

Modernize and upgrade your building management system with ease

Simplified licensing plans now available for EcoStruxure™ Building Operation software

Ensuring an efficient, safe, healthy, and comfortable building is your top priority, and your modern, comprehensive, and scalable building management system is essential to delivering those goals effectively.

Now, EcoStruxure Building Operation software is available with flexible, three-tiered licensing plans. These plans simplify software management and cover all servers, connected devices, and system features to help ensure regulatory compliance and meet cybersecurity needs.

Simplify and optimize your efficiency

Licensing plans include a wide range of features so you can easily try new capabilities as your building needs change or expand. Free up your time for other priorities with predictable pricing and simplified maintenance and support.

One centralized license stays with your EcoStruxure Building Operation system for its entire lifecycle. Stay up-to-date and manage expansions, updates, and renewals when and where needed.

Upgrade from any version of EcoStruxure Building Operation in a single step.

Why choose licensing plans

Reduce software purchase complexity and simplify maintenance

Prevent unnecessary expenses with transparent pricing

Minimize management time with simplified and centralized system maintenance

Maximize rental value and allocate tenant billing easily

Licensing plan benefits

1 Assurance

Sustain and maximize efficiency without requiring new software licenses, including compatibility with hardware, Windows OS, containerized environments, and other modernization features.

2 Easier to scale

Expand, update, and renew your software license anytime at your own pace. You can also easily incorporate license renewals into existing service agreements.

3 Faster time to operation

Choose the EcoStruxure Building Operation software plan with the features that meet your needs. Activate software for the entire system in one step with a couple of clicks for minimal downtime or disruption to occupants (based on a typical installation).

4 Peace of mind

Relax knowing your BMS software is consistently up-to-date with the latest version, hardware/operating system compatibility, cybersecurity features, and service support.

Select the plan that meets your needs today; update whenever needed

About EcoStruxure Building Operation

EcoStruxure Building Operation is at the heart of the building management system, modernizing buildings and optimizing limited resources. It's a scalable, open IP integration platform that:

- **Integrates multiple building and power systems and devices** to collect, analyze, and manage data across an enterprise in a single control center.
- **Monitors, manages, and automates building operations** on a single network to increase energy and operational efficiency and reduce carbon emissions.
- **Turns system data into actionable intelligence** to optimize building performance and comfort and create more energy-efficient and healthy buildings.
- **Prepares buildings for a future** with more connected IoT systems and devices, hosted options, and AI and machine learning technology.

EcoStruxure Building Operation delivers core outcomes:

 **Sustainability Management**

 **Energy Management**

 **Operations Management**

 **Workplace Management**
