Fixed USB port for VAMP 50 and VAMP 300 series relays

This application note applies to Vamp 50 and Vamp 300 series

Windows has a feature which causes com port number to increase always when connecting to new VAMP5x or VAMP3xx relay. To avoid this, the windows registry has to be changed. Administrator privileges are needed for this change.

Step 1.
Go to: start → run

Step 2.
Write: regedit
Fixed USB port for VAMP 50 and VAMP 300 series relays

[Application note]

Step 3.

Go to: HKEY_LOCAL_MACHINE→SYSTEM→CurrentControlSet→Control→UsbFlags

Step 4.

Press right mouse button and add new Binary Value.
Step 5.

Name this binary value as: IgnoreHWSerNum04036001 and give value 01 to it.

![Image showing binary value editor]

Step 6.

Now registry editor can be closed and com port numbers will not increase anymore.
