Life Is On™

Your home is more than four walls; it is a living, breathing space.
We create technology that brings your home to life. Life Is On.

Simple. Intelligent. Lighting. Control.

Technology works best when it complements and enhances our lives.
And that's what Clipsal SILC does.

Clipsal SILC combines your smartphone or tablet with LED lighting to provide simple lighting control throughout your new home.

When you discover how Clipsal SILC enhances your lifestyle and home, you'll wonder how you ever lived without it.

Set the perfect scene with Clipsal SILC

Allow the lighting in your home to achieve its full potential. Clipsal SILC lets you personalise your lighting and create the perfect atmosphere in every room, so you can enjoy every moment, everyday.

It cleverly connects the lighting throughout your home to your smart devices, like your phone or tablet. Dim the lights for a romantic dinner or set the scene for a fun party at the touch of a button – Clipsal SILC allows you to effortlessly adjust the lights to suit your specific needs.

Whether you require dimming, control of a group of lights or simply individual lights, Clipsal SILC is so easy to use. It gives you complete control of lighting anywhere in your home, at anytime.

You're not just limited to your smart devices either. If you want to operate your lights from the switches on the wall, you can do that too.

Confidence

Clipsal SILC is wired throughout your home, so it's a secure system that you can rely on. While you will mainly find yourself using the features the app provides, you'll also have the confidence that all of your wall switches function as normal. Clipsal SILC offers the best of both worlds.

Connected

Stay connected to your lighting, wherever you are in your home, or whatever you are doing. Busy in the kitchen but need to turn on the front light? Cat slumbering on your lap, but the room's too bright? Clipsal SILC provides total convenience whenever your smartphone or tablet is in reach.

Personalised

Because both you and your home are unique, you can personalise and adapt Clipsal SILC to match your lifestyle. Label rooms with names that make sense to you, group areas together, create moods for the occasions you enjoy most... Clipsal SILC becomes an extension of your personality.

Flexible

You can easily reconfigure the Clipsal SILC app to provide the same level of convenience, no matter what the future may hold.

Energy saving

LED lighting requires less energy to run, and because dimming is so easy and convenient with Clipsal SILC, you are likely to use this feature more often. Along with dimming, a master-off switch allows you to turn off all lights at once, so you're not wasting power when you're away from home.

You'll see... Clipsal SILC simply makes sense

It's all about simplicity.

The Clipsal SILC app that controls the entire system is easy to use and reconfigure as your needs change.

Optimised control

From zero to 100%, dimming is as smooth as SILC, with multi-way control and no lag or stuttering.

Control lights individually, or as part of a group

Control your lighting individually or as part of a group. In even larger areas, Clipsal SILC can control multiple groups.

Turn off all the lights

"All Off" allows you to switch off all the lights in your home at the touch of a button on the app. A great feature for when you're about to go to sleep, or rushing out the door.

Components that create your Clipsal SILC system

Clipsal SILC LED Downlights

An integral part of Clipsal SILC is the intelligent LED downlights. Choose either Warm White or Cool White, available in both White and Brushed Chrome finishes.

Stay in control of every light in your home

You can connect other types of lighting in your home to the Clipsal SILC system for ON/OFF control. A fluorescent light in the garage, pendant lights in the kitchen or even an exhaust fan in the bathroom – Clipsal SILC provides whole-of-home lighting control.

Clipsal Wall Switches

Clipsal SILC complements the Clipsal range of wall switches, so you can match one to suit your style and decor.

Soft-touch buttons allow ON/OFF and dimming from each wall switch, for reliable control.

Add a Clipsal SILC Master-Off Switch to a wall plate near an entry or exit, to simultaneously turn off all lighting and electrical devices connected to the Clipsal SILC system.

How does Clipsal SILC work?

Each component of the Clipsal SILC system combines to provide convenient control of lighting, via a smart device or wall switches.

In the switchboard

The power supply is installed in the switchboard and provides power for the Clipsal SILC system and the communications cable.

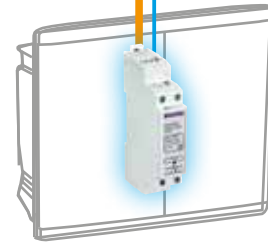

Behind the scenes

The brains of a Clipsal SILC system is installed behind the scenes in your home. They provide control via a smart device, make installation easier, allow control of other lights (like pendants or fluoros) and provide intelligence for the downlights.

In your home

These are the devices that you see and use. A home router allows control via a smart device, or you can control the LED downlights via wall switches.

In the switchboard

Clipsal SILC Power Supply in Switchboard **CLSPD**

Power cable and a Clipsal SILC Cable run from the switchboard to each Clipsal SILC LED Downlight.

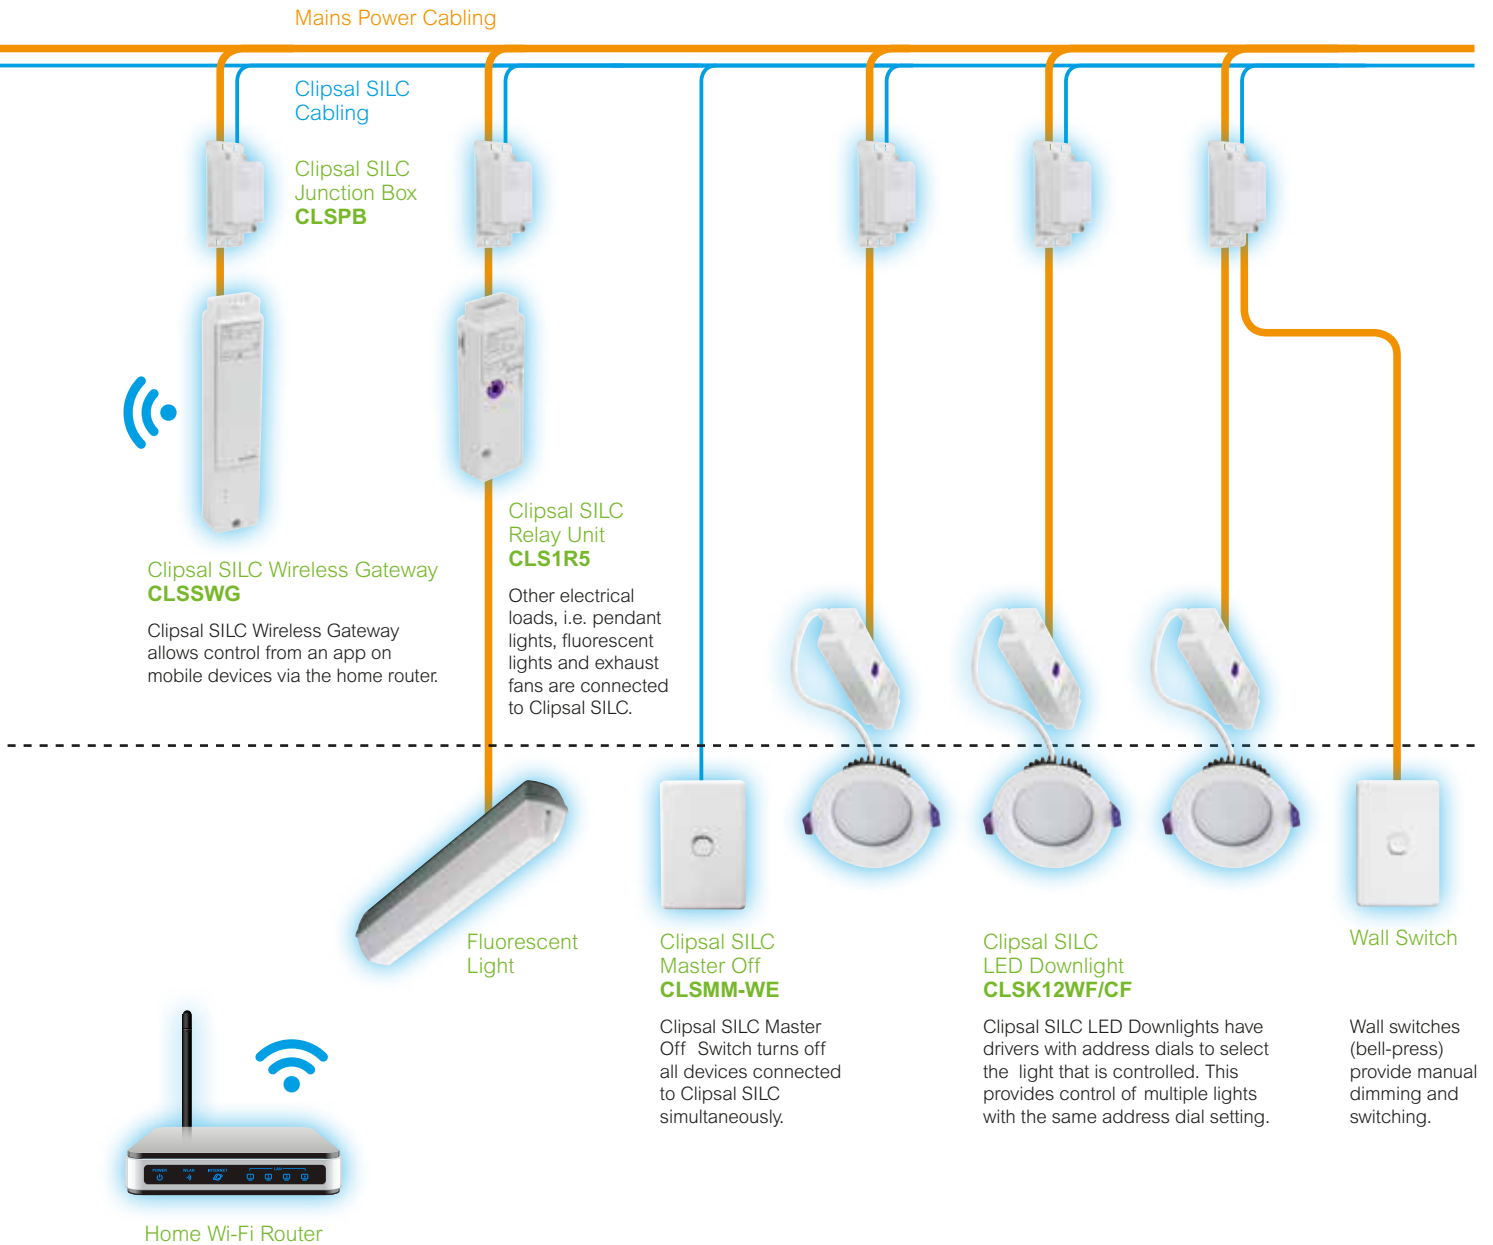

In your home

Clipsal SILC provides a wider dimming range with smooth transition, multi-way switching and dimming, and group lighting control.
