

Product End of Life Instructions

SpaceLogic Controller Terminal Base TB-IO-W1-2

🔧 End of Life Instructions

Recommendation	Number on drawing	Component / Material	Weight (in g)	Comment
To be depolluted	1	Printed Circuit Board Assy	15,7 g	
To be depolluted	2	Connectors	46,2 g	
To be dismantled	3	Plastic parts (Base+Din-rail clip)	63,34 g	

Product description

Manufacturer identification	Schneider Electric Industries SAS
Brand name	Schneider Electric
Product function	The SpaceLogic TB-IO-W1-2 is a terminal base for the SpaceLogic Central I/O Modules. It provides the I/O bus to the SpaceLogic Central I/O electronics module and it is required for each I/O module to allow the site to be wired prior to installation of the modules with the application program and data is supplied. It is usually installed on a wall-mounted DIN rail oriented horizontally for efficient ventilation and for making replacement of the electronics module easy. (This document describes the different stages of the product, from manufacturing to its end of life. For its end of life optimization, any dismantling or separation of parts required is carried out as mentioned in the EOLI document and in accordance with EU regulations, viz. WEEE)
Product reference	SXWTBIOW110002
Additional similar product references	SXWTBPSW110002
Total representative product mass	121,31 g
Representative product dimensions	114 x 90 x 42
Date of information release	2024-11-12

Additional information

Legal information

This product family is in the scope of European Union directive 2012/19/EU on Waste Electrical and Electronic Equipment (WEEE). The product family must be disposed according to the legislation of the country. This document is intended for use by end of life recyclers or treatment facilities. It provides the basic information to assure an appropriate end of life treatment for the components and materials of the product.

Recyclability potential

0%

The recyclability rate was calculated from the recycling rates of each material making up the product based on REEECY'LAB tool developed by Ecosystem, for components/materials not covered by the tool, data from the EIME database and the related PSR was taken. If no data was found a conservative assumption was used (0% recyclability).
