

## Release Note

---

### Schneider Charge firmware version 2.1.2

Date: 30-10-2025

- **Document scope**

This release note presents the new features and modifications added to Schneider Charge charging station. Download the update file from the [Schneider website](#)

### Contents

#### **New features:**

- It is aimed to be compatible with two suppliers of T2S sockets.

#### **Enhancement:**

- The FW upgrade duration has been shortened to less than 70% compared to the previous version.

#### **Bugs Fixed:**

- The charger can successfully connect to Wifi SSID containing special characters—such as comma, hyphen etc. For maximum reliability, we still recommend using plain letters and numbers whenever possible.
- The charging station will respond to the supervision system after receiving the command "TriggerBackendConfigurationDataReset".

#### **Known limitations:**

- The Wi-Fi network detection may fail in some cases when doing the commissioning with eSetup or with Wiser Home. Due to the presence of encrypted and unreadable hotspots (which results in failure to interpret the Wi-Fi list), installers and customers must manually enter the Wi-Fi SSID and password to configure the charging station's network settings.
