

Product Environmental Profile

C-Bus Smart Home(Network) Automation Controller

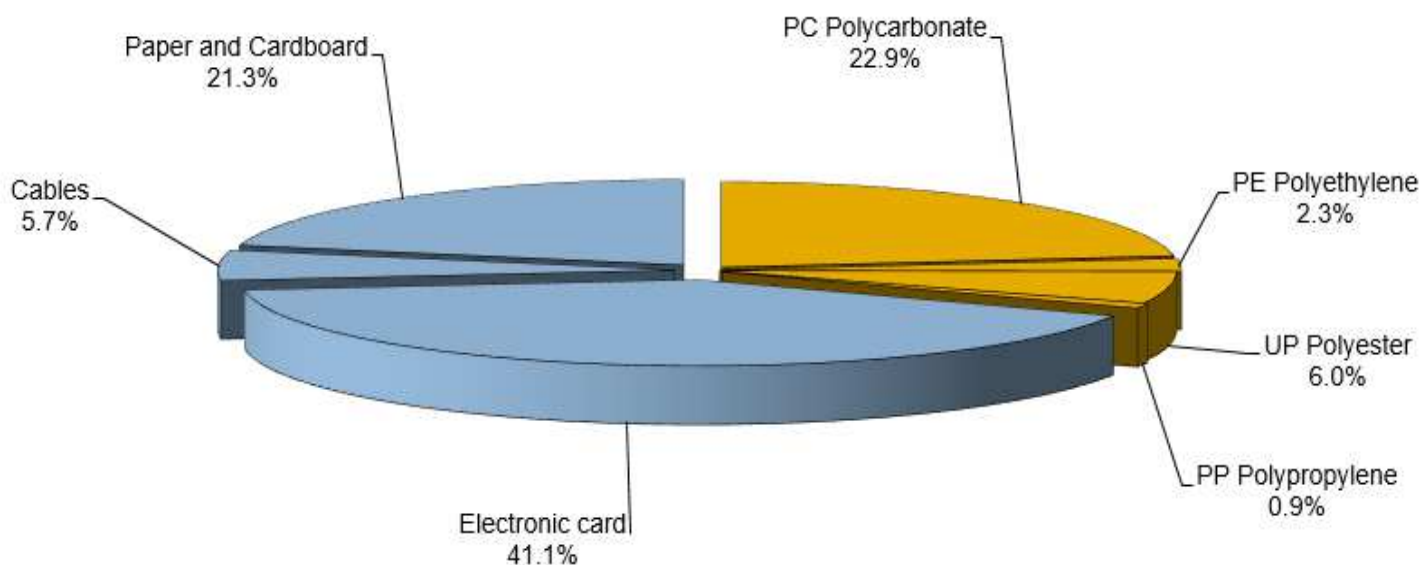

General information

Representative product	C-Bus Smart Home(Network) Automation Controller -LSS5500SHAC
Description of the product	This product is an automation controller.Customer could control the device like lighting to comply with C-Bus protocol via this product from PC toolkit.
Functional unit	To automate the control of the lighting for homes/buildings with the C-Bus lighting system installed for 10 years. Eg schedules The supply voltage is 24V DC. The supply current is 0.42A maximum (10W maximum) This product does not supply C-Bus current, so that is not relevant. It consumes C-Bus current, at 32mA. The rated temperature is -5 to +45 deg C There are 2 C-Bus Connectors, both of which are RJ45 style.

Constituent materials

Reference product mass 383 g including the product, its packaging and additional elements and accessories

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The C-Bus Smart Home(Network) Automation Controller presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 111 g, consisting of Carboard (70%), PET film (1%), Paper (6%) Foram (23%) Product distribution optimised by setting up local distribution centres
Installation	Ref LSS5500SHAC does not require any installation operations.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains electronic card (163g) Cable (20g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 23% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Product category	Passive products - non-continuous operation			
Installation elements	No special components needed			
Use scenario	Product dissipation is 10 W full load, active Time repartition is 1%			
Geographical representativeness	Australia			
Technological representativeness	This product is an automation controller. Customer could control the device like lighting to comply with C-Bus protocol via this product from PC toolkit.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: China	Electricity mix; AC; consumption mix, at consumer; 240V; AU	Electricity mix; AC; consumption mix, at consumer; 240V; AU	Electricity mix; AC; consumption mix, at consumer; 240V; AU

Life cycle assessment performed with EIME version EIME v5.5, database version 2015-04.

The manufacturing phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
