Add a little Sunshine to your bathroom
With built-in thermal protection
Hello Sunshine
Say goodbye to foggy mirrors and cold, dim steam filled bathrooms every winter. An Airflow Sunshine bathroom 3-in-1 model will provide your bathroom with fresh clear air, bright light and gentle radiant heat in one compact and stylish design.

Multiple choice
Two models are offered in the Sunshine range – a two heat lamp model for use in ensuites and a four heat lamp model for main bathrooms.

Safe to use
Sunshine 3-in-1s are very safe to use. Both models have heat resistant ceramic lamp holders and an all-metal body to provide you with total peace of mind. For added safety, the exhaust fan automatically turns on whenever the heat lamps are in use to prevent heat build-up.

Your Sunshine also has built-in thermal protection – a temperature sensor that instantly turns off the heat lamps should the unit ever overheat. However, the exhaust fan will stay on to cool the unit down, while the centre light can still be used so you’re never left in the dark.

Great in tight spaces
For bathrooms with restricted ceiling spaces, both models include side-connected flexible ducting. This extracts steam and air outside preventing moisture damage.

Easy to clean
Airflow has designed the fascia with large flat surfaces to prevent dust traps forming and making it easy to clean.

Simple to install
Each model is supplied with a ventilation outlet designed for easy installation on walls or under eaves. Outlets can be fitted with insect screens, automatic shutters and fixed louvres. Ask your electrical contractor about the option that’s right for you.
Airflow Sunshine 2 x 275W heat lamp model
7600ATP,WE

Features
- Attractive modern design.
- Efficient and economical operation.
- Built-in thermal protection for added safety.
- 2 x 275W radiant heat lamps with ceramic lamp holders.
- One heat setting.
- An R80 60W centre lamp.
- Exhaust fan.
- 3m x 150mm ducting.
- Ball bearing motor and centrifugal fan for room ventilation through ducting.
- Clipsal 2000 Series labelled wall switches, gridplate and cover included.
- Side connected ducting for ceiling cavities above 215mm.
- Wall/eaves outlet included.

Airflow Sunshine 4 x 275W heat lamp model
7500ATP,WE

Features
- Attractive modern design.
- Efficient and economical operation.
- Built-in thermal protection for added safety.
- 4 x 275W radiant heat lamps with ceramic lamp holders.
- One heat setting.
- An R80 100W centre lamp.
- Exhaust fan.
- 3m x 150mm ducting.
- Ball bearing motor and centrifugal fan for room ventilation through ducting.
- Clipsal 2000 Series labelled wall switches, gridplate and cover included.
- Side connected ducting for ceiling cavities above 230mm.
- Wall/eaves outlet included.
Where to locate
Radiant globe heaters are not designed to heat entire rooms, but to provide instant and concentrated heat directly below. Always locate a Sunshine bathroom 3-in-1 where drying off takes place and not directly over the shower or bath.

Protect the environment
Although Sunshine 3-in-1s are economical to run, it is recommended that heat lamps operate for no more than 15 minutes at a time to save electricity and to help protect the environment.

Warranty and replacement lamps
Airflow Sunshine heater models are backed by a three year warranty, while the lamps are covered for one year. Airflow replacement heat lamps and light globes are also available. Use only approved Airflow replacement lamps otherwise the warranty is void.
