

A small package
with a big heart

CLIPSAL[®]
LIVING ELECTRICAL

414
TWIN SOCKET

414 Twin Surface Sockets

Clipsal's new 414 Twin Surface Socket is a 'small package with a big heart' because it's now available with 50% more wiring space inside without any compromise to the original size.

The new 414 Series has raised the bar in twin surface sockets meeting the new Australian Standards, plus we've added some features of our own.

Clipsal's new 414 Series out rivals similar products on the market and comes standard with features and benefits such as:

- ♥ Improved wiring space – 50% more space than previous models.
- ♥ Inline terminals – Terminals orientated in active, earth and neutral order. Suitable for Australian TPS cables.
- ♥ Nail plate cable entry and exit points – eliminating the need to modify socket cover in most cases.
- ♥ Nail plate external mounting tabs – suitable for cable ties or 'screw fix' applications.
- ♥ Multiple fixing point locations – no need to modify nail plate.
- ♥ Additional knockouts for cable wiring – allowing for larger looms and more cabling.
- ♥ Cover clips with interlocking tabs – screwdriver removable.
- ♥ Fits all plug types – flat top surface to lessen complications.

Clipsal's 414 Series colour range:

- ♥ 414 and 414L available in white (WE)
- ♥ 414NP available in transparent (TR).

No other twin surface socket on the market offers such beneficial features for the installer, making your job easier. Save time, money and effort - the next time you install surface sockets insist on Clipsal 414 Twin Surface Sockets.
