**DESCRIPTION****8 Position 4 Contact 'Looping' Telephone Jack RJ11****Wiring Diagram****BOX QUANTITY** 10**OUTER QUANTITY** N/A**FEATURES**

619M4 – RJ11 Modular outlet

Telephone socket designed for easy downstream phone outlet wiring (two sets of IDC punch down connections 1 for line in and 1 for line out).

Module can support 1 or 2 phone lines.

Contacts are hard gold plated nickel.

15 year compliance warranty for correctly wired installations in accordance with: AS/NZ 3080 1996.

**APPLICATIONS**

Fully modular - will fit into 500/600 series switch plate apertures. Up to six modules per standard plate possible.

**COMMENTS**

Wiring can be terminated using stuffer caps although the use of a 110 tool (Dataplus) is recommended.

Clip is front-loading and the Dataplus module is then clipped in from the rear.

240V modules must not be fitted to the same plate unless suitable separation barriers and separate wire tracks are used.
