

Product End of Life Instructions

SPACELOGIC KNX DALI GATEWAY PRO

End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Electronic Board (Communication) > 10cm ²	4.8	Including all soldering parts
To be depolluted	2	Electronic Board (Communication) > 10cm ²	13.8	Including all soldering parts
To be depolluted	3	Electronic Board (Communication) > 10cm ²	16.7	Including all soldering parts

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	The SpaceLogic KNX DALI Gateway Pro is a building automation device that bridges KNX and DALI systems. Its primary function is to control DALI-compatible electronic ballasts via the KNX installation bus, enabling centralized lighting management. It supports KNX Security and DALI 2.0 multi-master certification, ensuring secure, flexible, and energy-efficient lighting control for modern buildings.
Product reference	MTN6725-0101
Additional similar product references	MTN6725-0101
Total representative product mass	173 g
Representative product dimensions	72mm x 65mm x 90mm
Accessories	KNX bus connecting terminal and shrink tube.
Date of information release	11-2025

Additional information

Legal information	This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.
In case of special transportation: transportation method	No Special Transportation required
Recyclability potential	0% The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
