One of the largest communication technology companies in the world provides crucial services to the public without fear of power outages because of a reliable backup power solution engineered by ASCO Power Technologies.

Application

• Backup power system for mobile telecommunications site.

Challenges

• Power Outage of Mobile Switch Center would cause a considerable service impact to Verizon Wireless customers.
• Physical infrastructure footprint limits the design options for the back up power solution.

Solution

• ASCO - 7000 Series Automatic Transfer Switches

Benefits

• Cost-efficient solution
• Reliable backup power solution
• Customized solution that met their infrastructure footprint needs
• Easy maintainability of ASCO Transfer Switches.

“ASCO and our design team have a long working relationship. ASCO is easy to work with and it’s almost like they are part of the design team.”
