Product Environmental Profile

LA/LH Molded Case Circuit Breaker

General information

Representative product	LA/LH Molded Case Circuit Breaker - LAL36400
Description of the product	The main purpose of the LA/LH Molded Case Circuit Breaker (MCCB) product range is to provide a means to manually open a circuit and to automatically open a circuit under overload or short circuit conditions.
Functional unit	Protect during 20 years the installation against overloads and short-circuits in circuit with assigned voltage 600 Vac and 250 Vdc and rated current 400A. This protection is ensured in accordance with the following parameters: - Number of poles Np : 3 Poles - Rated breaking capacity Icn : 22KA - Trip unit type: Thermal-magnetic - Tripping curve Cd : long time, short time and instantaneous protections

Constituent materials

Reference product mass	7503 g	including the product, its packaging and additional elements and accessories

	Plastics	37.2%
	Metals	45.2%
	Others	17.6%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website
http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page

Additional environmental information

The LA/LH Molded Case Circuit Breaker presents the following relevent environmental aspects	
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 1276.6 g, consisting of Cardboard (93.5%), PE film (3.33%), Paper (2.4%), Various (0.7%) Product distribution optimised by setting up local distribution centres
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials are accounted for during the installation phase (including transport to disposal).
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process. Recyclability potential: **48%** Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	20 years			
Product category	Circuit-breakers			
Installation elements	No special components needed			
Use scenario	Product dissipation is 32 W at 100% Load rate and 8 W at load rate / rated current (In): 50 % of In & percentage of utilization time: 30%			
Geographical representativeness	USA			
Technological representativeness	The Modules of Technologies such as material production, manufacturing process and transport technology used in this PEP analysis (LCA-EIME in this case) are Similar and representative of the actual type of technologies used to make the product in production			
Energy model used	**Manufacturing**	**Installation**	**Use**	**End of life**
	Energy model used: Mexico	Electricity mix; AC; consumption mix, at consumer; 120V; US	Electricity mix; AC; consumption mix, at consumer; 120V; US	Electricity mix; AC; consumption mix, at consumer; 120V; US

Compulsory indicators	LA/LH Molded Case Circuit Breaker - LAL36400						
Impact indicators	**Unit**	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	1.09E-01	1.09E-01	0*	0*	0*	0*
Contribution to the soil and water acidification	kg SO_2 eq	4.20E-01	1.93E-01	4.42E-03	3.49E-04	2.21E-01	1.99E-03
Contribution to water eutrophication	kg PO_4^{3-} eq	8.56E-02	2.20E-02	1.02E-03	3.39E-03	5.86E-02	5.60E-04

** represents less than 0.01% of the total life cycle of the reference flow*

Life cycle assessment performed with EIME version EIME v5.8.1, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number	ENVPEP1410004_V2	*Drafting rules*	PCR-ed3-EN-2015 04 02
Date of issue	11/2020	*Supplemented by*	PSR-0005-ed2-EN-2016 03 29
Validity period	5 years	*Information and reference documents*	www.pep-ecopassport.org

Independent verification of the declaration and data

Internal X External

The elements of the present PEP cannot be compared with elements from another program.

Document in compliance with ISO 14021:2016 « Environmental labels and declarations - Self-declared environmental claims (Type II environmental labelling) »
