

Product End-of-Life Instructions

Product Range: Exyway Easyled

Marketing Model/Name: EXIWAY-EASYLED IP42 L/170SA/1NC/Tref.OVA38356

Purpose:

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note :

This product family *is* in the scope of EU directive 2002/96/EC, Waste Electrical and Electronic Equipment (WEEE).

Size in mm:

H x L x D in mm: 116x292x37

Weight without battery: 392g

Weight with battery: 526g

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy : Reuse → Depollution → Dismantling → Shredding.

The components of the products that are recommended to be depolluted (according to the WEEE 2002/96/EC list) or that are recommended to be reused or dismantled so as to improve the material recovery or that lead to some hazard are listed, identified and located hereunder.

The diagram illustrates the recommended end-of-life treatment steps for a device. It shows three main components being identified and separated:

- 3: Plastic part (1/3)**: The top outer casing of the device.
- 2: Battery**: The internal power source.
- 1: Printed circuit board**: The main electronic component.
- 3: Plastic part (2/3)**: The middle section of the device housing.
- 3: Plastic part (3/3)**: The bottom outer casing of the device.

Number on drawing	Components	Weight	Comment
Components listed for depollution			
1	Printed circuit board	67g	1 part
2	Battery	134g	1 part
Components listed for dismantling operation which improves the recycling performance			
3	Plastic parts	336g	3 parts
