### FEATURES

20A resistive rating.  
30mA RCD protection for personal safety or 10mA RCD protection for sensitive equipment.  
Unit tripping time less than 0.03 of a second to minimise exposure to fault situation.  
Mechanical indication of device status – indicates whether the RCD is latched or has been tripped.  
Amber neon indication of power availability.  
Unit remains latched in loss of voltage situations – doesn't need to be reset.  
Large clearly labelled terminals for input (Line) and output (Load).  
All PDL RCDs are tested rigorously to ensure maximum quality and reliability in the field.
