

Combine safety and performance

Masterpact and Compact Micrologic trip units provide outstanding protection as well as an integrated measurement unit to help you monitor power conditions and manage energy consumption.

Building & Infrastructure

Power management and monitoring

- > Optimize power consumption
- > Cost allocation
- > Integration in a Building Management System through communication.

Industry

Power metering and control

- > Advanced protection
- > Alarming and programmable contact
- > Cost allocation
- > Diagnostic and maintenance
- > Continuity of service
- > Load trend monitoring
- > Integration in a supervision and control system through communication (SCADA, DCS, etc.)
- > Management of energy quality.

IT

Critical Power

- > Power availability
- > Suitable for specific and advanced protection
- > Diagnostic and maintenance
- > Load trend monitoring
- > Integration in a supervision and control system through communication
- > Management of energy quality.

Marine

High current protection

- > Specific motor protection
- > Total discrimination
- > Diagnostic and maintenance
- > Optimized size solution
- > Integration in a supervision and control system through communication (SCADA, DCS, etc.)
- > Continuity of service.
