

## Cable Cover

Polymeric cable protection covers provide increased protection for underground cables and enclosures against accidental mechanical damage; and serve as a physical barrier as well as a visual warning of the presence of electric cables. They are not intended to eliminate all types of mechanical damage to underground cables.

### Cable Cover shall:

- Comply with the requirements of AS4702 (Polymeric Cable Protection Covers)
- Provide the 'mechanical protection system' for Category B underground wiring systems as required by AS/NZS3000
- Be supplied in flexible rolls as per Clipsal 287R Series or in rigid strips as per Clipsal 287/150 or 287/300
- Provide increased protection for underground cables and enclosures against accidental mechanical damage
- Serve as a physical barrier and visual warning of the presence of electric cables.
