Fire Rated Wall Boxes
Now acoustically rated and designed for easy fixing
Wall Boxes that can take the heat

Suitable for one and two hour fire rated walls

Maintaining fire ratings of walls even in back to back installations, Clipsal Fire Rated Wall Boxes are manufactured from robust Galvabond to prevent distortion or corrosion, even under the toughest of conditions.

All wall boxes are provided with ample knockouts for easy cable access. In addition, fixing boxes to plasterboard walls is easier than ever before thanks to clamping arms that quickly slide into place and tighten.

Installation of electrical accessories into the wall boxes is simple with the adjustable 84mm centres.

Acoustically rated up to STC50
The sound transmission rating of these wall boxes makes them perfect for back to back installation in almost any location, including units, apartments, motels, hospitals and commercial premises.

A typical back to back installation

Performance

All the Clipsal Fire Rated Wall Boxes have been tested in accordance with AS1530.4 and AS4072.1 for Fire Rating and have achieved an FRL of both -/60/60 and -/120/120 in appropriately constructed partitions.

Similarly, all the Clipsal Fire Rated Wall Boxes were tested in accordance with AS1191, AS1276, AS1045, for sound transmission and achieved a rating of up to STC 50 using various Clipsal accessories.

These ratings are all dependent on strict adherence to installation instructions.
Now easier to fix into plasterboard walls.

1. Carefully cut opening to ensure neat fit.
2. Insert box into opening.
3. Extend clamping arms into wall.
4. Ensure gasket is fitted to achieve the acoustic rating.
5. Attach accessory with fixing screws.
6. When painting is complete, surround clicks on for a perfect finish.

Installing our Fire Rated Wall Boxes is now even easier with new Clipsal Fyre Seal Mastic. This product is a non-toxic, non-irritant, flexible water-based sealant for fire resistant sealing of gaps around wall boxes, cables, conduit, busways and ducts which penetrate walls, floors and ceilings.

It can also be used to replace any intumescent material inadvertently removed during wall box installation.

Supplied in an easy to use 300ml cartridge, Fyre Seal Mastic gives up to 4 hours FRL when tested to AS1530 Part 4 1990. Despite providing an excellent bond to metal, concrete, plasterboard and cable coverings, it remains soft and flexible after curing in order to accommodate thermal cycling movements.

Only Clipsal can offer a range like this:
