Food Safety & Traceability

EcoStruxure™ enables trust in the Food & Beverage, Household and Personal Care industries
Our mission is to be your digital partner for Sustainability and Efficiency
Rethinking next generation industries: business resilience and sustainability performance for lifecycle integrated management
We help on every step of the value chain

Efficient facilities
Safer, more available, and greener resources

Resilient supply chain
Manage complexity and improve visibility

Agile manufacturing
Boost manufacturing flexibility & efficiency
... enabled by transversal digital transformation capabilities

Food Safety & Traceability
Ensure compliance and increase trust across the whole value chain

Energy & Sustainability
Reduce environmental footprint and meet sustainability goals

Asset Performance
Maximize return on asset investment

Workforce Empowerment
Take teams efficiency to the next level

Digital Engineering
Cut time, cost and risks of capital project engineering
Ensure compliance and trust across the product life cycle

**Manage your suppliers**
Get visibility into your entire suppliers’s network, check their compliance and identify your risks

**Digitize your compliance**
Automatically document evidence of proper operation using digital tools and workflows

**Reinforce your Food Defense**
Protect your facilities from any unauthorized physical or cyber access

**Monitor downstream logistics**
Track and trace products and critical control points to guarantee product safety and protect your brand image.

**Achieve End to End traceability**
Increase visibility across your entire Value Chain, from raw materials to finished goods to improve transparency and trust for your end-consumers.

**Build a credible Value Chain**
Up to 75% time reduction in compliance

**Achieve Best-in-class defence in depth**

**Up to 100% first time good quality**

**Ensure consumer trust**
Food Safety & Traceability

Ensure compliance and trust across the product life cycle

End to End Traceability
Increase visibility across your entire supply chain to build a sustainable Value Chain

Digitize your compliance
Automatically document evidence of proper operation using digital tools and workflows

 Suppliers Information Management
Get visibility into your entire suppliers' network, check their compliance and identify your risks

Fields & Farms → Cooperative → Raw Materials → Manufacturing → Products → Distribution → Retailer → Consumers

Food Defense & Cybersecurity
Protect your facilities from any unauthorized access and ensure the right in-depth defense for your IT and OT systems

Monitor downstream logistics
Manage efficiently your assets tracking, performance and maintenance to optimize your supply chain logistics
Achieve end to end traceability
Increase visibility across your entire supply chain to build a sustainable Value Chain

• Connect the entire value chain end-to-end
  Collect and organize siloed data from your suppliers, your production sites and your logistic to get immediate access to information needed to answer questions from your stakeholders, staffs, auditors and customers on your products and practices

• Increase visibility to real performance and risks
  Build a more credible and resilient supply chain and comply to latest standard and regulations, by identifying issues sooner and better estimating the risks associated

• Enable transparency
  Provide selected information to end-consumers to increase trust, improve brand loyalty and create a competitive advantage
Track your entire operations to reduce company exposure in case of quality or compliance issue.

Agility and resilience add considerable risks to quality and food safety which can be mitigated through the digitalization of traceability information both within the plant and across the supply chain.
EcoStruxure™ Traceability Advisor
A complete suite of Flexible, Open and Scalable solutions

Origin Module
- Map your suppliers & identify risks
- Check certificates compliance
- Ensure a credible transparent supply chain

Digital solutions for the plant
- Plant traceability is a prerequisite in this journey
- Paperless solutions for your plant

Track & Trace Module
- Anti-Counterfeiting
- Digital tax verification
- Supply chain optimization
- Events tracking
- Inventory management

PIM Module
Product Information Management
- Your single source of truth and trust for your product data
- Increased data accuracy and availability
- Operational efficiency: reduction in labour costs and time to market

Food Safety Module
- Save time in recalling your products in the supply chain
- Cost savings in product recall batch sizes
- Cost savings on insurance premiums

EcoStruxure Traceability Advisor
Providing End-to-End traceability and transparency solutions across the supply chain

- « Origin » traceability/transparency
- Processing traceability
- Distribution traceability
- Customer experience

Upstream
- Fields
- Farms
- Cooperative

Plant
- Manufacturing

Downstream
- Warehouse
- Retail
- Consumers

MODULAR & SCALABLE
- Based on a set of modules
- Potentially: Independent or Integrated
- Start with your business priorities
- Start Small and Scale fast

OPEN
- Through API or other technologies
- Connect your solution Eco-system: ERP, LIMS, WMS...
- Data model based on Standards (ISA88-ISA95), Web Ontology W3C
- GS1 compliant (GDSN, EDI,...)

GLOBAL
- Global and worldwide support
- Common Cybersecurity policies
- Hosting Services (SLA, 24/7...)
- Worldwide footprint in term of: Project Execution, Rollout,...

EVOLUTIVE
- It’s a journey, a complete digital transformation
- New components integration: Transportation (cold chain management, CRM (customer relationship), advanced planning / forecasting and analytics...)
- Blockchain Technology
- IT and OT Convergence
- Based on our IOT platform, Datahub

EcoStruxure™ Traceability Advisor - Food Safety Management

Ensure fast and accurate product recall at the right granularity level

Key Capabilities

Your operational tool providing full real-time visibility on the traceability of your finished goods: efficiently determine the upstream scope of a Food Safety issue

- **Product Search**: Determine which products may need to be withdrawn by deep-diving into product and production data (e.g. product information, equipment data, ingredients data)

- **Product Investigation**: Identify where incriminated products are in the downstream supply chain by leveraging product lots, batch information and unique identity numbers at the desired granularity level (Pallet, Carton, Box, Item and Batch)

- **Product Food Safety Metrics**: Identify which partners to contact, where the products are located, and what is the completion status of the Food Safety incidents

Launch Q3 2021
EcoStruxure™ Traceability Advisor- App
Connecting the entire Value Chain into a single App

Manage Food Safety & Traceability

Ensure compliance and increase trust across the whole value chain

• Manage your **calibration process** digitally to streamline operations and ease audits.

• Manage your **manufacturing process** in a **paperless** way and document automatically evidences of good manufacturing practices.

• Implement **Food Defense** with proper access control & cybersecurity protection.

• **Track and trace** raw materials and products across the whole supply chain to increase transparency and protect your brands.

• **Monitor cold chain** to guarantee product safety.
