

The best time to order extras is now!

CLIPSAL[®]
every room, every home

Awesome Foursome

Perfect for busy kitchens, behind entertainment systems and on the shed's work bench. The Clipsal Awesome Foursome Switchplate quadruples the outlets for quadruple the convenience. Never again will you have to unplug one appliance to plug in another.

It's more cost effective to add optional extras during the planning stage of your home. Once the walls are up it's more expensive and a lot messier!

SunShine bathroom heaters

Turn even the coldest, dampest bathroom into an oasis of warmth, light and fresh air. Bask in the glow of the heat lamps or fill the room with light. Quickly remove all steam or stale air with the powerful ball-bearing exhaust fan. Airflow Sunshine Bathroom heaters – keeping the air fresher.

No switch or socket goes on thinner.

Slimline and Eclipse switches are an amazing 4mm thick (or should we say thin!). Being wafer thin they are up to 60% thinner than other switches making them rest smoothly on any surfaces to ensure a discrete and highly fashionable finish. Also available in a huge range of decorator colours including the stunning metal plate. Slimline & Eclipse, good looks sliced extra thin.

ECLIPSE

a simple twist on lighting

A Clipsal C-Thru dimmer lets you adjust lighting for any occasion. Create a little romance, let the kids feel safe at night, or even soften lighting to help you relax. Best of all you will save on power and your light bulbs will last longer.

Arrest that power surge!

Letting thousands of dollars in electrical equipment be destroyed through a power surge is criminal! Protect your televisions, computers, videos and other equipment by simply installing a Clipsal Surge Arrester. Also, in addition to the compulsory Safety Switch, install separate Clipsal Safety Switches to each circuit to ensure one incident doesn't cut power to the whole house.

Clipsal Lifesaver home emergency light

No more being plunged into darkness during a power failure. This light automatically turns on providing safe convenient light. When the mains power is restored the light automatically turns off and recharges the internal batteries.

Welcome friends and deter intruders. Enjoy the safety and security of an Infrascan to light up paths automatically. The Infrascan can be easily located on a wall or ceiling and its sensitivity is fully adjustable to work exactly how you want it.

Ideal for walk in pantries or robes you'll love the convenience of this hands free sensor switch.
