribute to:

- Safety of persons, as well as reliability and continuity of service of the electrical installation
- Return on investment by helping make electrical networks reliable, while improving energy efficiency
- Performance and intelligence for safety, reliability, and energy efficiency.
- Worldwide services and localized support: training, maintenance, troubleshooting, etc.
- Green Premium™ equipment

Main LV power distribution

Power distribution switchboard up to 630 A

Optimized and upgradeable

With this complete, prefabricated, and tested system, it's easy to upgrade your installation and still maintain performance levels.

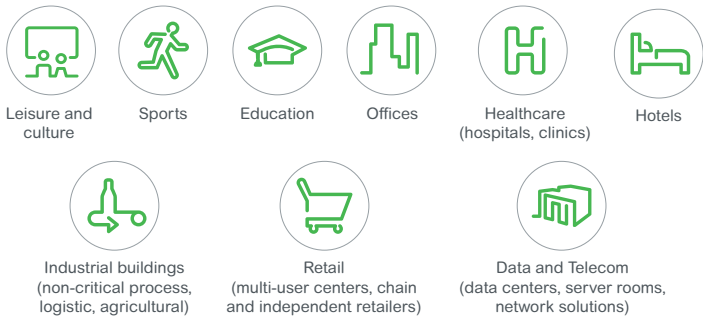

- > The wall-mounted and floor-standing enclosures combine easily with switchboards already in service.
- > Devices can be replaced or added at any time.

Efficient installation and connection work on-site: easy connection on-site, whatever the cable cross-section or installation location.

Easy maintenance throughout the switchboard: easy and direct access to devices, in a switchboard in service.

Commercial and industrial buildings
Low voltage distribution and control switchboards for commercial and industrial buildings.

PrismaSeT G Active

IEC standard

Power distribution for wall-mounted or floor-standing switchboards up to 630 A
Part of **SeT Series**

Description

PrismaSeT Active is the newest generation of low-voltage switchboards, natively cloud connected. This revolutionary approach lets panel builders and electrical contractors give a voice to power distribution across commercial buildings. Commissioning is made faster, before smart alarms help optimize maintenance and improve uptime.

Characteristics

PrismaSeT G: electrical distribution switchboard solutions, IEC 61439-1&2 compliant, sold in kit form.

Wall-mounted and floor-standing enclosures for electrical switchboards up to 630 A, Isc 50 kA

Seismic performances: 2.5 g without additional accessories (IEC 60068-2-57 standard), ensuring that the switchboard will continue operating as intended even in severe earthquake conditions.

Specifications:

- Metal enclosures: steel metal sheet with electrophoresis treatment and hot-polymerized polyester epoxy powder coating
- Color white RAL 9003
- Degree of protection IP30 to IP4X and IP55
- Degree of protection against mechanical impacts: from IK07 to IK10

With PrismaSeT G you can be sure to build efficiently:

- All components (switchgear, distribution blocks, prefabricated connections, etc.) are rated and coordinated to work together;
- All switchboard configurations, even the most demanding ones have been tested for quality. You can prove that your switchboard meets the current standards, at any time. You can be sure to build a reliable electrical installation and give your customers full satisfaction in terms of dependability and reliability for people.
- PrismaSeT G with its discreet design, blends harmoniously into all tertiary buildings, including in entrance halls and passageways.
- PrismaSeT G can be upgraded easily at any time while keeping its original performances, thanks to prefabricated and modular design.

Spacial enclosures SBM - S3D/CRN - SF/SM

IEC standard

Wall-Mounting

S3D & CRN
The steel enclosure with the greatest range of available dimensions on the market!

Useful life
Quality of the welding and the painting.

Component security

- Water and dust tightness and impact resistance.
- EMC and ATEX offer.

Increased choice

- Large range of universal dimensions.
- Application offer with special dimensions.

Easy maintenance

- Removable hinges.
- 1 lock system from the height of 600 mm.
- 3-point lock from the height of 600 mm.

Personnel safety

- Earthing studs welded to the body and door.

Industrial Box

SBM
Simplicity, ergonomics, and versatility, it's all in the box.

Ergonomics

- Cover opening and accessory mounting with just a screwdriver.

Sturdy and good ingress protection

- Mechanical protection rating up to IK10.
- Ingress protection rating up to IP66.

Modularity

- 28 sizes available.

Floor-Standing

SF

Adapts to all your needs. Assembled delivery for a ready-to-use solution.

SM

Multi-purpose IP55 compact steel enclosure for fast and simple solutions.

Practical

- Door rails, which can be height-adjustable and used for fixing cables.
- Can be installed adaptation profile in the front and rear of the enclosure and the universal 40-mm cross rail (1 row) in the rear provides the same fixing points as the modular enclosure.

Protection

- IP guaranteed by the rigidity of the enclosure, the expanded-polyurethane sealing gasket of the enclosure and the subsequent welding.
- Double-door enclosures with inner lock on the left door.

Comfort

- Handle with sturdy design for easily activating the locking system, allowing the installation of any shape insert and any cylindrical combination key.
- Easily interchangeable insert with one click.

Fast

- The double system of cut-outs on the structure allows most accessories to be installed using self-tapping TORX T30 M6 screws or nuts.
- Clip-on quick-fixing cross rails, fixed with self-tapping screws.
- Door installation inserting the captive pins of the hinge in their housing in the door.

Main LV power distribution

Universal enclosures for outdoor applications

Enabled plus

Whether the equipment you want to protect is exposed to direct sunlight, rain, saline mist, extreme temperatures, or chemicals. Thalassa enclosures are the best option.

Full insulation improves people's safety not only in the industry but also in streets, parks, and other public places accessible to people.

Polyester is equally impressive in any indoor environment where electric and electronic components are constantly exposed to dust, oils, splash, or impacts.

Compliance with international standards and certifications

Product references

Thalassa enclosures TBS/TBP - PLS - PLM - PLA

IEC standard

Insulating industrial boxes:

TBS/TBP

- ABS for conventional applications (IK07) with the usual constraints,
- Polycarbonate for enhanced impact resistance (IK08) and for outdoor applications or applications directly exposed to UV,
- Polycarbonate certified UL,
- IP66 rating for all ranges,
- Protection against electrical impacts Class II.

Useful life
Quality of the welding and the painting.

Component security
• Water and dust tightness and impact resistance.

Increased choice
• Large range of universal dimensions.
• Application offer with special dimensions.

PLS boxes:

PLS
Polyester body with 5 options of covers (in polycarbonate or polyester).

Modular
The dimensions of the sides, multiples of 9 cm, allow the creation of assemblies.

Protection
• IP66.
• Gasket between body and cover.
• IK09.
• Insulation Class II.

Easy
Bosses with inserts, at the rear of the body, for fixing plates or various supports.

Monobloc wall-mounting enclosure:

PLM

- Made of polyester reinforced with fiberglass, molded by hot compression.
- Degree of protection IP66,
- Impact resistant IK 10 for plain doors and IK 08 for glazed doors. Able to machine with no corrosion
- UL certification and NEMA classification 4x and 13 for the polyester wall-mounting enclosures,
- Total insulation to produce class II units,
- Complies with RoHS and REACH Directives

Floor-standing enclosure:

PLA

The floor-standing enclosures are made from polyester reinforced with fiberglass, moulded by hot compression. High resistance to corrosion in harsh environments, it maintains its mechanical and insulation properties.

PLAT version

Ventilation
Open top part with canopy allowing for ventilation.

PLAZ version

Open bottom
Big open bottom to be mounted directly on the floor or on a plinth.

PLAZT version

Easy
Door opening to 180°.

Service life
High resistance to corrosion in harsh environments, maintaining its mechanical properties and insulation.

Easy
Door easily reversible by turning it over.
• Opening to 120° or 180°.
• Easy machining with no corrosion.
• Lightness.
• Polyamide hinge pin, easily removable and captive.

Smart
• Notches for easy fixing of DIN rails.
• Grid pattern on the rear of the door for marking the machining operations.

Uninterruptible power system

Easy UPS series

Enabled plus

- Easy loop test**
Verifies UPS performance before you connect your load, without the need for a load bank
- Easy to install fast**
Quickly roll the compact and lightweight UPS into position
- Intuitive user interface**
The intuitive graphical user interface allows for easy system configuration
- ECO mode**
Operating mode that by-passes unused electrical components in good power conditions to achieve high operating efficiency without sacrificing protection
- Front-access servicing**
Simplifies installation and UPS maintenance while minimizing space requirements.
- Straightforward installation**
Including the input, output, and bypass breakers, as well as the Emergency Power Off (EPO) switch, simplifies installation planning and speeds up deployment.

CONVENIENCE

PROTECTION

- Optional SNMP card**
When you purchase the SNMP card, you can monitor and manage UPS status remotely through the UPS Web interface or through EcoStruxure IT's cloud-based and on-premise software suites.
[More information.](#)
- Replaceable dust filters**
Protect the UPS in harsh environments.
- Parallel capability**
Multiple units can be placed in parallel to meet power capacity and redundancy requirements.
- Wide input voltage window**
Saves your battery power for when you really need it - during power cuts!

Easy UPS 3S/3M/3L

Product references

10 to 600 kVA 3 phase UPS for small and medium data centers and other business critical applications
Part of Easy Series

Description
3 phase Uninterruptible Power System. Designed for fast and easy installation, this EcoStruxure-ready UPS features a wide operating temperature window and strong overload protection, all in a compact and lightweight footprint.

- Characteristics**
- Normal AC supply input**
- 10 to 40 kVA (Internal or External batteries)
 - 3:1 (10 to 30 kVA) 3:3 (10 to 600 kVA)
 - Input voltage (V): 380 / 400 / 415 V (Three-phase + Neutral)
 - Frequency (Hz): 45 – 65 Hz
 - Input power factor: >0.99
 - THDI:
 - linear load,
 - 5% non-linear load

- Output**
- Nominal output voltage (V):
 - 3:1 – 220 / 230 / 240 V
 - 3:3 – 380 / 400 / 415 V
 - Efficiency: Double conversion mode up to 96%
 - Efficiency: ECO mode up to 99%
 - Overload capacity in normal operation 130% for 10 minutes and 130-150% for one minute
 - Output voltage tolerance ±1%

Connectivity
Communication interface RS232, RS485, USB, dry contact, Modbus TCP/IP, optional network card
Control panel Multi-function LCD, status and display console.

- Easy to install and start up**
- Rolls into position quickly and easily
 - Minimal footprint requirement with lightweight, compact form factor
 - Straightforward installation
 - Input, output, and bypass breakers are included
 - Emergency Power Off (EPO) switch is included
 - Easy Loop test verifies UPS performance before you connect your load, without the need for a load bank
 - Aesthetic design blends well into your installation environment

ASSOCIATED OFFERS

- Easy UPS BVS (1 Phase)**

Easy UPS 1 Ph BVS Series provides basic power protection for unstable power conditions, ensuring consistent and reliable power at the most critical moments.

Galaxy™ V series

✓
Well suited
for a wide
range of
applications

- Edge, small, and medium data centers, and computer rooms
- Manufacturing facilities
- Telecommunication
- Commercial buildings
- Healthcare
- Transportation

New patented hybrid technology

Provides up to 97% efficiency in double conversion mode.
Electricity savings in full protection mode at every load level.

Compact design, optimized footprint

High-density technology and full front access make Galaxy VS a footprint saver well suited for confined spaces.

Battery flexibility, including Lithium-ion batteries*

Increase availability and reduce TCO with long-life, intelligent energy storage.

99% efficient in patented EConversion™ mode

Recover your initial investment within two-three years through energy savings.**

Maximum availability thanks to modular architecture

Critical system components built as modules for faster serviceability and fault tolerance. N+1 redundancy and scalability options available.

EcoStruxure IT

Anytime, anywhere monitoring and service support via smartphone app*.

10 to 1500 kVA 3 phase UPS
for small and medium data centers
and other business critical
applications
Part of Galaxy V Series

Description

3 phase Uninterruptible Power System. Designed for fast and easy installation, this EcoStruxure-ready UPS features a wide operating temperature window and strong overload protection, all in a compact and lightweight footprint.

Characteristics

Normal AC supply input

- 10 to 1500 kVA
- 3:3
- Input voltage (V): 380 / 400 / 415 V (Three-phase + Neutral)
- Frequency (Hz): 40 – 70 Hz
- Input power factor: >0.99
- THDI: < 3% at full linear load

Output

- Nominal output voltage (V): 3:3 – 380/400/415 V
- Efficiency: Double conversion mode up to 96%
- Efficiency: EConversion mode up to 99%
- Overload capacity in normal operation 125% for 10 minutes and 150% for one minute *
- Output voltage tolerance ±1%
- Lithium capable

Connectivity

Communication interface RS485, USB, Dry contact, Modbus TCP/IP (SNMP optional)
Five inch touchscreen LCD, status, and display console.

*under 30°C degrees

Leading performance
Robust and flexible design ideal for demanding environments at maximum performance

Reduce your energy bill
By using EConversion mode, significant savings are achieved every year on your electricity bill.

Quick to install and fits everywhere thanks to its compact design

Simple to maintain and fast to service thanks to its modular architecture

ASSOCIATED OFFERS

Smart-UPS™ On-Line

Industry-leading power factor maximizing UPS density. Rackmount and tower SRT 2.2 kVA – 10 kVA

[More information on se.com](#)

Standard features

Best-in-class power density
More real power in watts, 0.9 pf on 2.2 kVA – 5 kVA, Unity on 6 kVA – 10 kVA units.

High-efficiency "green mode"
Achieves 98 percent efficiency, which saves utility and cooling costs without compromising performance or reliability.

Intelligent battery management
Temperature-compensated charging extends life and advanced algorithms recommend replacement date. The UPS can inform user which batteries need to be replaced and auto detect when additional battery packs are added.

Built-in energy meter
Measures energy use and displays UPS efficiency in various modes of operation for easy energy tracking.

Work faster and smarter with our software and tools

Our complete suite of software and tools for contractors gives you advantages with:

- More productivity, reduce your effort and save time to bid on more projects. Keep flexibility to adapt customer-specific requirements and last minute changes.
- Always get relevant information to respond quickly to your customer's demands, differentiate through your business efficiency.
- Gain more autonomy and efficiency through smart reliable tools and product data that accelerate, simplify, and secure your projects.
- Maintain a close relationship with your customers with the support of a convenient commercial and technical supplier.
- Grow your business expertise to respond as quickly as possible with an accurate and differentiated offer in a constant evolving market.

With a single app, get all necessary information and take control of your MV and LV devices from the safest distance to ensure operations and efficient maintenance.

EcoXpert power services partner

Get recognized expertise in MV and LV connected installation and be ready to support your customers with new services.

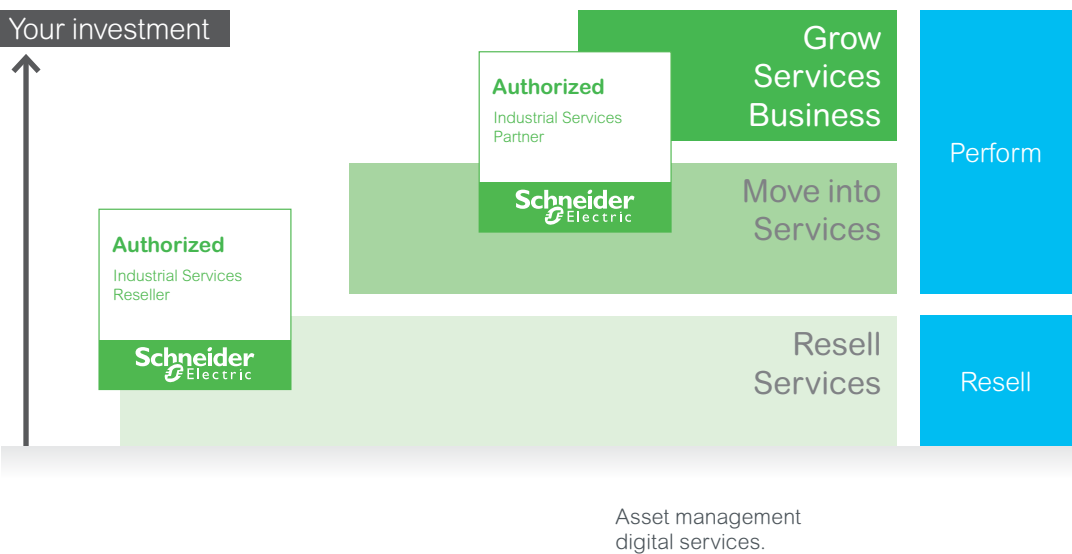

As part of our EcoXpert™ program, you are recognized by your customers as the specialist in your domain and you are regularly upskilled to service the latest MV and LV systems and connected devices. As our selected partner, you must act as an extension of the Schneider Electric sales force to promote, resell, and execute Schneider Electric Life Cycle Services to end-users and make easy and quick quotation for your customers.

You are trained to provide your customers with recommendations and best in class services to ensure long lasting life duration of the complete installation.

You are identified by your customer as a trusted advisor on how to enhance power availability and prevent unexpected failures of electrical installation.

Unlock new opportunities at your own pace with tailored partnerships and training designed for your service business success.

The OptiLine 45 and Unica Click-in System

With no adapter needed, the sockets fit flat to the trunking, creating a seamless, highly aesthetic look.

Characteristics

- Efficient mounting. Pre-punched oval holes every 25 cm and dedicated tools and fixings.
- Perfect joints. Jointing pieces for exact levelling. Joint cover piece to hide the gap.

Functions

- Perfect bends. Large tolerances. Self-guiding mounting of the bend piece.
- Pull-out safe outlets. Extra secure click-in function and front locking clip.

Connectivity

- Pre-punched slots. Allows cross-sectional feeding of cables.

DIRECT CLICK-IN INSTALLATION SYSTEM WITH 45 MM FRONT

Whether your customer is working in a small studio or a massive office building, with our workspace-dedicated portfolio you can design spaces which are fully functional, from floor to ceiling.

Wall-Mounting

Trunking, with high capacity. Made of natural anodized aluminum or PVC.

Easy accessories installation even without instructions; mounted directly when trunking is in place. Functions from Unica wide range of wiring devices.

Floor - Standing

Poles, within a radius of 1.5 meters from the ceiling connection point.

Installation systems

Modular, quick to install, and easy to rearrange, Unica System+ devices provide the flexibility and innovative design to elevate office spaces from work-ready to future-ready. Unica System+ offers any functional solutions i.e. power outlet, USB, data, multimedia socket, wireless charger.

Characteristics

- Floor sockets and floor boxes unite ease of installation, flexible functionality, and user convenience to give your customers more than they expect.
- Unica System+ desk units add convenience and connectivity, allowing people to work the way they choose.

Functions

- With Unica System+ modular units, you can create exceptionally customized office interiors.
- Unica System+ poles and posts are an ingenious solution for modern office interiors. Highly aesthetic, movable, and customizable with different functions and accessories.

Connectivity

- When space is at a premium and you have several functions to fit, Unica System+ workstations come to the rescue.

A COMPLETE SYSTEM FOR GREATER CONVENIENCE

No matter where your customer is situated – whether a one-room apartment or the top floor of a high-rise building – with Unica System+ you can enhance the work experience, from floor to ceiling.

- Floor sockets and boxes
- Stand-alone desk units
- Modular desk units

OptiLine Mini

The most comprehensive mini trunking system with a wide range of trunking dimensions and accessories.

Characteristics

- High surface finish and hidden joints. High-grade, UV-resistant materials. Accessories and joint cover pieces conceal uneven cuts.
- Pre-punched screw holes or adhesive and built-in build tolerance for adjustable corners. Three trunking sizes equipped with an integrated cable retaining function.

Functions

- IP40 and classified for single insulated wire.

The superb finish makes OptiLine Mini-trunking resistant to humidity while providing a hygienic surface that is easy to keep clean

Environment-friendly

- OptiLine Mini-trunking is available in three materials; aluminum, lead and cadmium-free PVC or halogen free plastic (PC/ABS). Accessories, like corners and end pieces, are made of halogen-free plastic (PC/ABS).

Highly impact-resistant

- All mini-trunking is highly impact-resistant, thanks to its design and generous material thickness. The aluminum version of OptiLine offers extra strong impact-resistance. In many cases, this is an ideal substitute for unattractive sheet steel protection.

Both outdoors and indoors

- Thanks to its sealed, stable design, OptiLine Minitrunking achieves the degree of protection IP40, making it suitable for installations both outdoors and indoors. The plastic as well as the aluminum trunking offer many years of resistance to UV radiation, heat and cold. The plastic trunking is also approved for single-insulated wire outdoors.

A solution to every situation

- All in all, the OptiLine Mini-trunking range includes all accessories and modules needed to create a customized solution, even when using various dimensions.

MasterPact MTZ

Circuit breakers up to 6300 A embedding advanced digital technologies
Part of PacT Series

The new worldwide benchmark for high current circuit breakers

[Product references](#)

- Optimized safety**
- Faultless protection
 - Complete selectivity and coordination (Type 1 & 2)
 - High resistance to environmental stresses
 - Integrated monitoring for energy efficiency

Building on the legendary performance and reliability of the MasterPact™ range, MasterPact MTZ circuit breakers are Future Ready. Incorporating the latest digital and communication technologies, they are key components within Schneider Electric's Smart Panels, contributing to smart operation, power uptime, and energy efficiency.

MasterPact MTZ circuit breakers connect your electrical switchboard to any building and energy management system.

A simple smart phone can act as the main HMI to monitor and control MasterPact MTZ, giving you maximum convenience and ease of management, even in the event of a power outage. The MicroLogic X control units are customizable with additional digital modules available.

The standardization of electrical switchboards remains the same with MasterPact MTZ circuit breakers keeping the same size frames, standardized auxiliaries, and accessories, providing peace of mind for choice, installation, retrofit, and operation. Flexible and easy to install and operate.

Characteristics

- Rated current: 800 to 6300 A
- Breaking capacity: 42 to 150 kA at 220 / 415 V AC
- Voltage rating: up to 1000 V AC
- 3 physical sizes:
 - MasterPact MTZ1 from 630 to 1600 A;
 - MasterPact MTZ2 from 800 to 4000 A;
 - MasterPact MTZ3 from 4000 to 6300 A
- Draw out and fixed mount
- 3 pole and 4 pole construction
- Optimized selection of 4 advanced MicroLogic X control units integrating current, voltage, power and energy metering, enabling earth leakage protection, and customizable with digital modules for advanced protection, measurement, energy management and network analysis functions
- Built-in Class 1 accuracy active power and energy measurement
- Switch disconnectors version available
- Optimized range of field-installable auxiliaries and accessories
- Different offers complying with international standards: IEC 60947, UL489, ANSI / UL1066
- CCC, EAC and other local certifications
- Compliance with specifications of marine classification companies: Bureau Veritas, Lloyd's Register of Shipping, Det Norske Veritas, etc.

DIGITAL MODULE

Micrologic™ X control units

Protection: Energy Reduction Maintenance Settings, Ground-fault alarm, Under/Over voltage protection, Under/Over frequency protection, Reverse active power protection, IDTML overcurrent protection, Directional overcurrent protection.

Measurement: Energy per phase, Individual harmonics analysis.

Maintenance & Diagnostics: Power restoration assistant, MasterPact operation assistant, Wave form capture on trip event, Modbus legacy dataset, IEC 61850 for MasterPact MTZ.

ComPacT NSX

Molded case circuit breakers up to 630 A
Part of PacT Series

The new worldwide benchmark for high current circuit breakers

[Product references](#)

Easy and efficient

- Save space, time, and effort with integrated earth leakage protection (ELCB)
- Easy to swap trip units and standardized accessories over time

Optimize safety

- Roto-active breaking technology helps to reduce early aging effects and increase operation lifespan

Measure and Communicate

- Local and remote communication with trip alarm (earth leakage, overload, short circuit) and pre-alarms (earth

ComPacT NSX is a full range of high performance molded case circuit breakers (MCCB) in two frame sizes designed to meet your needs from thermal-magnetic to advanced MicroLogic trip units. This range features integrated earth leakage protection.

Characteristics

- Flexible installation: any position; switchboard, or wall-mounted
- Nominal current: 16 to 630 A
- 9 breaking capacities for the 2 sizes of circuit breakers:
 - up to 250 A: 25, 36, 50, 70, 100, 150, 200 kA at 415 V
 - up to 630 A: 36, 50, 70, 100, 150, 200 kA at 415 V
 - both size of circuit breakers with 75 and 100 kA at 690 V
- 1, 2, 3, and 4 pole versions available
- Large range of electronic and thermal-magnetic protections
- Advanced trip unit with integrated power metering: I, U, P, E, THD, f, CosPhi
- Interchangeable trip-units to upgrade your panel with smarter functions
- Plug and ready wiring system and communicating accessories
- Wealth of options for auxiliaries and accessories (field installable)
- Integrated earth leakage protection via MicroLogic Vigi (earth leakage circuit breaker - ELCB).

DIGITAL MODULE

PowerTag

PowerTag® is a compact and easy-to-install Class 1 wireless communication energy sensor that monitors and measures energy and power in real time.

Connected products

PowerLogic PM5000 series

High-end cost management capabilities in an affordable power meter Part of PowerLogic™

Compact, versatile power meters for energy cost and basic network and asset management applications

[Product references](#)

- Ease of installation
- Cost-effective, as the range can meet the majority of requirements
- Simplified ordering with features in optimal combinations – no overlap
- Now available with LVDC and Analog inputs
- Simple integration into larger systems and solutions (dual Ethernet, Modbus TCP, BACnet/IP, and DNP3.0 over Ethernet)
- Easy setup with intuitive HMI
- Easy to use, with precision metering and billing
- Billing flexibility with MID compliance, support for up to eight tariffs
- Cybersecurity features to help ensure confidentiality and data support
- Consistent, superior performance with IEC 61557 compliance

PowerLogic PM5000 series power meters offer high-end cost management capabilities in a straightforward metering platform. With power quality capabilities, residual current monitoring, and MID conformance (PM5500, 5600, and 5700 range), this combination of features merges with industry-leading measurement accuracy to match the requirements of energy cost and asset management applications in buildings and industry.

The meter range is ideal for multi-tenant commercial markets, multi-unit residential buildings, industrial facilities, and – with DNP3.0 protocol support – utilities and heavy industry.

Function

- Metering and sub-metering
- Class 0.5S IEC 62053-22
- Class 0.2S (PM55xx)
- IEC 62053-22
- Class 1/2 IEC 62053-24
- IEC 61557-12

Application

- Panel instrumentation: I, U, F, P, Q, S, PF, E (Power demand and current demand)
- Sub-billing and cost allocation
- Power availability and Harmonics / Compliance monitoring

Characteristics

- Measurement accuracy (active energy): Class 0.2S (PM55xx) Class 0.5S
- Installation: Flush and DIN 96 mm x 96 mm
- Voltage measurement:
 - 20-400 V L-N 20-690 V L-L (PM55xx)
 - 20-277 V L-N 35-690 V L-L (PM51/53xx)
- Current measurement: external CT
- Communication ports: 2
- Inputs / Outputs:
 - 1DO for PM51xx
 - 4/6 I/O PM53xx based on model
 - 6 I/O for PM55xx
- Memory capacity:
 - 256 kb
 - 1.1 MB (PM55xx)

Acti9 Active

Acti9 Active features all-in-one protection devices with inbuilt connectivity for advanced protection to people, asset (enhanced fire-safety), appliance and circuits. Part of 9 Series

[Product references](#)

- Increase service continuity and resilience with our Acti9 Active devices connected solution
- Increased service continuity: fewer breakdowns with pre-alarms and alarms
- Enhanced Efficiency: easy remote monitoring, diagnostics, and analytics mean fewer disruptions and more efficiency gains
- Advanced Protection: All-in-one solutions covering a wide range of faults, with in-built MCB, RCD and AFDD
- Simple Installation and Upgrade: integrated devices and wireless connectivity to the gateway, make the system easy to install and upgrade
- Compact, requiring no extra space: an integrated device in 36mm makes it suitable for even small spaces

Acti9 Active range is our smart devices (with inbuilt connectivity) enabling the Active Safety System, and can bring advanced fire safety to protect assets. Compliant with Acti9 iC40 and iC60 systems. It comes option of integrated Miniature Circuit Breakers for circuit protection. It can work with EcoStruxure Power Monitoring Expert Software, EcoStruxure Panel Server, and PrismaSet Active to enable remote monitoring with alarms, pre-alarms, analytics, and diagnostics.

Characteristics

Actively manage electrical safety and service continuity:

- Wide range of electrical fault protection: asset protection/fire safety (arc-fault related), earth leakage, appliance and circuit protection from overvoltage, overload, and short-circuit.
- Being alerted in case of faults with pre-alarms on faults like overload and overvoltage.
- Get alarms and clear diagnostics on the nature of faults along with historical data and protection logs.
- Measure U, I, P, and energy for loads to understand their consumption pattern and health status.
- Compact and easy-to-install solution with integrated All-in-One protection and inbuilt wireless connectivity in 36mm device, it saves space and time for installation.
- Current ratings up to 40 A.
- 230V AC 50 Hz network.
- 30 mA sensitivity and A-SI type for earth leakage protection.

Connected products

Acti9 iC40 System

[Product references](#)

- Acti9 iC40 system makes installation and maintenance easy.
- Clean layouts, neat cabling, fast and simple identification of faulty devices, both on-site and remote.
- Saving space inside the panel and on-site.
- Efficient maintenance and intervention.
- Wired and wireless status sensors for system monitoring, analysis, and control.

Acti9 iC40 is a phase-neutral electrical protection system that is optimized for small and mid-size commercial building applications (up to 40A). It is a complete high-performance modular system for the final distribution applications and a member of the Acti9 Family.

Characteristics

Completely modular system up to 40A, allows you to easily build and install panels with the new vertical distribution blocks, bottom-feed RCCBs, double output head of group devices, and optimized comb busbars. The complete system includes all protection functions as MCB, RCCB, and RCBO for final distribution applications.

Acti9 iC60

[Product references](#)

- Reliable: VisiSafe according to IEC/EN 60947-2 and IEC/EN 60898 standards and Class 2 gives optimal protection for the life of your installation
- Efficient: VisiTrip, super immunization, no derating up to 50°C ambient temperature, automatic reclosers for increased continuity of service and enhanced reliability
- Simpler and smarter: Dual certification, full MCB and RCD coordination, Top or Bottom electrical feeding with multiple connection systems, easy ordering and design
- Monitor and Control: Manage loads, reduce operating or project costs, and accurately plan maintenance.

Acti9 iC60 system is your safe, efficient, and simple choice for a comprehensive low-voltage electrical distribution modular system from 1 to 63A. This system is the complete electrical final distribution system suited to all needs for mid-size or large Commercial and Industrial Buildings applications, offering a full range of standard and advanced Protections, Monitoring, Control, Communication, as well as installation accessories.

Characteristics

- Miniature circuit breaker (MCB): circuit protection against short-circuits and overload currents
- Residual current Devices (RCCB, RCBO, Vigi Add-on): people protection against electric shock by direct contact or indirect contact
- Switches (SW) and Motor Protection (P25M, LMA)
- Indication and tripping auxiliaries (OF, SD, OF+SD, MN, MX, MX+OF)
- Remote control and Automatic recloser integrated, or Add-on (REFLEX, RED, ARA, RCA)
- Type 1 and 2 LV surge arresters (iPRD1, iPF, PRD...)
- Arc Fault Protection Devices (AFDD) coupled with Residual Current Protection (Acti9 Active): Protection against fires caused by arc faults
- Contactors, Impulse relays, Light indicators, Pushbuttons and selector switches, KWh meters
- Installation systems: Horizontal and Vertical Comb Busbars, Splitter block, Multiclip evolutive power distribution, Isobar Fishbone type, full range of mounting and wiring accessories
- Communicating architecture: Acti9 Smartlink

Connected products

Acti9 C120

[Product references](#)

-
- Enhanced protection: prevention and protection of people and equipment from electrical threats,
 - Reliability thanks to the fast closure independent of toggle operating speed,
 - Service continuity: good overvoltage withstand capacity, high industrial performance level (degree of pollution, rated impulse withstand voltage, and insulation voltage),
 - Integration within a controller / PLC architecture: remote indication of the open/ close tripped state by auxiliary contacts from 2mA (optional).

Acti9 C120 has been designed to offer enhanced protection by preventing and protecting people and equipment from electrical threats such as short circuits, earth leakages, overloads, and more.

Acti9 C120 miniature circuit breakers are especially suited for the protection of electrical circuits in all commercial and industrial buildings. They ensure:

- Protection of circuits against short-circuit currents + against overload currents
- Protection of people and equipment against earth leakages
- Isolation of building applications thanks to IEC/EN 60898-1 standard
- Isolation in the industrial sector according to IEC/EN 60947-2 standard
- Tripping and signaling on fault by adding auxiliaries.

Characteristics

- Miniature Circuit breakers
- Nominal current: 63 to 125 A
 - Breaking capacity: up to 15 kA (400 V AC)
 - Tripping curves (B, C, D)
 - Compliant with IEC/EN 60898-1 or IEC/EN 60947-2
 - Operating voltage: up to 440 V AC
 - Insulation voltage: 500 V AC
 - IP20 terminal insulation
- Residual current devices
- Add-on residual current device modules: Acti9 Vigi C120
 - Pole types: 2P / 3P / 4P
 - Protection types: AC, A, A-SI
 - Sensitivity: 30, 300, 500, 1000 mA

Acti9 iPRD1, PRD1

[Product references](#)

-
- Acti9 iPRF1, PRD1 Type 1 Surge arresters protect the electrical installations against induced or conducted surges caused by direct lightning strikes.
 - The IEC/EN 62305- 2 specifies the use of Type 1 or Type 1+2 Surge Protection Devices in commercial and industrial buildings protected by a lightning conductor or a lightning rod
 - Surge Protection Devices are recommended when there is a higher risk of direct lightning strikes

Surge arresters Type 1 or Type 1+2

Protection of electrical and electronic equipment, telephone and computer lines against transient overvoltages of atmospheric origin and maneuvering.

Characteristics

- Impulse discharge current limp:
- 12.5 kA for Acti9 iPRD1 12.5r is suitable for buildings with protection levels III and IV
 - 25 kA for Acti9 iPRD1/PRD1 25r and 35 kA for Acti9 PRD1 Master are suitable for buildings with protection levels I and II.
 - When protection is not embedded, surge arresters must be associated with a suitable disconnection device, fuse, or circuit breaker.
 - These surge arresters are available either as monobloc or with pluggable cartridges.
 - The compact version of iPRD1 C25r Surge arresters reduces in half the space used by the device into the panel board.
 - Backup fuse integrated version of iPRD1 F25r Surge arresters avoids using specific external disconnectors.
 - These ranges cover all the different earthing systems: multiple-pole or single-pole devices to be assembled.
 - They come with output contacts for remote transfer of end-of-life information (for Acti9 SmartLink or other input/output devices).
 - Acti9 iPRD1 12.5r and Acti9 iPRD1/PRD1 25r are also Type 2 rated (8/20 µs) to protect the electrical equipment by finely clipping the voltage surge
 - They are suitable for 230/400 V 50/60 Hz networks, with earthing system TT, TN-S, TN-C
 - Acti9 PRD1 Master is also suitable for 440 V IT earthing system

Connected products

Acti9 iPRD

Surge Protection Devices Type 2 or 3, from 8kA to 65kA
Improve protection and continuity of service of your electrical equipment

The Acti9 iPRD Surge Protection Devices (SPD) range is crafted to safeguard your electrical systems and structures from surges caused by indirect lightning strikes. This enhances safety, efficiency, and business operations, particularly in challenging settings. The Acti9 iPRD SPD embodies a sustainable design, facilitating simple maintenance, featuring output dry contacts for remote monitoring. It offers tailored versions for TT, TN-S, TN-C, and IT earthing systems, prolonging the efficiency and lifespan of your equipment.

• Protect the electrical installations in all industrial and tertiary buildings against induced or conducted surges caused by indirect lightning strikes.

Characteristics

- Withdrawable cartridges of Acti9 iPRD Surge arresters allow quick replacement of damaged devices
- Certified for short-circuit current withstand, I_{sc} up to 50 kA (IEC 61643-11: 2011)
- The maximum discharge current covers from 8 to 65 kA
- The maximum continuous operating voltage U_c is 350 V AC or 460 V AC
- They are suitable for any earthing system: TT, TN-S, TN-C, and IT
- Compact version of iPRD C40r Surge arresters reduce in half the space used by the device into the panel board.
- Back-up fuse integrated version of iPRD F40r Surge arresters avoid the use of specific external disconnectors.
- It is possible to use multipolar or unipolar products for serial assembly
- The Acti9 iPRD surge arrester "r" version has dry contacts for transferring remotely the end-of-life information.

Acti9 iPF K

[Product references](#)

Surge Protection Devices Type 2, from 20kA to 65kA

• Protects electrical installations against transient overvoltage and surges caused by indirect lightning strokes in all industrial and tertiary buildings.

• They can also be used in residential sector with appropriate rated discharge current (20 kA).

Characteristics

- Maximum discharge current: from 20 to 65 kA
- Surge arrester/disconnector combinations is certified for short-circuit current withstand I_{sc} up to 6 kA (IEC 61643-11:2011)
- Maximum continuous operating voltage U_c = 340 V AC
- Monobloc form factor
- Multiple-pole or single-pole products for assembly
- Contacts for the remote transfer of end-of-life information.

PowerTag

[Product references](#)

Wireless energy sensor

No need for cabling: installation time is up to 90% quicker.

Wireless communication simplifies switchboard wiring and commissioning, and allows flexibility in installation.

Improved operational efficiency, reduced risk of downtime, and full peace of mind.

PowerTag® is a compact and easy-to-install Class 1 wireless communication energy sensor that monitors and measures energy and power in real time. Designed for new or existing installations in the residential, small business, and commercial building segments, PowerTag sends alerts in the event of an electrical anomaly, so now, home owners can enjoy peace of mind and business owners can count on operational efficiency and uptime.

Functions

- Real-time alarms are sent directly to smartphone or email – in the event of voltage loss or overload trips.
- A complete range of energy sensors for loads up to a rating of 630 A.
- Easy commissioning: PowerTag is automatically detected by the gateway during commissioning.
- A single gateway can communicate with up to 100 PowerTag units.

Characteristics

- A class 1 energy sensor: Its values are measured in accordance with the IEC 61557-12 standard, to provide real-time data on:
 - Phase-to-neutral and phase-to-phase voltage
 - Current per phase
 - Active / Reactive Power, total, and per phase
 - Apparent Power total
 - Power factor

Acti9 Smartlink

[Product references](#)

Monitor and control your business electrical equipment via your supervision system

Acti9 Smartlink Modbus and Acti9 Smartlink SI B are rapid to install gateways that allow you to grow your energy monitoring and control of final loads.

Optimization of energy consumption, enabling increased energy efficiency

The collection, visualization, and analysis of data from energy meters for individually monitored / controlled circuits in multiple

The simplicity of upgrading distribution panels

Functions

- Status and alarms from circuit breakers
- Remote control of contactors
- Remote monitoring of metered values
- DIN rail fitting: no additional space needed
- Simple, rapid installation with ready-to-connect communication module
- All in one cables with pluggable connections
- IEC 61131 compliant (PLC I/O modules)
- 24 V DC power supply

Connectivity

- Acti9 Smartlink SI B:
- 7 digital input / output channels and 2 analog inputs
 - Connection with up to 20 wireless devices
 - RS485 Modbus Master communication (up to 8 Acti9 Smartlink Modbus or other Modbus slaves)
- Acti9 Smartlink Modbus:
- 11 digital input/output channels
 - RS 485 Modbus Slave communication.

Connected products

Enerlin'X IFE

Ethernet interface for circuit breakers

Part of EcoStruxure

Enerlin'X™ IFE interfaces enables MasterPacT™, PowerPacT™, and ComPacT circuit breakers to be connected to an Ethernet or Modbus-SL network

[Product references](#)

Connected circuit breakers

- Live collection of Masterpact, Compact, and PowerPact circuit breaker data
- Alarms and pre-alarms for remote notification
- Ability to remotely control the circuit breakers

Simple and efficient installation:

- Plug and play thanks to the ULP
- Built-in test function
- Single software for commissioning and firmware updates with Ecoreach™

Characteristics

- Communication network type:
 - Ethernet, Modbus TCP/IP, HTTP, FTP, SMTP, NTP, SNMP10/100 Mbit/s on 2-port RJ45
 - Universal Logic Plug on 2-port RJ45
- Web server: Embedded HTTP server
- Mounting mode: by clips
- Mounting support: 35 mm DIN rail
- Control type: by software
- [Us] rated supply voltage: 24 V DC - 20...10 %
- Maximum supply current: 3 A
- Current consumption: 120 mA
- Connections - terminals: RJ45 connector
- Product certifications: GOST / CULus / FCC/ CE
- Standards: UL 60950 / UL 508 / IEC 60947-6-2 / IEC 60950
- Dimension:
 - height: 105 mm / width: 72 mm / depth: 71 mm
- Net weight: 182.5 g
- Accessory / separate part category:
 - Spare part for Compact NS630b...1600
 - Spare part for Compact NS1600b...3200

Environment:

- IP degree of protection:
 - connectors: IP2x
 - other parts: IP3x
 - front panel: IP4x
- Relative humidity: 5...85 %
- Ambient air temperature for:
 - storage: -40...85 °C
 - operation: -20...70 °C
- Pollution degree: 3
- Flame retardance:
 - V0 conforming to UL 94
 - V0 conforming to IEC 60947-1
 - V0 conforming to IEC 60695-2-11
- Shock resistance: 1000 m/s²
- Vibration frequency: 5...8.4 Hz

Com'X 210

EcoStruxure Panel Server

Universal wireless, concentrator modbus gateway 110-277 VAC/DC

[Product references](#)

EcoStruxure Panel Server is a gateway, providing connection of wired or unwired smart IoT devices to edge control software or cloud application. Connect wireless devices from Schneider Electric such as PowerTag Energy, PowerLogic HeatTag, Power Tag Ambient, Power Tag control and others. Connect most of Modbus/RS485 and Modbus/TCP devices from the market including PowerMeters and Protection devices from Schenider Electric. User friendly web-pages offer first-level of monitoring of measurements of all the conected devices including log of all alarms. Simple troubleshooting or the sytem through embedded web-pages with advanced diagnostic informations and logs . Easy commissioning through embedded web-pages or with EcoStruxure Power Commissionig that will offer commissioning reports and advanced features. Product dimensions are as follows: width 71,8 millimetres, depth 70,2 millimetres and height 85 millimetres. From 110 to 277 VAC/ DC 50-60Hz 3W/10VA Max Power Supply. -25°C to +70°C Operating temperature. 5-95% relative humidity. Major certifications including CE, UL/ CSA, IEC61010, UL61010, IEC61974-1, Marine certification, IEC61443-4-2, RCM, EAC and UKCA. The gateway can be DIN rail mounted in a modular enclosure. It has IP20 connectors, IM40 front face nose and IP30 on others faces. Two 10/100 Base-T ethernet RJ45 connectors. Modbus RS485 open-style connector. One connector for external Wi-Fi/Bluetooth antenna. Direct cellular connection through external LTE router connected through Ethernet or Wi-Fi. Perfect fit for EcoStruxure Edge Software such as Power Monitoring Expert, Power Operations and EcoStruxure Building Operations. Designed for EcoStruxure Cloud Applications such as Asset Advisor and Resource Advisor.

Exiway DiCube Emergency Lighting System

Exiway DiCube Control Unit Exiway DiCube Line Controller

[Product references](#)

The addressable system for automatic testing, reporting, and supervision of your emergency lighting installation. Exiway DiCube provides an intelligent way to install, commission and improve safety and control of emergency lighting always and everywhere.

Characteristics

- Exiway DiCube system is compliant with your BMS with Ethernet protocol.
- DALI protocol is used between the luminaires and the Control unit.
- Scalable system, from 128 luminaires for 1 Control Unit and Line Controller to as many luminaires as you want.
- Automatic tests compliant with the IEC EN 62034 standard.

Functions

- Automatic periodic tests for checking the status of the luminaires. The Control Unit automatically runs operational and autonomy tests on all connected devices.
- With your Smartphone linked to the Control Unit via Bluetooth, you have what you need to completely manage the entire installation. Set-up, commissioning, checks and plant status are always at your disposal.
- Programming and commissioning can be carried out using the dedicated "PC Suite" software.

Connectivity

- Easy integration on the EcoStruxure™ Building platform, web and KNX thanks to the use of DALI protocol. It gets effective management of all problems and constant control, even remotely, minimizes economic impact and optimizes tests and maintenance.
- Automatic tests compliant with the IEC EN 62034 standard.
- Built-in web server with monitoring of the status of the installation and devices connected to the system; automatic notifications in case of anomalies.

Unica System+ - Optiline 45 (with Unica WD)

	 Unica System+	 Optiline 45 (with Unica WD)
Description	Modular, quick to install, and easy to rearrange, Unica System+ devices provide the flexibility and innovative design to elevate office spaces from work-ready to future-ready.	The OptiLine 45 and Unica Click-in System is fast, flexible and very time-saving system. Built to save all kinds of energy for building-developers, owners, installers and end-users. By adding the Wiser functions you'll now reach yet another dimension of convenience and smartness: Energy efficiency!
Characteristics	Unica System+ floor sockets and floor boxes unite ease of installation, flexible functionality, and user convenience to give your customers more than they expect. Unica System+ desk units add convenience and connectivity, allowing people to work the way they choose.	Efficient mounting. Pre-punched oval holes every 25 cm and dedicated tools and fixings. Perfect joints. Jointing pieces for exact levelling. Joint cover piece to hide the gap.
Functions	With Unica System+ modular units, you can create exceptionally customized office interiors. Unica System+ poles and posts are an ingenious solution for modern office interiors. Highly aesthetic, movable, and customizable with different functions and accessories.	Perfect bends. Large tolerances. Self-guiding mounting of the bend piece. Pull-out safe outlets. Extra secure click-in function and front locking clip.
Connectivity	When space is at a premium and you have several functions to fit, Unica System+ workstations come to the rescue.	Pre-punched slots. Allows cross-sectional feeding of cables.
Benefits	<ul style="list-style-type: none">• Answer the needs of the modern workspace• The office of today has open areas designed to encourage cooperation, meeting rooms built to increase focus and concentration, fun areas for relaxing, and inside gardens to support well-being.• Such diversity in the office requires equally imaginative solutions for power and connectivity. And this is how you provide it: with Unica System+, a range of solutions designed to flexibly and reliably power every corner of the office.• Unica System+ offers any functional solutions i.e. power outlet, USB, data, multimedia socket, wireless charger.• Available in different colors and finishes, including exquisite Kvadrat fabrics, Unica System+ devices give your customers a broad choice of options to complement their interior styles. With its stylish solution it also suits any modern home space.	<ul style="list-style-type: none">• Wall trunking in 5 sizes; 75x55, 95x55, 140x55, 165x55, 185x55. Material: PVC or aluminum. The OptiLine 45 installation system gives the user reliable and flexible access to power, telephone and data close to the workplace.• 45x45 module wiring devices• Wide range: trunking, poles, posts and service boxes• Easy to order: several kits, simple specifying tool, product references printed on the protective foil of the trunking• Easy and quick installation. Accessories are mounted without adaptation• Easy to handle: trunking base and cover packed together, but not assembled• Safe and reliable: high-quality materials, self-extinguishing PVC, dedicated fixings• All trunking are 55 mm deep - high capacity and safe wire connections• Environmentally friendly, only lead-free and cadmium-free PVC is used (RoHS substance-free)

Optiline mini

	 Optiline mini
Description	The most comprehensive mini trunking system with a wide range of trunking dimensions and accessories.
Characteristics	High surface finish and hidden joints. High-grade, UV-resistant materials. Accessories and joint cover pieces conceal uneven cuts. Pre-punched screw holes or adhesive and built-in build tolerance for adjustable corners. Three trunking sizes equipped with an integrated cable retaining function.
Functions	IP40 and classified for single insulated wire.
Benefits	<ul style="list-style-type: none">• Designed, safe and flexible• Wide range: six sizes in PVC, 4 sizes in halogen-free plastic and 3 sizes in aluminum• Impact-resistant and tamper-proof. Can only be opened with tools.• Smooth design• Easy to handle including U-shaped profiles• Easy to install with pre-punched holes• Plastic trunking classified for single-insulated wires.• Can be used both indoors and outdoors• Branching piece: easy to combine different sizes• Partition walls can be removed to allow space for larger cables• Environment-friendly: no heavy metals, halogen-free alternatives

Sustainability School

Gain sustainability knowledge and skills

- Today, business and sustainability are closely intertwined. The survival of our planet hinges on this relationship. Fueled by Electricity 4.0, electrification, and digitalization, the Schneider Electric Sustainability School offers a pathway to valuable expertise and practical tools. It's an opportunity to enhance your brand's reputation and distinguish yourself from competitors.

[Discover now!](#)

Schneider Electric's Sustainability School is an online platform offering free courses on sustainability, energy management, and environmental practices. It provides knowledge and tools to help individuals and organizations understand, manage, and reduce their environmental impact while improving efficiency. The courses cover various topics such as renewable energy, energy efficiency, and sustainable development. It's a great resource for anyone interested in learning about sustainability and how to integrate it into their work and daily life.

Chapter 1: Gain knowledge

Get a clear understanding of sustainability basics like climate science, scope of impact, and tracking metrics to inform your customers and gain a competitive edge.

Chapter 2: Take action

Successful climate mitigation starts with a decarbonisation strategy. Learn how to develop a sustainability plan while leveraging tools and technology available to you as a our partner.

Chapter 3: Earn business

Get ready to recommend sustainability, digitisation, and decarbonisation to your customers. Learn how to leverage applications and solutions from Schneider Electric to increase business opportunities.
