Product End-of-Life Instructions

Easergy T300
Product End-of-Life Instructions – EoLi

Product overview

Product Range: Easergy T300
Marketing Model/Name: EMS59000
Size: \( H \times L \times D = 195 \times 270 \times 210 \) mm
Weight = 5452 g

Purpose

The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Note:

This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE).

Additional information

Energy-efficiency:

This product family is available with following phases: active and standby. The availability of modes is as follow: active 95 %, standby 5 %.

Resource-efficiency:

The recyclability potential of the products has been evaluated using the “ECO DEEE recyclability and recoverability calculation method” (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

According to this method, the potential recyclability ratio without packaging is: 51%.

As described in the recyclability calculation method this ratio includes only metals and plastics which have proven industrial recycling processes.

Operations recommended for the end of life treatment

There are several steps to process the products at the end of life so as to recover components, materials or energy:

- Reuse → Separation for special treatment → Other dismantling → Shredding

<tr>
<th>HAZARD OF ELECTRIC SHOCK, ELECTRIC ARC OR BURNS</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Before performing any intervention:</td>
</tr>
<tr>
<td>• Turn off all power supplying the protection relay and the equipment in which it is installed before working on it.</td>
</tr>
<tr>
<td>• Always use a properly rated voltage sensing device to confirm that power is off.</td>
</tr>
<tr>
<td>• Replace all devices, doors, and covers before turning on power to this equipment.</td>
</tr>
<tr>
<td>• Apply appropriate personal protective equipment and follow safe electrical work practices. See local regulation.</td>
</tr>
</tbody>
</table>

Failure to follow these instructions will result in death or serious injury.
Product End-of-Life Instructions – EoL

The components of the products that optimize the recycling performances are listed, identified and located hereunder.
SC150 & LV150 are quite similar.
