

Ensure your home is ready with Clipsal NBN solutions.

Whether you're renovating or building, enjoy the fantastic benefits of fibre to the home.

What is the National Broadband Network (NBN)?

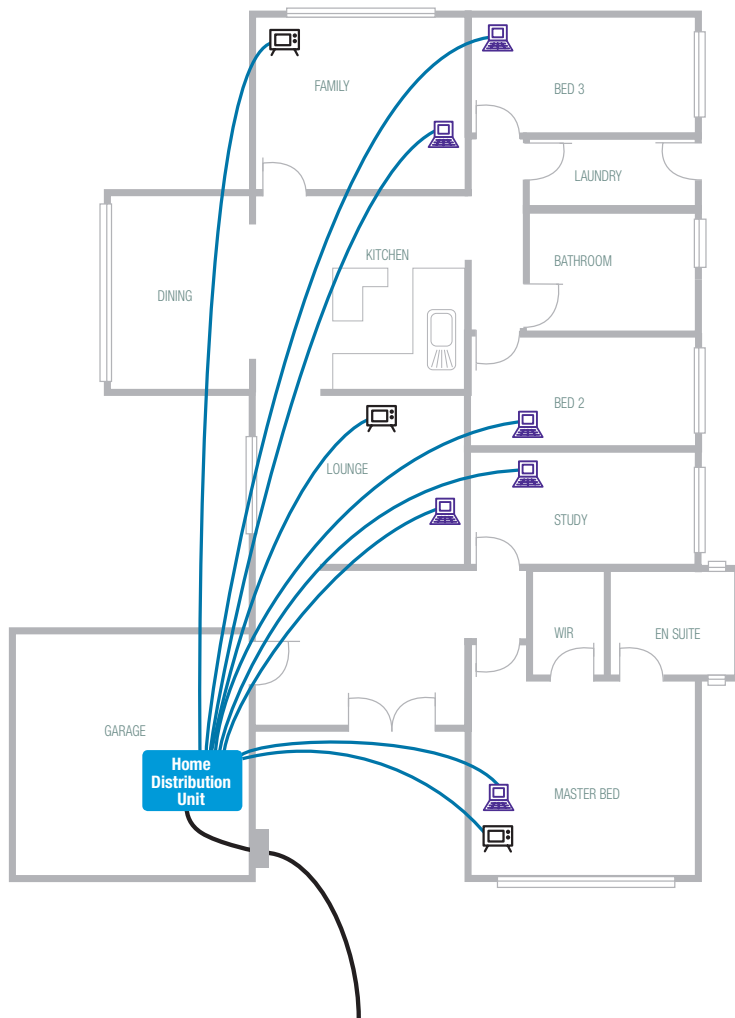

The NBN is the next generation broadband network designed for Australia's future needs. The network comprises of three technologies:

- optic fibre
- fixed wireless
- next-generation satellite.

It will provide thousands of Aussie homes with the fantastic benefits of reliable, high-speed broadband – improving peoples' lifestyle through greater connectivity to new technologies and high-speed Internet.

Benefits of the NBN

- High-speed, reliable Internet
- Download purchased music in seconds, and entire movies in minutes
- Internet TV (IPTV) – providing you with a greater viewing selection than ever before
- Internet telephone (VOIP) – keeping you connected at a fraction of the cost
- High-level, simultaneous connection to all your “smart” devices – maximising the latest technology
- Crystal clear HD TV, video conferencing and Skype, with super-fast connection
- Greater connectivity to new technologies

Clipsal Home Distribution Unit (3105PEN7440)

Can I connect my home to the NBN?

Yes you can! Work has already begun on the NBN, and by the end of the 10-year rollout all Australian premises will have access to this new high-speed broadband network.

93% of Australian homes, schools and businesses will have access to the NBN through optic fibre to the premises, providing broadband speeds of up to one gigabit per second. And 7% of premises will have access to the NBN through next-generation fixed wireless and satellite technologies, providing peak speeds of 12 megabits per second.

No matter how you're connected, your Internet will be faster than ever before. You'll be able to download movies in a matter of minutes, which would have previously taken up to 24 hours.

Visit your local Powerhouse

Clipsal Powerhouses are open 9am – 5pm, Monday to Friday. Call today and book your personal tour. See how Clipsal can make your home energy efficient, NBN ready, comfortable, convenient and secure.
