

New generation of enclosures and Thermal management solutions

Introducing the new Panel**SeT** SFN and ClimaSys cooling units

Discover Schneider Electric's innovative solutions to protect your electrical equipment and meet your sustainability goals

Schneider Electric launches **PanelSeT SFN**, the first decarbonized and highly customizable cabinet on the market, conceived to form multiple panel assemblies.

Combined with the brand new **ClimaSys connected cooling units**, it offers ultimate protection for all your electrical and electronic equipment.

PanelSeT SFN modular enclosures

Meet your sustainability goals with the first decarbonized enclosure for industrial application

- **Sustainable** manufacturing process using recycled steel and renewable energy sources
- **Reliable** with up to 1500 kg of static load in a bolted structure with unique new frame design and fixation corner system
- **Flexible** products delivery offering standardized, kit or customized options
- **Efficient** end-to-end-process with eCAD availability, selection and configuration tools and faster mounting experience

ClimaSys connected cooling units

Discover the new range of connected cooling units to strengthen your industrial process

- **Sustainable** product design thanks to its micro-channel heat exchangers, rotative compressor, with reduced gas usage
- **Reliable** smart product enhancing customer peace of mind with easy communication, native alarm and operation data
- **Flexible** and easy-to-mount solution with the smallest and lightest range on the market
- **Efficient** selection process with ProClima thermal configuration software, now fully integrated into SEE Electrical Expert

Eco-friendly packaging with significant reduction of CO2 emissions and plastic usage.
