Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy:

Reuse ⇒ Separation for special treatment ⇒ Other dismantling ⇒ Shredding

The components of the products that optimize the recycling performances are listed, identified and located hereunder.

This LXM23 contains electrolytic capacitors which may cause electrical shock during the end of life treatment process. BEFORE SERVICING, REMOVE ALL POWER and WAIT 15 MINUTES.
