

EcoStruxure™ IT Advisor

Running your data center without accurate visibility, efficient energy management, effective asset management, and streamlined workflows exposes you to unexpected costs, downtime, and delayed deployments.

EcoStruxure IT Advisor gives you a clear **digital twin** of your data center, so you know what you have and how it's performing. It helps you stay in **control** of your IT and facility assets, quickly test changes, and **optimize** space, power, and cooling for smarter, more efficient operations.

Key Benefits

A clear digital twin of the data center

Creates a visual, digital model of all physical assets (racks, servers, power paths, cooling, and space).

Predictive impact analysis

Simulates failures or changes and shows how they will affect the data center.

Smarter capacity planning

Helps to understand exactly where new equipment can safely be placed, how much power is available, and whether cooling is sufficient.

Streamlines workflows

Automates workflows, reduces human error, and standardizes processes for physical infrastructure changes.

See more.
Plan smarter.
Run stronger.

EcoStruxure IT Advisor

gives data center teams a single, accurate **digital twin** that unifies asset data, **optimizes** capacity, and reduces OpEx while improving **uptime planning**.

Optimization

Organisations optimize energy use and sustainability impact across the data center. They choose deployment models that support long-term strategy. Continuous insights help lower cost and improve performance over time.

Control

Operators monitor capacity, track changes, and manage assets across all sites. This prevents overloads or unexpected issues during day-to-day operations. Teams stay in control with clear, timely insights.

Digital Twin

A data center digital twin shows racks, power, cooling, and dependencies in one model. It highlights capacity risks or conflicts before equipment is deployed. This prevents mistakes and increases confidence in planning.

Make smarter decisions with the power of digital twin

EcoStruxure IT Advisor creates a virtual model of every asset so you can simulate changes, predict impacts, and optimise capacity with confidence. Reduce risks and avoid costly mistakes with an **on-prem or cloud-based deployment**.

IT Advisor Mobile

Available as part of IT Advisor 10.0 subscription and can be downloaded from the App Store and Google Play. It is a mobile data center visualization app that enables:

Reduced manual workload through automated rack and asset capture

Always accurate inventory that eliminates errors and discrepancies

Faster change processes with real time updates directly from data center floor

Higher operational confidence thanks to improved data quality and compliance

Learn more about IT Advisor Mobile app here

IT Advisor Mobile turns regulatory pressure into operational efficiency. With accurate, real-time field documentation, you stay compliant with EU and global standards while eliminating time-consuming manual audit prep

Integrated Solutions in IT Advisor

Deployment Solutions for IT Advisor

Software Installation and Configuration

Deployment services designed to ensure your EcoStruxure IT software is installed, configured, and optimized using industry best practices, delivering fast, low risk, high-quality deployment outcomes.

Software Customization

It delivers a cohesive, end to end integration layer that connects EcoStruxure applications, including power monitoring, building management, and data center infrastructure management with the tools and platforms customers rely on every day.

Software Education

Comprehensive training on EcoStruxure IT solutions for customers and partners.

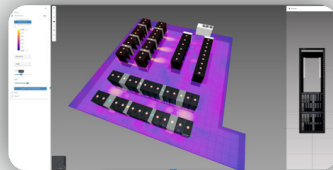

Integrated Cooling Solutions in IT Advisor

As IT loads rise, smart cooling becomes the shield that keeps your data center running reliably

IT Design CFD Integration

Predictive Airflow Insight for Better Planning

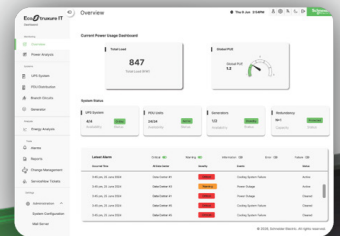

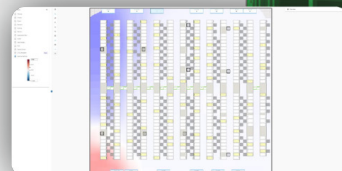

- Simulates and visualizes airflow patterns to identify risks, recirculation, and inefficiencies.
- Supports smarter capacity planning by predicting thermal issues before deployment.
- Available inside IT Advisor or as a standalone advanced airflow modeling tool.

EcoStruxure IT Advisor: Cooling Optimize

Real-Time Automated Efficiency

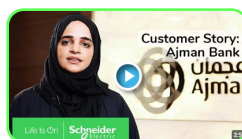

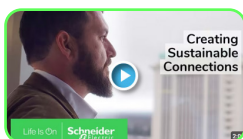

- Uses machine learning and closed loop automation to continuously balance cooling with actual thermal conditions.
- Adjusts cooling equipment in real time to eliminate hotspots and reduce energy consumption.
- Integrates with IT Advisor to adapt instantly to live IT loads with minimal manual effort.

IT Advisor in DCIM

DCIM unifies planning, monitoring, control, forecasting, and reporting. **EcoStruxure IT** Advisor plays a core role within a DCIM ecosystem. Its role is to help data center, colo, and hybrid IT operators design, plan, model, and manage physical infrastructure with high accuracy and lower operational risk.

EcoStruxure™ IT Advisor is moving to subscription

EcoStruxure™ IT Advisor is evolving to give you a **simpler, more flexible** way to license, manage, and scale your data center management software.

Starting in **June 2026**, IT Advisor will move to a subscription based model with a simplified Commercial Reference (CR)* structure, designed around how you operate and grow your data center.

**Commercial references (CRs) may also be referred to as part numbers, SKUs, or Item #s*

What is changing?

The new IT Advisor subscription model makes it easier to get exactly what you need today and as your data center evolves:

- Subscription by rack count so you only pay for what you use
- Flexible subscription terms with 1, 3, or 5 year options
- Choose your deployment: On premises or SaaS/Hosted
- Everything included (no separate modules or add on support costs)

You get full access to IT Advisor capabilities **in one simple subscription.**

New IT Advisor CRs as of June 3rd, 2026:

On-premises Subscription

# Racks	IT Advisor 1 Year Digital On-Premises Subscription	IT Advisor 3 Year Digital On-Premises Subscription	IT Advisor 5 Year Digital On-Premises Subscription
1-99 Racks	SWITA1YR-DIGI	SWITA3YR-DIGI	SWITA5YR-DIGI
100 Racks Bundle	SWITA1YR100R-DIGI	SWITA3YR100R-DIGI	SWITA5YR100R-DIGI
500 Racks Bundle	SWITA1YR500R-DIGI	SWITA3YR500R-DIGI	SWITA5YR500R-DIGI

SaaS/Hosted Subscription

# Racks	IT Advisor 1 Year Digital On-Premises Subscription	IT Advisor 3 Year Digital On-Premises Subscription	IT Advisor 5 Year Digital On-Premises Subscription
