

**“For Starters...
you can rely on 56 DOL9”**

Direct On-Line Motor Starter

It's a tough world. And tough environments are no place for weak switchgear. For years, commercial and industrial sites Australia wide have relied on Clipsal's 56 Series starters to survive in conditions that would turn other products to shards of plastic.

Having now undergone a redesign, the 56DOL9 starter is even better than ever. The internal components have been completely replaced with Telemecanique contactors and overloads, a globally recognised brand renowned for quality and reliability in automation and control. Tough, safe, UV resistant and IP66 rated, these starters leave the competition on the scrap heap.

56 DOL9
Series2

56 DOL9 Starters

Series2

- ample wiring room
- IP66 rated
- impact, water, dust and UV resistant
- reliable 56 Series enclosure
- nine types complete with overload already fitted
- renowned Telemecanique contactors and overloads
