Magelis HMISTU and HMISCU
ATEX/IECEx Instruction Guide

Concerning the use of Magelis HMISTU and HMISCU terminals for applications in potentially explosive atmospheres (Zones 2/22)

Schneider Automation SAS
Site Horizon, 8ème rue, ZI Carros
06516 Carros cedex – France

Type examination certificate: INERIS 13ATEX3013X/01
IECEx Certificate of Conformity: IECEx INE16.0016X

SAFETY INSTRUCTIONS

Read these instructions carefully, and look at the equipment to become familiar with the device before trying to install, operate, or maintain it. The following special messages may appear throughout this documentation or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to a “Danger” or “Warning” safety label indicates that an electrical hazard exists, which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages that follow this symbol to avoid possible injury or death.

DANGER indicates a hazardous situation which, if not avoided, will result in death or serious injury.

The information in this document is subject to change without notice.

PLEASE NOTE

Electrical equipment should be installed, operated, serviced, and maintained only by qualified personnel. No responsibility is assumed by Schneider Electric for any consequences arising out of the use of this material. A qualified person is one who has skills and knowledge related to the construction and operation of electrical equipment and its installation, and has received safety training to recognize and avoid the hazards involved.

SCOPE

This present document applies when the Magelis HMISTU and HMISCU terminal bears marking and provides important information when used in hazardous areas. This documentation has to be kept and always refer to those instructions for installation, operation, maintenance or evolution of your system.

You can download this instruction guide at www.schneider-electric.com.

If any translation is needed, you can contact your local Schneider support or sales center.

Magelis HMISTU and HMISCU terminals are only supplied with 24 Vdc.
Relevant Standards

These devices have been manufactured in accordance with:

DANGER

POTENTIAL FOR EXPLOSION

Install, use, and maintain these modules in accordance with:

- Standard EN 60079-17 (2007): Inspection and maintenance of electrical installations in hazardous areas.
- Edicts, by-laws, laws, directives, circulars, standards, regulations and any other document relating to where the apparatus is installed.

Failure to follow these instructions will result in death or serious injury.

Permitted zones of application

Refer to the section "Markings" to get information about the permitted zones of protection and the types of protection.

- Magelis HMISTU and HMISCU terminals installed in zones 2/22 hazardous areas must be certified and bear the $\text{Ex}$ marking.
- Ensure with the marking that the terminals are compatible with the conditions permitted for the hazardous area at the site where it is being used.
Make sure you follow all the recommendations in the Magelis HMISTU and HMISCU user manual, and additionally those listed below.

### DANGER

**POTENTIAL FOR EXPLOSION**

- Confirm that the location is free from explosively hazardous gases or dust before connecting or disconnecting equipment, replacing or wiring modules.
- Make sure that the ambient temperature in protective enclosure never exceeds 50°C (122 °F).
- Confirm each interface (COM, Ethernet, USB, power line, …) has been securely locked.
- Confirm that any USB cable has been attached with its appropriate clamp.
- Install the certified equipment in a protective enclosure providing at least IP54 protection when applied in zone 2 environments and IP6x when applied in zone 22 environments. This protective enclosure must be certified for hazardous areas zone 2 or 22.
- Do not open the protective enclosure while the system is powered up.
- Confirm that the power supply has been turned OFF before disconnecting, replacing or wiring modules.
- Ensure that ground at power supply is properly connected.
- Do not use equipment that has been damaged.
- Use Touch Pen XBTZGPEN to all terminals at using zone 2 and zone 22 areas to avoid the risk of electrostatic discharges.
- Do not expose the terminal to direct sunlight.
- The terminal must be protected against accidental shocks.
- Do not allow layers of dust to form on terminals: it should be cleaned regularly.

Failure to follow these instructions will result in death or serious injury.
### Markings

ATEX and IECEx markings, applied to the Magelis HMISTU and HMISCU terminals, are as follows:

<table>
<thead>
<tr>
<th>Schneider references</th>
<th>Marking</th>
</tr>
</thead>
<tbody>
<tr>
<td>HMISTU655</td>
<td>Schneider Electric F-06516 Carros</td>
</tr>
<tr>
<td>HMISTU855</td>
<td></td>
</tr>
<tr>
<td>HMIS5T</td>
<td></td>
</tr>
<tr>
<td>HMIS65</td>
<td>INERIS 13ATEX3013X</td>
</tr>
<tr>

</tr>
</tbody>
</table>

- Do not disconnect when circuit is live
- Potential electrostatic charging hazard - see instructions.

**NOTE:** Other required elements such as product reference, serial number and date code of manufacture are already marked on products.
EU DECLARATION OF CONFORMITY

We: Schneider Electric Industries SAS
35 rue Joseph Monier
Rueil Malmaison 92506 - France

Hereby declare under our own responsibility that the products:

<table>
<thead>
<tr>
<th>Trademark</th>
<th>Magelis</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Product, Type</strong></td>
<td>Human Machine Interface HMISTU: HMISTU655, HMISTU855, HMIS5T, HMIS65, HMIS85 HMISCU: HMISCU6A5, HMISCU8A5, HMISAC, HMISCU6B5, HMISCU8B5, HMISBC Includes models with additional alphanumerical characters at the end of the model number.</td>
</tr>
<tr>
<td><strong>List of reference and options</strong></td>
<td>See the Magelis HMISTU and HMISCU ATEX/IECEx Instruction Guide</td>
</tr>
</tbody>
</table>

Are in conformity with the requirements of the following directives and conformity was checked in accordance with the following standards.

<table>
<thead>
<tr>
<th>Directive</th>
<th>Harmonized standard / Notified body reference</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>EC Type examination certificate:</strong> INERIS 13ATEX30013/01 (*) and IECEx INE 16.0016X II 3 G D Ex nA nC IIIC T4 Gc Ex tc IIC T135°C Dc Tamb: 0°C to +50°C By INERIS: Parc Technologique ALATA, 60550 Verneuil en Halatte - France</td>
<td></td>
</tr>
</tbody>
</table>

Subject to correct installation, maintenance and use conforming to its intended purpose, to the applicable regulations and standards, to the supplier’s instructions and to accepted rules of the art. This declaration becomes invalid in the case of any modification to the products not authorized by us.

Compliance with the ATEX Directives will require the application of ATEX guide giving requirements, details and advices for installation of products used. The guides are available on www.schneider-electric.com
