**Product Description:**
Switched socket outlets are fitted with an interlock mechanism that allows for the switch to be in the on position only when there is a plug inserted. It does not allow for the plug to be removed unless the switch is in the off position.

Overall Dimensions Width 102mm, Height 198mm, Depth 103mm.

Entries provided are as follows:
- 10 and 20Amp
- 2 x 25mm and 1 x 25mm threaded conduit entries in opposite ends of the enclosure.
- 32,40 and 50 Amp
- 2 x 25mm and 1 x 32mm threaded conduit entries in opposite ends of the enclosure.

Other special entry configurations may be available upon request.

**Installation:**
This product is to be installed in accordance with AS3000 Wiring Rules.

**Mounting:**
Internal, use dimensions as shown.
(220/10 caps, provided, must be installed to ensure IP rating.)

External mounting feet may be ordered separately. Cat No. 56MF

All conduit and cable glands entering the enclosure must be sealed and all the cover screws shall be tightened to a minimum torque of 0.6Nm (Normal hand tightening).

Do not over tighten.

Cover screw recesses are then to be fitted with No 9 caps (included in parts pack).
This must be done to ensure the IP66 rating of this product is maintained.

**Installation kit Includes:**
- 4 x 220/10 Caps
- 6 x No 9 caps
- 1 x black connector
- 1 x green connector
