Smart-UPS: legendary uninterruptible power
Intelligent, reliable protection for servers and networks
A legacy of reliability

Smart-UPS models

Smart-UPS management solutions

Smart-UPS accessories

apc.com/smartups
Maintain critical operations with certainty

Energy reliability has a name.

From home offices to business enterprises, Smart-UPS™ units support the uninterruptible power needs of your IT and equipment. This time-tested benchmark from APC™ by Schneider Electric™ protects critical data and connections from power risks by supplying clean, reliable, network-grade power.
The Smart-UPS family

A variety of models for a variety of needs.

There is a Smart-UPS model for nearly every application and budget. Choose from a range of form factors to fit any client's needs. From entry level to scalable runtime, Smart-UPS solutions are ideal for servers, point-of-sale equipment, routers, switches, hubs, and more.

Choose yours today

Smart-UPS models
SMC: entry-level UPS models

IDEAL FOR:
• Small business routers
• Entry-level servers
• Point-of-sale equipment

apc.com/smartups
SMC: entry-level UPS models

SMC features:

- **Network-grade power conditioning**
  Filters noise, provides automatic voltage regulation (AVR), and includes surge protection

- **Sine-wave output on battery**
  Compatibility with a broad range of IT power supplies whether online or on battery

- **LCD display**
  Intuitive interface provides key status at a glance

- **Battery disconnect**
  Convenient way to disconnect battery for transport (tower models)

- **PowerChute™ Business Edition software**
  UPS monitoring and control, safe operating system shutdown, and innovative energy management capabilities via USB (optional serial cable available)

- **Intelligent battery management**
  Extends battery life, optimizes performance, and maximizes reliability through precise temperature-compensated charging and automatic self tests

- **High-efficiency green mode**
  Optimal efficiency that saves utility and cooling costs

- **Rack-mount hardware**
  Brackets provided to install in both 2- and 4-post racks — additional rails optional

*Rack-mount models only

SMT: standard-level UPS models

IDEAL FOR:
• Various types of tower servers (from entry-level to mid-range)
• Storage
• Point-of-sale equipment and network devices

SMT features (in addition to entry-level SMC features):
• Configurable, multi-lingual LCD display
  Provides UPS status and key measures at a glance. Clear and accurate, menu-driven display for easy set-up and customization with or without software installation
• Extended-range automatic voltage regulation
  Provides enhanced brownout protection, boosting incoming voltage up to 30% without using battery power
• Switched outlet group
  Controlled separately from the UPS for discrete reboot of hung devices, sequenced ON/OFF, and non-critical load shedding
• Advanced battery management
  Innovative, dynamic recommended battery replacement date indicator
• SmartSlot™ interface
  Accepts a wide array of accessory cards for advanced management and environmental monitoring
• Rack-mount rails*
  All hardware provided to securely install in your IT rack

*Rack-mount models only

**RACK-MOUNT MODELS**
SMX: extended-run UPS models

IDEAL FOR:
• Convertible extended run models for critical servers and voice / data switches
• Expanded power needs via additional battery pack option

FEATURES

TECH SPECS

apc.com/smartups
SMX: extended-run UPS models

SMX features (in addition to entry-level SMC features):

- **Slim 2U rack / tower and 4U short-depth convertible forms**
  Display rotates easily for use in or out of a rack

- **High-frequency design**
  Reduces size of (or eliminates) bulky transformers, making installation even easier

- **Low-voltage models**
  (2 – 3 kVA) Configurable output from 100 V – 127 V on low-voltage models

- **Models available with pre-installed network cards**
  Models with “NC” suffix have pre-installed AP9631 network cards with environmental monitoring

- **Smart external battery connector**
  Accepts external batteries and increases runtime automatically to increase availability

- **Switched outlet groups**
  Enables you to reboot hung devices, shed non-critical loads to conserve runtime, and sequence start-up / turn off

**IDEAL FOR:**
- Convertible extended run models for critical servers and voice / data switches
- Expanded power needs via additional battery pack option

PowerChute Business Edition, for graceful UPS shutdown

Built-in manageability for your UPS unit.

While you’re connected through a serial or USB interface, PowerChute Business Edition software provides UPS management, safe system shutdown, and innovative energy reporting capabilities. Energy usage, cost, and CO₂ reporting provides a greater understanding of the energy consumed by IT equipment, enabling improved energy efficiency. Advanced analysis features help to identify the causes of potential power-related problems before they occur, ensuring the health of your protected equipment.

PowerChute Business Edition features:
- Graceful system shutdown
- Fault notifications
- Risk-assessment reporting
- Scheduled shutdowns
- Energy-usage reporting
- Centralized monitoring
- Recommended actions
- Battery status
- Outlet-aware shutdown
- Event and data logging
- Power-event summary
- Voltage analysis

PowerChute Network Shutdown, for machine prioritization

Reliable, virtualized shutdown of multiple servers.

PowerChute Network Shutdown works in conjunction with the APC UPS Network Management Card to protect your customers’ physical and virtual IT environments from threats to IT availability. Network-based, graceful, unattended shutdown of physical servers and virtual machines protects data integrity and reduces system downtime when power risks occur. This solution is easily configurable via browser interface, and it supports single, redundant, and parallel UPS configurations.

PowerChute Network Shutdown features:

- Graceful network-based shutdown
- Sequenced server shutdown
- Integration with VMware® and Microsoft® Hyper-V
- Support for virtual clusters
- Virtual machine migration / shutdown
- Virtual machine prioritization
- Command file integration
- Redundant and parallel UPS support
- Event logging
- HTTPS communications
- IPv6 support
- Scalable architecture for a host of client systems

The world’s most popular UPS just got smarter

APC SmartConnect is here: the first cloud-connected UPS, from APC.

Select Smart-UPS units boast an ingenious networking feature that makes the legendary devices even more adaptable and even easier to deploy: APC SmartConnect — a feature which allows you to view the status of your UPS through a secure web portal. Through this innovative remote management interface, you’ll receive automatic notifications, firmware updates, and advanced support. APC SmartConnect’s easy-to-use network connectivity provides added value — and more important — added peace of mind.

APC SmartConnect: your availability expert

YOUR UPS IS A DEPENDABLE PARTNER.
Manage more network devices more efficiently while providing the support your clients expect.

EASY 3-STEP SET-UP

1. Install UPSs and attach APC SmartConnect port to your client’s network.
2. Create a SmartConnect account and download plug-in for your RMM*.
3. Use RMM agent to discover and associate APC SmartConnect UPSs.

FEATURES

- Easily integrates with your RMM tools
- Automatic alerts and recommended actions
- Access to expert advice and support
- Expand service offer and SLA**

*RMM – Remote Monitoring and Management  **SLA – Service Level Agreement

APC SmartConnect: benefits

With APC SmartConnect, you’ll benefit from:

• Advice from the experts
  APC SmartConnect will routinely provide proactive UPS life-cycle recommendations so you can provide expert advice to your customers, maintaining your place as the face of their IT management.

• Recurring revenue
  APC SmartConnect allows you to expand your portfolio easily, growing your business through a manageable solution critical to any IT setup.

• Seamless integration
  Easily integrate with leading remote monitoring and management solutions, so you can manage customer portfolios from a single platform.

• Automated for simplicity
  APC SmartConnect monitors APC UPS devices automatically without coding, SNMP traps, or software agents. Without impediment, you’ll quickly set up your new IT solution.

• Accessible
  The APC SmartConnect web portal is accessible from any internet-connected device, so you can check your customers’ IT equipment on site or on-the-go.

• Enabled as a standard
  APC SmartConnect will be automatically included, free of charge, on select Smart-UPS models; making it the perfect solution for price-conscious professionals in need of power security.

• Another innovation from the industry leader
  The APC SmartConnect solution is the only UPS cloud offer on the market, delivered by the pioneers of uninterruptible power: APC by Schneider Electric, bringing you certainty in a connected world.
APC SmartConnect: saving your resources

It’s a time-saving, resource-saving innovation that makes our legendary Smart-UPS models more adaptable, and easier to deploy.

- Included on new models
- No special software required
- No gateway required

- Plug-and-play
- Minimal data for registration
- Simple account log-in
- Multiple device registration methods
- Ability to un-pair

- Easy-to-remember URL
- Access from any internet device
- Web portal with comprehensive UPS data
- Tailored content based on the devices you have

- Compatible with major RMM platforms
- Comprehensive UPS data
- Integrated alarming

- Clear notifications
- Actionable “active” notifications
- Informational “passive” notifications

- Data in CRM — so we know who you are when you call
- Support access to data for troubleshooting
- Life-cycle offer identifications for simple ordering

UPS network management cards

Connect to your network and enjoy direct control.

APC UPS network management cards allow for secure connection and control of an individual APC UPS via web browser, command-line interface, or SNMP. The configurable notification features keep you informed of problems as they occur. For protected servers, the included PowerChute Network Shutdown software provides graceful, unattended shutdown in the event of an extended power outage, always keeping business information safe.

Features and benefits

- **Browser accessible**
  View the user interface with a browser for quick access from anywhere, on a secure network.

- **Remote device management**
  Enable management of your UPS by connecting it directly to the network.

- **Fault notification**
  Get real-time event notifications, minimizing response time to critical physical infrastructure situations — reducing meantime to repair, improving efficiency, and maximizing uptime.

- **Reboot equipment remotely**
  Eliminates the need to dispatch technicians to remote locations.
