Product End-of-Life Instructions

Product Range: Switched Rack Power Distribution Unit (PDU)

Marketing Model/Name: (List of multiple models if applicable)

APC Metered PDU – AP78XX, AP88XX, DELLXX

Purpose:
The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note:
This product family is in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Size in mm: 1,778 x 56 x 44

Weight in kg: between 2.9 and 9.2 including packaging.
Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy:

- Reuse
- Separation for special treatment
- Other dismantling
- Shredding.

The components of the products that optimize the recycling performances are listed, identified and located hereunder.

**Disassembly Instructions:**

1. Remove the Power Distribution Unit (PDU) from the rack per the instructions provided.

2. Shear the power cord from the PDU Unit base and place into appropriate recycling waste stream.

3. Disassemble the PDU housing by removing fasteners and remove the internal wire harnesses and outlet assemblies. Shear the internal wire harnesses and outlets from the PDU and place into appropriate recycling waste stream.

Switched Rack Power Distribution product range consists of the following typical parts: (1) Power Cord, (2) Outlet Assemblies, (3) Insulators, (4) Printed Circuit Board Assemblies (PCBA) with an on-board lithium coin battery, (5) Wire Harnesses, (6) Metal Housing and (7) Miscellaneous hardware/fasteners.
