Give shape to your customers' desires

Your customers are seeking products that look elegant, make their lives easier, and add comfort and convenience, of course. But what they really want are products with personality, style, and class. Your customers love the look and feel of noble materials, but not their price tag.

Sedna Design/Elements was designed with your customers in mind. Available in a broad palette of finishes, Sedna offers irresistible style. It is the perfect source of inspiration and a must for today's on-trend interiors.

Now you can give your customers everything they need to bring their ideal interior decor to life.

Luxury details in an accessible product range

Sedna Design/Elements is a premium range, with products that come in a variety of contemporary colors and textures that bring the look and feel of wood, stone, metal, and glass into your customers' homes. Your customers will love everything about these beautiful, hyper-realistic finishes, including their affordable pricing.

With Sedna, your customers can bring their ideas to life down to the finishing touches and express their personal style with a range of switches that suits their tastes and budget.

Style

Bold and sophisticated

Sedna is a new generation of electrical switches inspired by fashion and interior design.

With modern lines that reflect today's trends and a refined aesthetic, Sedna is more than an afterthought. It is the final touch that adds polish to your customers' interiors.

With two versions to choose from – Design and Elements – you can mix and match insert and cover frame finishes to respond to all of your customers' home decorating styles and preferences, from industrial to vintage, nature, and glam.

Sedna Design

Sedna Elements

Smart home solutions

Greater comfort at home

With Wiser, the new Sedna range is also a simple smart home solution that responds to your customers' needs and lifestyles.

A room's lighting and roller shutters can be controlled via the Wiser smartphone app and "Moments" can be created in just a tap to create the perfect ambiance for different times of day and activities.

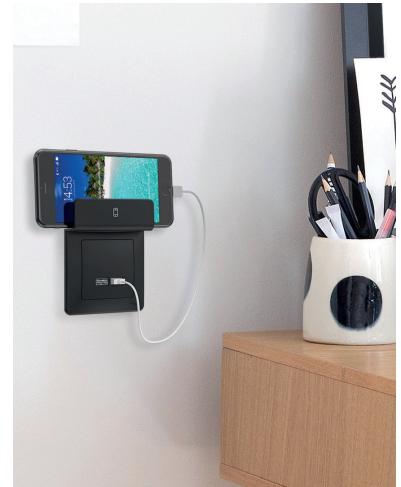

Simple to configure and easy to use, Sedna and Wiser are the winning duo for greater comfort and convenience in your customers' homes.

Functions

Something to meet every need

Switches and outlets, roller shutter switches, plus thermostats and USB chargers... Sedna offers all of the modern functions you need to exceed your customers' expectations and bring greater comfort and convenience to people of all ages.

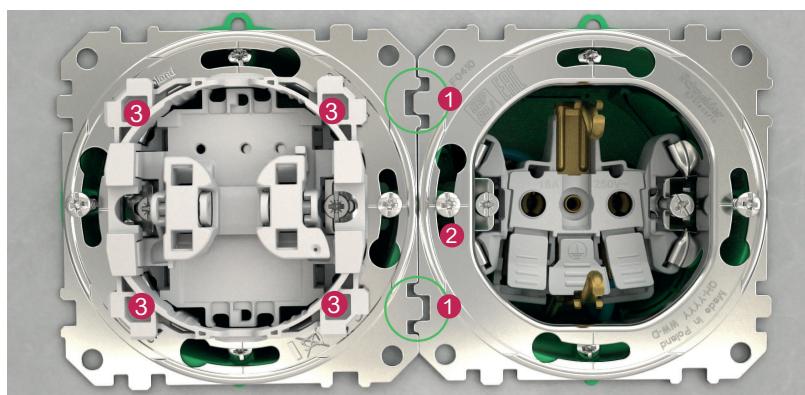

Installation

Save time and deliver an impeccable finish

Sedna goes even further in terms of ergonomics, ease of installation and use, reliability, and quality finishes. And the new Sedna platform was designed with your needs in mind, with features like:

- Universal cover frames for 1 to 5 functions can be installed horizontally or vertically.
- All cover frames for Sedna Design and Sedna Elements are also IP20 and IP44 rated, for four times fewer product numbers.
- Cover frames are mounted using an 8-point clip-in system to ensure that they are perfectly flush with the wall.
- Interlocking mounting frames align perfectly.

These features, combined with quality manufacturing and materials, will very rapidly make Sedna your range of choice for all of your electrical installation projects.

Some new features

- 1 - Interlocking mounting frame, to align multiple devices easily.
- 2 - Screw slots, to compensate wall boxes that have been misaligned.
- 3 - Eight mounting points, for a simple and reliable frame fixing.

Sedna Design/Elements

Because your customers are looking for something new

Whether it is fashion or home decor, your customers like to mix things up.

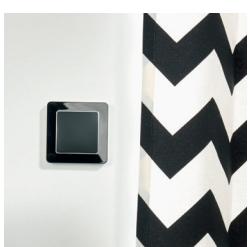

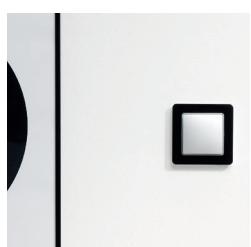

Today's homes juxtapose contemporary and vintage pieces and are not afraid to blend luxury items with big-box-store purchases.

And, because your customers are always on the lookout for something new for their home interior, they need switches that reflect the latest trends.

A world of possibilities

When we sat down to design Sedna, one of our goals was to give your customers limitless possibilities by allowing them to combine insert and cover frame finishes in any way that inspires them.

To give you an idea of all that is possible, you can combine a Sedna Elements Wood cover frame with a Wood rocker insert, of course. But why not try it with a Sedna Design Anthracite insert...or any other Sedna insert that complements your customer's room.

Say goodbye to dust

The cover frame edges are rounded, curving around toward the wall. The shape was designed specifically to prevent from dust catching. And the glossy materials were chosen for their good looks, of course, but also for low dust deposition.

Mix it up...even with multi-gang frames

All 1-5 gang cover frames are available in all finishes and can be mixed and matched with all insert finishes.

Sedna Design

Standout style

The Sedna Design range's modern, sophisticated lines and four finishes were designed to complement today's modern interiors and create refined and inviting ambiances. Sedna's gentle contours are a pleasure to touch and the perfect finish is silky smooth.

Aluminium

Anthracite

**IP44
protection
degree**

IP44 protection is provided with any Sedna Design frame when IP44 insert is installed. IP44 inserts are equipped with gaskets to protect the inserts from splash water.

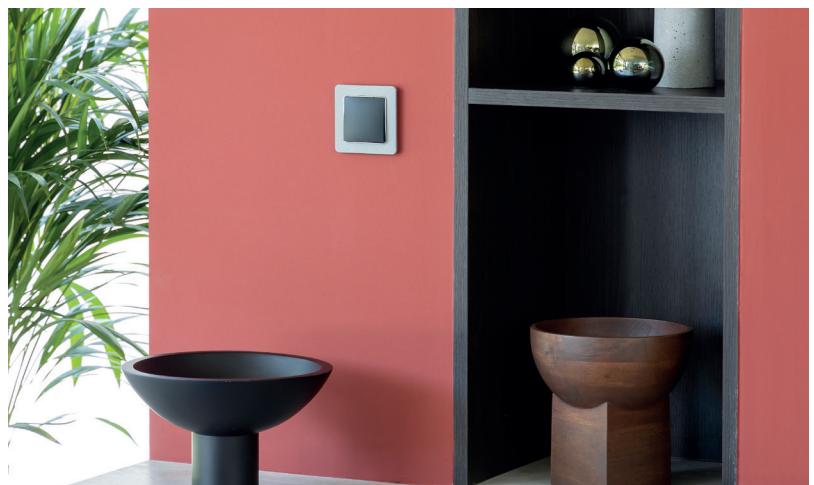

Sedna Elements

Make an impression

A subtle blend of flat and curved shapes in a very structured design gives Sedna Elements an innovative appeal.

The rounded profile creates the illusion that the switch is not flush with the wall but rather floating in front of it, bringing both lightness and elegance.

Sedna Elements finishes look and feel like glass, wood, metal or stone.

Sedna Elements

Wood Impression

If your customers are looking for a warm, authentic interior, there's nothing like the look and feel of wood.

Wood resonates with the human desire to live in alignment with nature and reconnect with our origins. And the color and grain of wood brings a richness that has become a must in today's interiors.

Birch

Birch / Anthracite

Wenge

Wenge / Aluminium

Sedna Elements

Stone Impression

Raw, unfinished materials are ever present in many of today's hottest interior design trends. Slate and its more contemporary cousin, concrete, are solid and grounding. Used in unexpected ways, these materials reveal a different kind of beauty, a lightness even.

Concrete matt / Anthracite

Slate matt / Aluminium

Sedna Elements Glass Impression

Glass can reflect light or let it through, or both, creating some interesting visual effects. The beautiful glossy finish—in White or Black—will add that “wow” factor to any interior design scheme. The deep, refined Smoke matt finish is undeniably elegant.

White glossy

Smoke matt / Aluminium

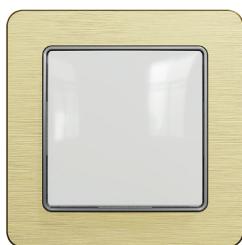

Black glossy / Anthracite

Sedna Elements Metal Impression

Metal is simply on-trend. And metal is uniquely able to bring both energy and class to an interior design scheme. Your customers will love the very glam Brushed Gold finish. And, for something more discreet, you simply can't go wrong with Brushed Aluminium.

Meet your customers'
expectations for comfort
and convenience

Wiser and Sedna: A smart home right from your smartphone

Your customers are looking for simple, attractive solutions that make their lives easier and more enjoyable every day. With new Wiser connected functions, Sedna brings a whole new level of comfort and convenience. Once your customers experience Wiser, they won't know how they ever did without it.

Wiser: Putting the smart in smart home

Wiser is a range of connected switches and sensors that let your customers:

- Manage lighting and roller shutters, either individually or in groups for a single room or the entire home.
- Make the home safer by detecting water leaks, abnormally high temperatures, and windows left open in unoccupied rooms.

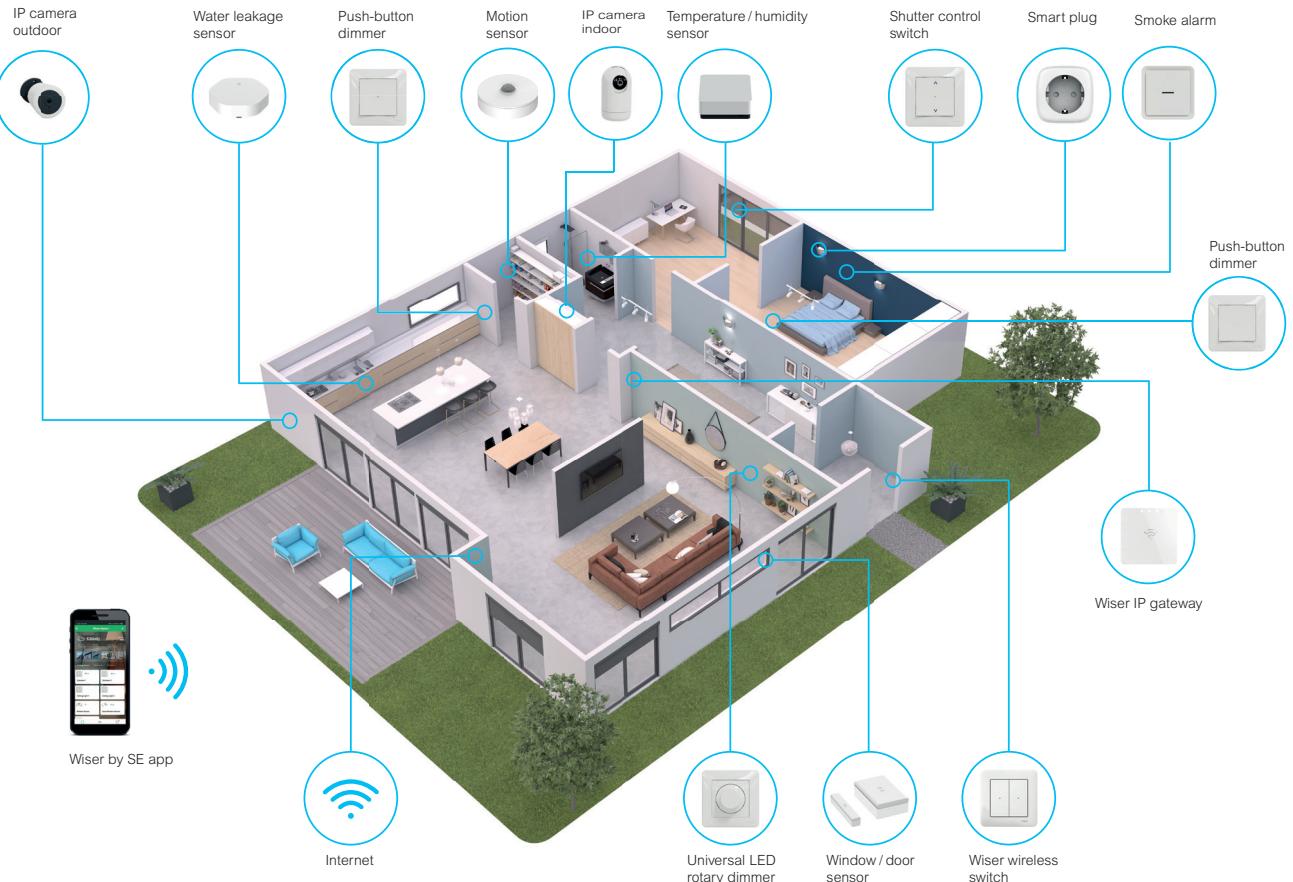

All Wiser products are connected via the Wiser IP Gateway and can be controlled anytime from anywhere with a simple smartphone app.

Wiser: A flexible and expandable solution for every home

One of the advantages of Wiser is that you can get your customers started with a few products in a single room and gradually add more products and rooms to the system.

Sensors to detect e.g. water leakage, temperature, humidity or motion can also be added to the Sedna smart home for more comfort and peace of mind.

Works with
Wi-Fi™

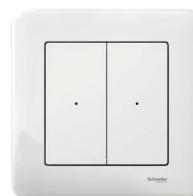

Create special Moments for your customers

Wiser is a connected solution that lets you bring your customers a truly personalized and totally versatile experience. With Wiser, you can quickly and easily create ambiances to suit your customers' preferences. And your customers can then activate the ambiance they want in just a click. At any time!

A Moment for every activity

With Moments, your customers will no longer need to go around a room and adjust all of their lights and shutters individually to create the atmosphere they want for a dinner party, movie night, reading, or simply napping on the sofa. Moments combine lighting and shutter controls, making it easier than ever to create the ideal atmosphere for any activity.

Wiser wireless switch

Wiser shutter control switch

Wiser push-button dimmer

Wiser motion sensor with push-button dimmer

Simple, effective connected switches

The Wiser Wireless Switch is easy to install anywhere. It communicates via the Wiser IP Gateway to perform functions like turning off all of the home's light switches at once, for example. The smart plug and Wiser app can be used to switch on a reading lamp when the sun goes down...without ever getting up from the sofa! The smart plug also measures the energy consumption of whatever is plugged in to it and displays energy metering data in the app.

Fast, easy programming

A few clicks is all it takes to create Moments or program individual or combined functions right from the Wiser app. Once a Moment has been created, your customers can activate it with just a tap on their phone to get the perfect ambiance for movie night or a dinner party instantly.

Control the home - from anywhere at any time

Wiser brings homeowners comprehensive smart home functionalities that can be easily controlled via the Wiser app – from anywhere and at any time.

Easy set-up

Together, Wiser connected switches and the Wiser app form a solution that is easy to install and set up. Try it once and you will never go back!

Simple app set-up

The Wiser app has a simple, intuitive interface that makes it easy to program your customers' solutions. You don't need any training or special tools. The app will take you step by step through a very simple process. Plus, it works on any smartphone or tablet.

Straightforward configuration and adjustment

Once the switches have been installed, simply configure and adjust...there is no need to remove the insert. All adjustments can be made at any time right from the app.

For smartphones and tablets: the Wiser app is available for both Android and iOS devices.

The smart home with Wiser

Wiser is a comprehensive range of connected functions, with one app to control them all.

Wiser is an ideal partner for private homes, providing a unique experience of smart control over many facets of residential life.

House and garden

To have your lights illuminated when you come home, simply enter your estimated arrival time. They can also be set to illuminate randomly each day while you're away, giving the illusion that someone is at home. Sedna time control push-button switches also allow you to turn garden lights on and off automatically. Simply schedule via the app, and with the astroclock function, times automatically track with seasonal changes.

The Wiser window or door sensor warns you with a push notification on your app, if you have forgotten to close the door or window.

Control all lights

Why not add a Wiser Wireless Switch on the wall next to the front door and program an "all lights off" scene to switch all of the home's lights off at once whenever you go out. The Wiser Wireless Switch is incredibly easy to install. It requires no wiring and programming is super simple.

Living room

"Movie" Moment – the shutters go down; the lights go dim. Just the way you like for a perfect movie night. Roll it.

"Reading" Moment – the indirect lights dim, the spot at the couch switches on, and the shutters open. Feet up.

Kitchen

"Cooking" Moment – the main lights and spots are switched to bright giving plenty of light to create the perfect meal. Bon appétit.

"Dinner party" Moment – tonight's the night; the lights dim, selected spots switch on, and the garden lights complete the scene. Let's party.

The Wiser leakage sensor detects water from any leaking household machine and sends a push notification to your app.

Bedroom

Automatic shutter control

Wiser shutter control push-buttons allow you to open and close individual shutters or groups of shutters by setting your customer's preferences for open and shut times using the Wiser app.

Wiser Wireless Switch

A Wiser Wireless Switch next to the bed lets you turn off lights or close roller shutters without getting up!

Corridor

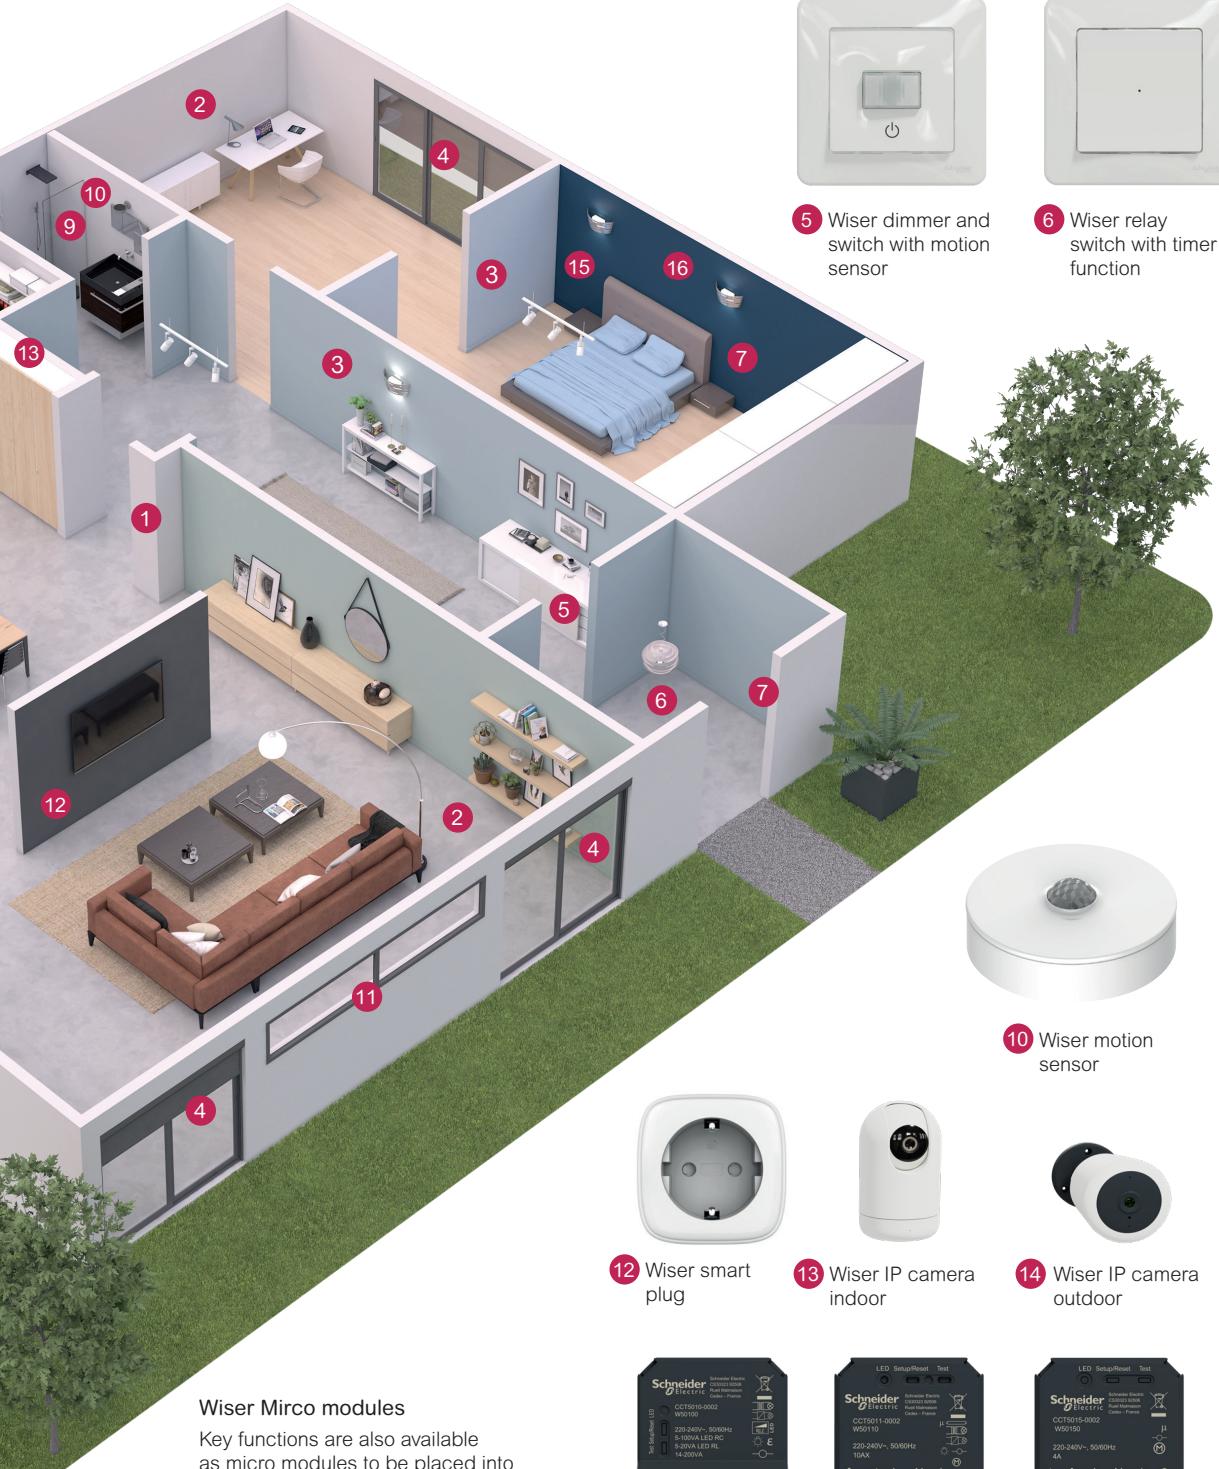

Automatic light control during the day

Sedna includes a motion sensor. During the day when movement is detected the light switches on, and off after a set period of time.

Bathroom

The Wiser humidity sensor

detects if the humidity level is too high and sends a notification to your client's smartphone so that he can open the window and protect his bathroom from mold.

Sedna - Full options Home sweet home

Sedna's design is modern, of course. But so are its many features. You'll have everything you need to bring your customers exactly what they want—sophisticated lighting, limitless connectivity, and energy savings—now and in the future.

Lighting control

Whether you choose a simple pushbutton or a rotary dimmer, both are designed for all types of lighting, even LED. A motion sensor helps reduce electrical consumption to a bare minimum and makes getting around at night.

Shutter control

Shutter control switches let your customers easily open and close their roller shutters to protect their home from the sun and intruders.

Socket outlets

Socket outlets with shutters protect your customer from touching the metal parts under tension. Also available in an IP44 protected version with lid.

Side earth

Side earth and USB
A+A 2.4 A

IP44, side earth

Double socket outlets

To limit the number of holes in walls or the use of multiple socket outlets; also for renovation projects.

Available in white, silver, anthracite, cream, satin birch wood, and wenge wood.

Without frame, side

It's so easy to install
that you will gain
unbelievable time

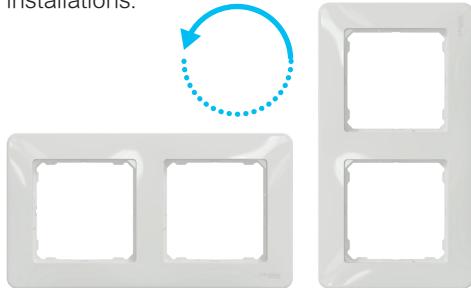

Sedna Design/Elements inserts: designed to meet your needs

At Schneider Electric, we listen to what you have to say, so we understand what you need to be more efficient at work. The new and updated Sedna range is easy to connect, align, fasten, mount, and test! Installation has never been this fast, easy, and convenient.

New features

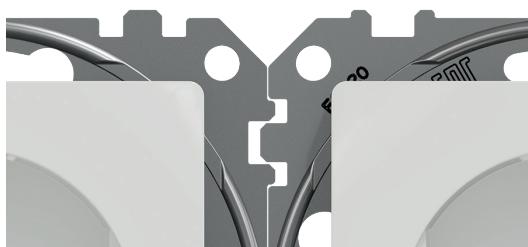

One universal cover frame for horizontal or vertical installation

With its symmetrical design, the same frame can be used for both horizontal and vertical installations.

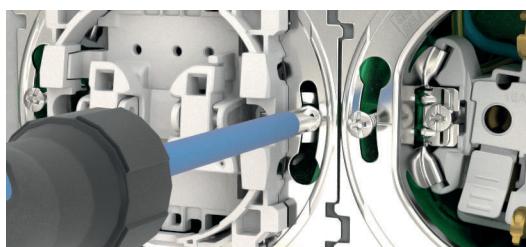

Interlocking mounting frame

Two notches on each side of the frame make it easy to align multiple devices.

Screw slots

The screw slots allow rotation of the insert in either direction, to compensate for wall boxes that have been misaligned.

Wall compensation

The cover frame will sit flush against the wall, even if the wall box does not.

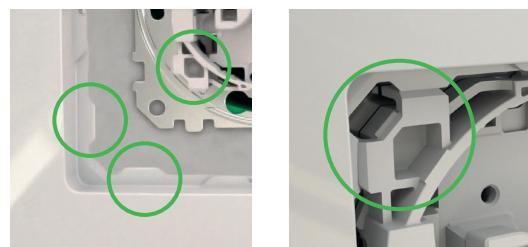

And no more dust

The cover frames shape is designed specifically to prevent from catching dust.

8 mounting points

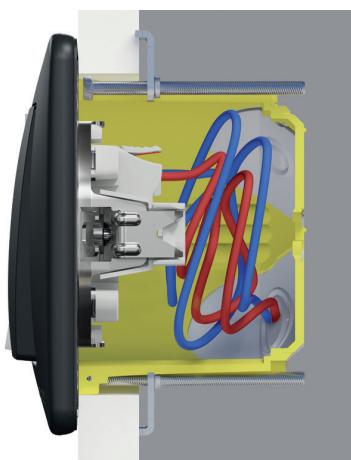

The insertion and fixing of the frame are very easy and reliable thanks to the strong and robust 8 point fixation.

New features

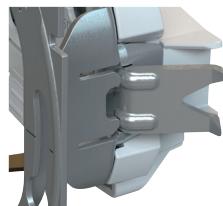

More space for wiring

With a compact design and low profile (24 mm), Sedna switches are easy to wire and mount in the wall box.

Perfect alignment

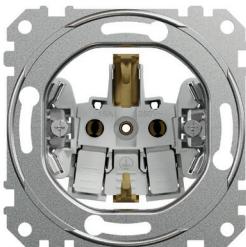

A new mechanism design ensures that claws extend out straight and smooth, for perfect alignment with the wall boxes during assembly.

Socket outlet

Screwless terminal

Flush-mount inserts are simple and fast to install. Sedna screwless socket outlet terminals make wiring easy, quick, and reliable.

Easy-to-use release buttons

The release buttons are easy to access and large so that they are easier to depress. An improved mechanism ensures an even smoother release.

Claws

Protective claws

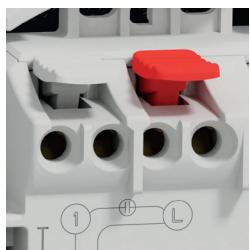

Claws are fully retracted inside the housing so that they cannot catch during installation, for fewer injuries.

Claw-return function

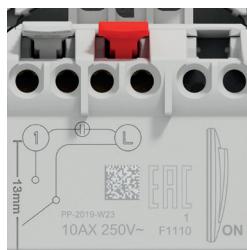

The claw-return function makes mounting and realignment easier.

Switch and pushbutton inserts

Conical cable entries

Conical cable entries make it easier to feed the connection wires into the terminal blocks.

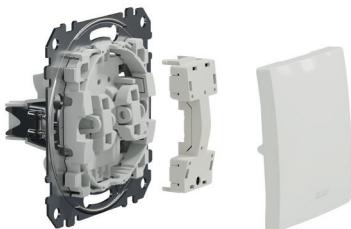

Wiring diagram

The wiring diagram is printed on the rear of the switch and pushbutton base. Here, the switch type and connection options are clearly visible. Switch inserts have "ON" marking helping to install it faster.

Convenient front-side testing

Checkpoints allow convenient testing of all functions and measuring from the front, with no need to disassemble the switch.

Lighting modules

You can now add one of three different LED lighting modules to the new Sedna pushbutton and switch inserts without having to remove the inserts. This is compatible with both new installations and renovation projects.

- LED module indication light, red
- LED module orientation light, blue
- LED light module for hotel key card switch, blue

IP44 protection

IP44 protection is provided with any Sedna Design and Sedna Elements frame when IP44 insert is installed. IP44 inserts are equipped with gaskets to protect the inserts from splash water.

Comfort Controls

Thermostats

Room thermostats – 16 A – 230 V AC

Designed to control the temperature in dry and enclosed spaces, such as flats, schools, workshops etc.

An internal temperature sensor, located under the central plate, monitors the room temperature.

Room thermostat

Screw terminals

white	SDD111506
beige	SDD112506
aluminium	SDD113506
anthracite	SDD114506

Characteristics

- Designed for electric heaters like radiators and ceiling heaters
- Built-in on/off switch and built-in sensor
- Night drop function can be activated with an external 230 V control coming from switch, clock switch, motion sensor, etc. to drop 4 °C and save energy
- Maximum load 3600 W (16 A, 230 V, cos φ = 1)
- Night drop function T -4 °C
- Operation temperature -10 °C... +30 °C
- Temperature control range +5 °C... +30 °C
- Control accuracy 1 °C
- Compliant with EN 60730-2-9 standard

Floor thermostats – 16 A – 230 V AC

Designed to control the temperature of electrical underfloor heating.

A temperature sensor fitted in the floor by means of a sensor cable monitors the floor temperature.

Floor thermostat

Screw terminals

white	SDD111507
beige	SDD112507

Wiser Gateway

www.se.com

Wiser Gateway

The Wiser Gateway is the Wiser system communication interface, enabling you to easily manage your home environment. It connects Wiser devices and enables communication between one or more devices and a smartphone via the Wiser.

	
<input type="checkbox"/> white	CCT501901
Features	
Power supply	AC adaptor (included) or 12 VDC/0.5 A power supply through 2-pin terminal block (not included)
Connector type	Micro USB port for the AC adaptor / 2-pin terminal block for cable 0.25 mm ² to 1.50 mm ²
Nominal power for AC adaptor	100-240 V AC, 50/60 Hz
Communication interface	Ethernet - IEEE802.3, 10/100 base-T (LAN) Wi-Fi® - 2.4 GHz, IEEE802.11 b/g/n compliant Zigbee - 2.4 GHz, IEEE802.15.4 compliant
System clock	RTC function with coin battery (CR1220)
Environment	
IP degree	IP20
Operating temperature	0 °C to 40 °C
Relative humidity	10 % to 90 %
Complementary	
Dimensions (H × W × D)	86 × 86 × 34 mm
Installation	The device can be installed directly on wall, in a standard wall box (Ø 73 mm, minimum depth 26 mm), or on table using the separately available Tablestand for Wiser Gateway CCT501400.
Content	Metal bracket, screws and wall plugs, AC adaptor, 2-pin plug, AC adaptor USB cable.
Certification	
Zigbee 3.0	
Functions	
<ul style="list-style-type: none">Monitors and controls Wiser Zigbee devices through the Wiser app, Ethernet or Wi-Fi®.Through the Wiser app, you can create Scenes or Automations to operate Wiser Zigbee devices.	

Tablestand for Wiser Hub/Gateway

The tablestand for Wiser Hub/Gateway is an optional stand for placing the gateway on a table or other flat surface.

	
<input type="checkbox"/> white	CCT501400_0001
Environment	
Operating temperature	-10 °C to 45 °C
Relative humidity	10 % to 95 %
Complementary	
Dimensions (H × W × D)	86 × 54.6 × 86 mm

Capacitive load		10 A, 140 µF	
Compact fluorescent lamps 230 V	ferromagnetic ballast		200 W
Motor (single-phase) 230 V		1000 VA	

Control options

- Home control:** To control the switch through the Wiser app on your smartphone, you need to pair it to the Wiser Gateway.
- Direct operation:** The switch can always be controlled directly on-site. You can also connect any number of auxiliary push buttons.

Characteristics

- Nominal voltage: 230 V AC, 50 Hz
- Nominal current: 10 A, $\cos \varphi = 0.6$
- Certification: Zigbee 3.0

Functions and settings

- Remote control by unlimited number of single mechanical push buttons.
- Via Wiser app:
 - Setting a timer: delay time (1 second - 24 hours), prewarning (with or without), manual switching (OFF or retrigger).
 - Setting a time schedule (weekday switching, astro function, count-down timer, presence simulation).

Wiser Comfort Controls

Connected Wireless Switch 1-gang/2-gang

The connected wireless switch with 1-gang/2-gang push button function can be placed anywhere (installed on the wall, mounted on wood, glass or plastic surface) and is used to control other Wiser devices within the same Zigbee network. It can be configured to function as 1-gang or 2-gang switch through Wiser app or can be paired with other Wiser devices.

Commercial Reference	SDD111389
Product colour	<input type="checkbox"/> White
Product or component type	Connected Wireless Switch
Features	
Operating voltage	3 V DC (1 lithium button cell battery CR2032)
Battery life	Up to 5 years (depending on the frequency of use and quality of battery)
Number of rockers	Two
Transmission range	Indoor in open space: 100 m Indoor with concrete walls: 25 m
Max transmitted power	≤ 10 dBm
Frequency band	2.4 GHz
Frequency range	2400 MHz to 2480 MHz
Environment	
IP degree	IP20
Operating temperature	-5 °C to 45 °C
Relative humidity	5 % to 95 %
Control options	
• Home control:	To control the connected wireless switch with 1-gang/2-gang push button function through the Wiser app on your smart phone, you need to pair it to the Wiser Gateway.
• Direct operation:	The connected wireless switch can always be controlled directly on-site.
Characteristics	
• Push button - 1 gang= 1 function or 2 moments / 2 gang = 2 functions or 4 moments.	
• Content:	1 battery, double-sided adhesive pads, adhesive foil, screws and user manual.
• Certification:	Zigbee 3.0
Complementary	
Installation	For wall box, wood or wall surfaces, use mounting screws. For glass or plastic surfaces, use adhesive pads or adhesive foil. Do not install the device on a metal surface, as it affects the wireless communication and performance of the device.

For more detailed information, refer to the on-line system user guide. Scan the QR code or follow the link:
https://www.productinfo.schneider-electric.com/wiser_eu/

Note:

Download the Wiser app to your smartphone / tablet, and install the Wiser Gateway to configure and control Wiser devices. You can use the app to pair, set up and control Wiser devices. The Wiser app is available in the App stores for smartphones supporting operating systems Android™ OS (version 7 and above) or Apple® iOS (version 11 and above).

Wiser Micro Module Light Switch

The micro module light switch combines the advantages of smart switch functionality with ordinary mechanical push-button switches.

It transforms a conventional switch into a connected device you can control from the switch or through the Wiser app. Up to 10 mechanical push-button switches can be connected to one Wiser micro module light switch to control a connected load. It can switch on ohmic, inductive, or capacitive loads.

Motor		1000 VA

Control options

- Home control:** To control the Wiser micro module switch through the Wiser app on your smartphone, you need to pair it to the Wiser Gateway.
- Direct operation:** The micro module switch can always be controlled directly on-site. You can also connect up to 10 auxiliary push buttons.

Characteristics

- Nominal voltage: 220-240 V AC, 50/60 Hz
- Nominal current: 10 A
- 1 switching channel with dry contact.
- Dimensions (H x W x D): 43 x 43 x 22 mm
- Installation: mounting in wall box with a minimum depth of 26 mm. If you place the Micro module behind a mechanical push button, use a deep installation box.
- Neutral conductor required.
- Certification: Zigbee 3.0

Functions and settings

- Remote control by a maximum of 10 single mechanical push buttons.
- Integrated push button for the functional test.

Via Wiser app:

- Setting a timer or a time schedule.

Wiser Micro Module Dimmer

The micro module dimmer combines the advantages of smart dimmer functionality with ordinary mechanical push-button switches.

It transforms a conventional switch into a connected device you can control from the switch or through the Wiser app. Up to 10 mechanical push-button switches can be connected to one Wiser micro module dimmer to control a dimmable load.

It can switch on and dim ohmic, inductive, or capacitive loads.

Wiser Micro Module Shades Control

The micro module shades control combines the advantages of smart shutter functionality with ordinary mechanical push-button switches.

It transforms a conventional switch into a connected device you can control from the switch or through the Wiser app. Up to 10 mechanical push-button switches can be connected to one Wiser micro module shades control to control a connected blind or roller shutter.

Blind and roller shutter motor must be equipped with an end position switch.

Relay contacts mechanically locked against each other prevent simultaneous triggering of the two relay outputs.

Maximum loads

Motor

500 VA

Control options

- **Home control:** To control the Wiser micro module shades control through the Wiser app on your smartphone, you need to pair it to the Wiser Gateway.
- **Direct operation:** The micro module shades control can always be controlled directly on-site. You can also connect up to 10 auxiliary push buttons.

Characteristics

- Nominal voltage: 220-240 V AC, 50/60 Hz
- Nominal current: 4 A, $\cos \varphi = 0.6 - 1.0$
- 1 blind channel, mechanically and electronically locked against each other.
- Dimensions (H x W x D): 43 x 43 x 22 mm
- Installation: mounting in wall box with a minimum depth of 26 mm. If you place the Micro module behind a mechanical push button, use a deep installation box.
- Neutral conductor required.
- Certification: Zigbee 3.0

Functions and settings

- Protection of the motor against damage with two mutually mechanically and electronically locked relay contacts.
- Remote control by a maximum of 10 double mechanical push buttons.

Via Wiser app:

- Setting the running time.
- Setting a timer or a time schedule.

Note:

Download the Wiser app to your smartphone / tablet, and install the Wiser Gateway to configure and control Wiser devices. You can use the app to pair, set up and control Wiser devices. The Wiser app is available in the App stores for smartphones supporting operating systems Android™ OS (version 7 and above) or Apple® iOS (version 11 and above).

Wiser Sensors

Wiser Window/Door Sensor

The window/door sensor detects opened and closed windows and doors, and reports the status to the Wiser Gateway. It consists of two separate parts: primary (sensing circuit) and secondary (magnet). The primary part includes the sensing circuit which detects the secondary part. When the sensor is connected to the Wiser Gateway and the window/door is opened or closed, the primary part (sensor) directly reports the change to the Wiser Gateway.

Wiser Water Leakage Sensor

The water leakage sensor detects the presence of water, and alerts via alarm and/or notification.

When the sensor is connected to the Wiser Gateway and detects water on the floor, it sends out a sound alarm and reports the event to the Wiser Gateway. The house owner can receive a notification pushed to the Wiser app.

The sensor should be placed where leaks are most likely to occur: the bottom level of your home or places like the basement, kitchen, bathroom, balcony, bedroom, living room, utility room, or anywhere you think leaks are possible.

The sensor has two sensing pads at the bottom of the body. The pads are in contact with the floor surface when the sensor is placed in its operating position. It activates when water is present between the pads.

<input type="checkbox"/> white	CCT592011
Features

Wiser Motion Sensor

The motion sensor detects movement and measures luminance in a room, and reports the status to the Wiser Gateway. It controls Wiser devices to configure the room for a desired effect.

The threshold of luminance settings and/or detection of movement can be programmed to determine what action to be taken at that moment, for example switch on a lamp controlled by a Wiser switch or dimmer.

Connected Single Socket Outlet 16 A

The connected single socket outlet is an electrical outlet designed to manage and control electrical devices in a convenient and efficient manner. Use in newly built or retrofit installation for controlling electrical devices through the push button on the device, app, or by voice command (Amazon Alexa, Google Home). Fully compatible with the Schneider Electric Wiser platform, the single socket outlet can be used for a variety of applications including remote ON/OFF, power monitoring, scheduling, automation, and much more. The single socket outlet fits in regular depth wall boxes (40 mm) and does not require any special installation compared to regular socket outlets making it convenient to fit in any kind of new or existing installation.

Wiser IP Camera

Wiser IP Camera Indoor

With the IP camera indoor you can monitor sensitive areas of your home and it can be controlled by the Wiser devices with the help of the Wiser Gateway. It can be installed on the wall, ceiling or on a table. The IP camera is connected and managed via the Wiser app. The app receives notifications on the smartphone when something is detected and thus gives full control of what is happening without having to look in the app all the time. The camera has night vision which makes it possible to see up to 7 m in total darkness with its infrared lens.

Wiser Smoke Alarm

Wiser Smoke Alarm - Battery

The smoke alarm uses a photoelectric sensor to detect the smoke generated by fire. When connected to the Wiser system, the device sends the notifications via the Wiser app. It can also trigger signals through other products (for example, flashlights) connected to the Wiser system. The smoke alarm can be temporarily deactivated to avoid false alarm when cooking etc. An additional temperature sensor still provides basic protection.

<input type="checkbox"/> White	CCT599001
Features	
Operating current	≤70 mA
Battery life	10 years (not replaceable)
Sensing type	Photoelectric. This alarm contains NO radioactive material.
Interconnecting	RF+Zigbee, max. 40 devices in one network
Operating frequency	Zigbee: 2405 - 2480 MHz RF: 868 MHz
Wireless range	Zigbee: 40 m line of sight RF: 50 m line of sight
Horn level	85 dB at 3 m

* Deeper wall box is required for installing the Micro module dimmer

Technical Information

Replacing 2-way Installation with Wiser Connections

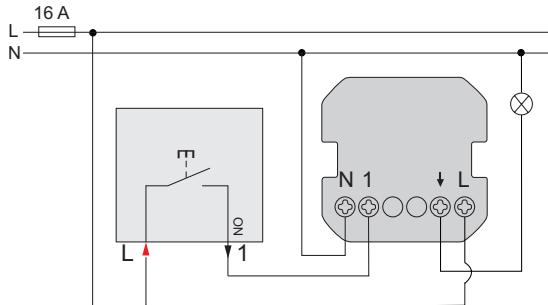

2-way installation

2-way switch + 2-way switch

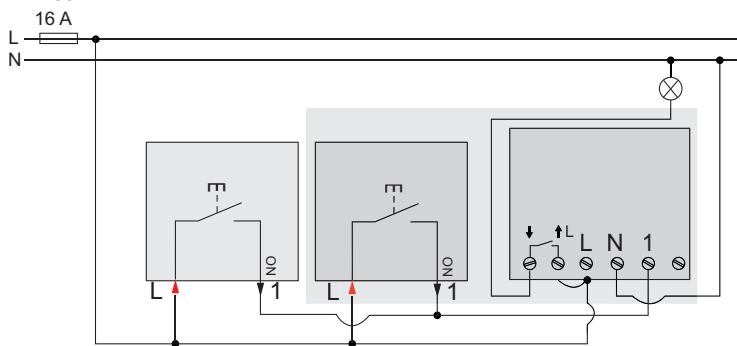

Connection examples

Normally Open (NO) push button + Wiser relay switches 10 A SDDxxx388

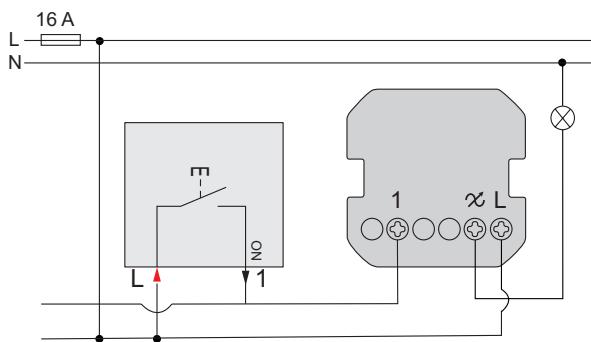

2 x Normally Open (NO) push button + Wiser Micro module light switch CCT5011*

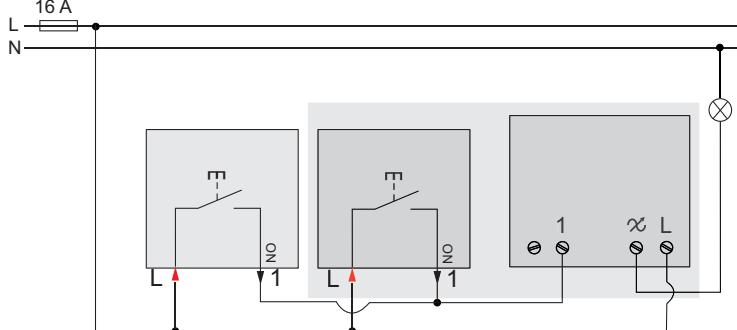

* Deeper wall box is required for installing the Micro module light switch

Normally Open (NO) push button + Wiser universal push-button dimmers LED SDDxxx381

Wiser universal rotary dimmers LED SDDxxx382

2 x Normally Open (NO) push button + Wiser Micro module dimmer CCT5010*

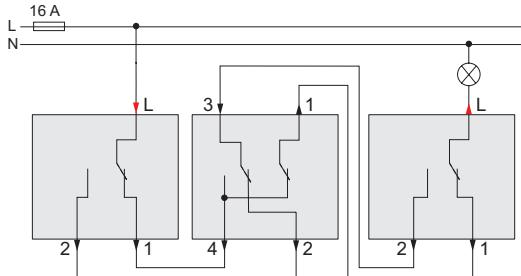

* Deeper wall box is required for installing the Micro module dimmer

Technical Information

Replacing Intermediate Installation with Wiser Connections

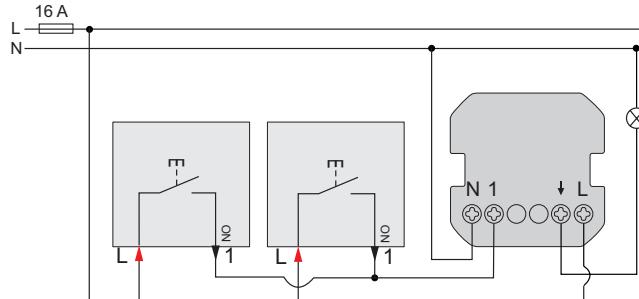

Intermediate installation

2-way switch + Intermediate switch + 2-way switch

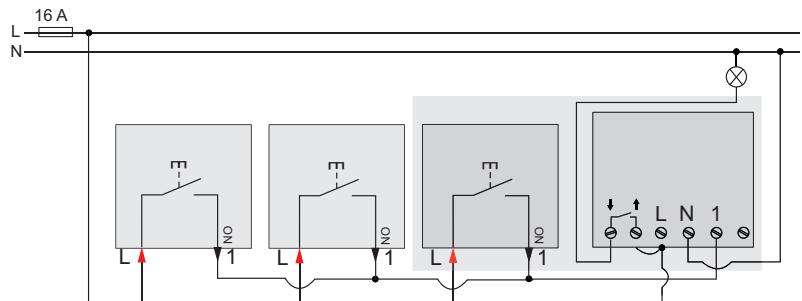

Connection examples

2 x Normally Open (NO) push button + Wiser relay switches 10 A
SDDxxx388

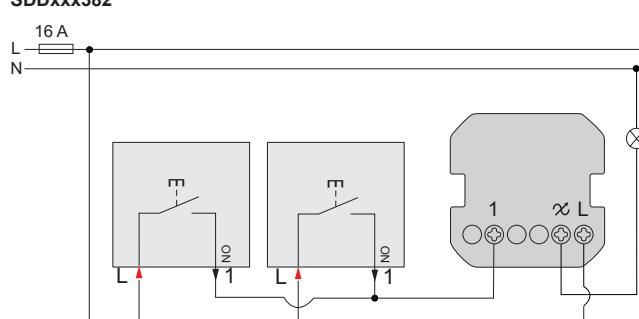

3 x Normally Open (NO) push button + Wiser Micro module light switch
CCT5011 *

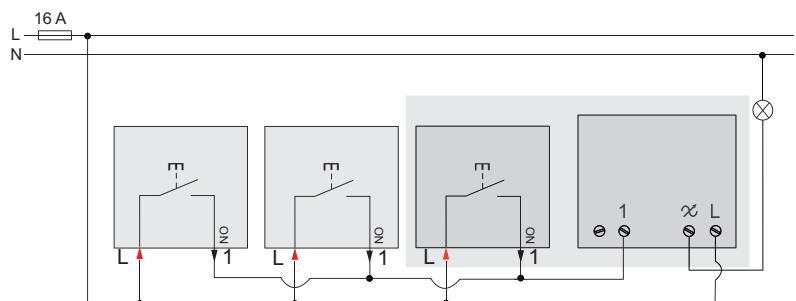

* Deeper wall box is required for installing the Micro module light switch.

2x Normally Open (NO) push button + Wiser universal push-button dimmers LED
SDDxxx381
Wiser universal rotary dimmers LED
SDDxxx382

2 x Normally Open (NO) push button + Wiser Micro module dimmer
CCT5010*

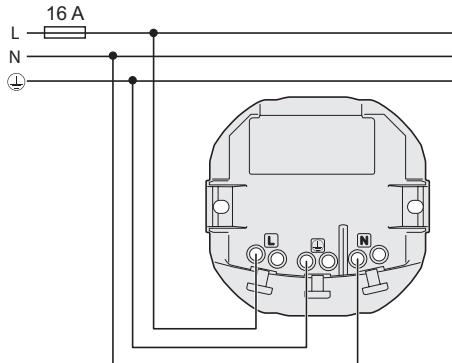

* Deeper wall box is required for installing the Micro module dimmer

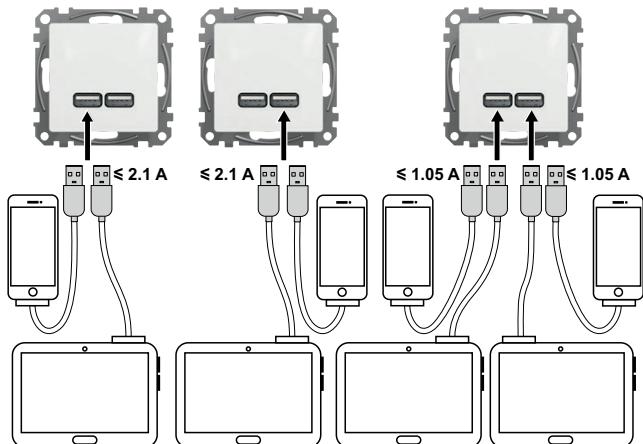

Technical Information

Socket Outlets

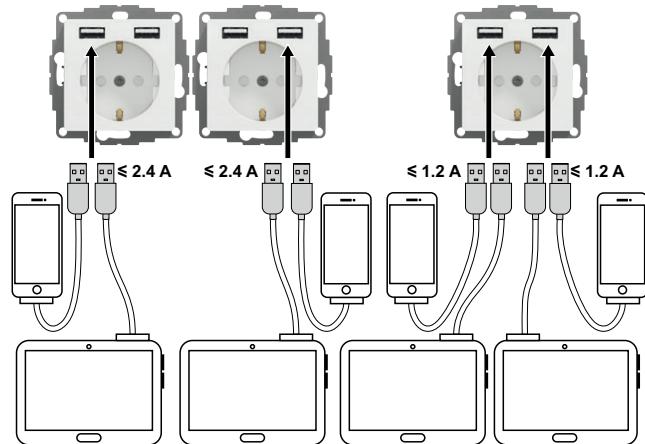

Connected single socket outlet 16 A

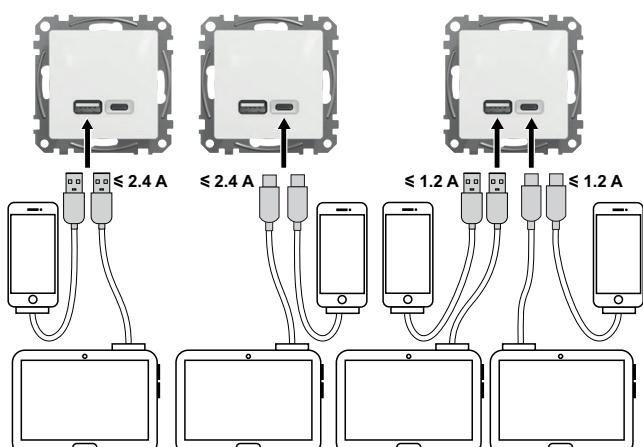

Socket outlets with USB chargers - USB chargers

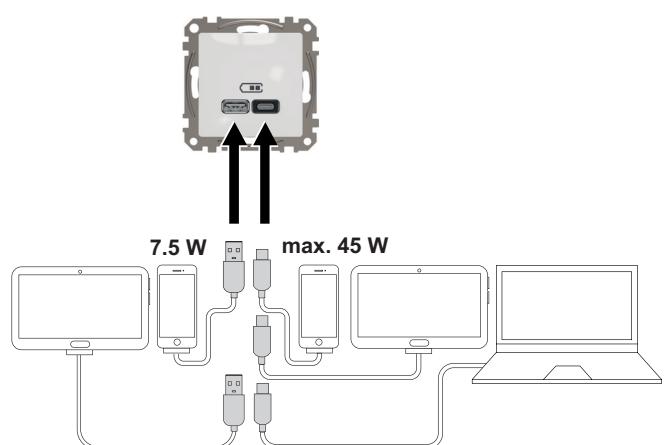

Double USB chargers type A+A - SDDxxx401

Socket outlets with double USB chargers type A+A - SDDxxx052

Double USB chargers type A+C - SDDxxx402

USB chargers type A+C - SDDxxx404

Connections

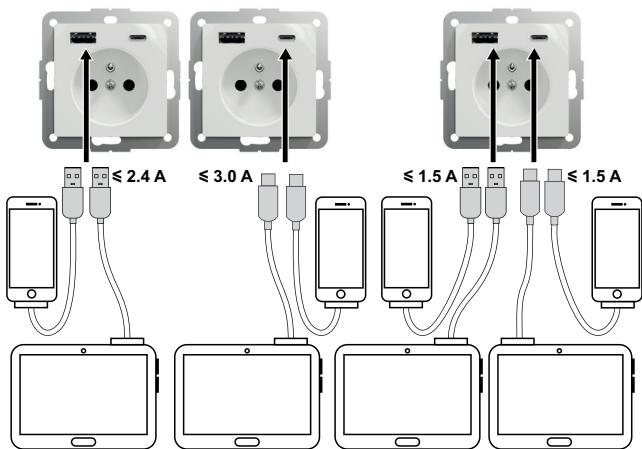

- USB Output voltage: 5 V DC
- Nominal output current for USB chargers:
 - SDDxxx052 socket outlets with double USB chargers type A+A - 1 x 2.4 A or 2 x 1.2 A (for 2 outputs USB-A+A)
 - SDDxxx401 double USB chargers type A+A - 1 x 2.1 A or 2 x 1.05 A (for 2 outputs USB-A+A)
 - SDDxxx402 double USB chargers type A+C - 1 x 2.4 A or 2 x 1.2 A (for 2 outputs USB-A+C)

Connections

- Nominal input voltage: 220-240 V~, 50/60 Hz, 1.0 A
- USB output (type C): 5.0 V = 3.0 A 15.0 W
9.0 V = 3.0 A 27.0 W
12.0 V = 3.0 A 36.0 W
15.0 V = 3.0 A 45.0 W
20.0 V = 2.25 A 45.0 W
- USB output (type A): 5.0 V = 1.5 A 7.5 W
- Charger protocol: PD 3.0 with pps and further modes
- Maximum output power: Max. 52.5 W (A+C)

Technical Information

Socket Outlets

Socket outlets 2P+E pin earth with USB A+C charger - SDDxxx072

Connections

- Nominal input voltage: 220-250 V~, 50 Hz, 0.5 A
- USB Output voltage range: 4.75 V - 5.25 V DC
- USB Output current range: 0.01 A - 3.0 A
- USB-A output power: 12.0 W
- USB-C output power: 15.0 W

Technical Information

RJ45 Data Outlets

Area of application

- There are different types of cable for data networks (coaxial, optical fiber, etc.), but the cable most commonly used is the twisted pair cable consisting of 2 insulated and interlaced copper wires. There are several types of twisted pair cables:
 - the U/UTP cable (Unshielded Twisted Pair) is a 4-pair twisted cable that is not shielded. It is intended for small and medium installations without electromagnetic pollution
 - the F/UTP cable (Foiled Twisted Pair) is a 4-pair twisted cable with general shielding for external protection, common to all 4 pairs, protecting them against reduced electromagnetic pollution. It is suitable for installations requiring minimum electromagnetic protection
 - the S/FTP cable (Shielded Twisted Pair) is also another 4-pair shielded twisted cable with protective shielding of each pair against high electromagnetic pollution. This minimizes emissions. It is suitable for installations requiring a high level of electromagnetic protection.
- The RJ45 socket is an 8-pin connector standardized by ISO8877 for connection of devices to VDI networks.
- One of the standards most commonly used for production of structured cabling is that of the North American Association of electronic and telecommunications manufacturers (EIA/TIA 568B) that has defined a color code with 2 alternatives, to describe connection of the RJ45 connector.

Technical data

Categories

- The most important property defining a data network is the speed at which information can circulate inside this network. According to this aspect, installations are classed into the following categories:

Category	Transmission rate	Network type
Cat. 3	Up to 10 MHz	Ethernet 10 Base T, Token Ring 4 Mbps
Cat. 4	Up to 16 MHz	Token Ring 16 Mbps
Cat. 5e	Up to 100 MHz	Ethernet 1000 Base T, ATM 155 Mbps
Cat. 6	Up to 250 MHz	Ethernet 1000 Base T, ATM 1200
Cat. 6A	Up to 500 MHz	Ethernet full-duplex mode 1000 Base T

- So that an installation can be included in a certain category, all the elements making it up must belong to the same category, or, otherwise, it will be classed in the category of the lower category element.

Sedna offer

- The Sedna offer satisfies the technical requirements of prevailing regulations and stand out by the following characteristics:
 - ease of mounting: each connector is equipped with a code of colors and numbers to guide connection without needing special tools
 - high connector quality with category 6 and 6 sockets thus allowing us to propose the quickest connector on the market
 - minimum conductor untwisting for connection, thus preventing electromagnetic interference
 - connection reliability
 - compact size (particularly for the shielded version).

Green Premium™

An industry leading portfolio of offers delivering sustainable value

More than 75% of our product sales offer superior transparency on the material content, regulatory information and environmental impact of our products:

- RoHS compliance
- REACH substance information
- Industry leading # of PEP's*
- Circularity instructions

The Green Premium program stands for our commitment to deliver customer valued sustainable performance. It has been upgraded with recognized environmental claims and extended to cover all offers including Products, Services and Solutions.

CO₂ and P&L impact through... Resource Performance

Green Premium brings improved resource efficiency throughout an asset's lifecycle. This includes efficient use of energy and natural resources, along with the minimization of CO₂ emissions.

Cost of ownership optimization through... Circular Performance

We're helping our customers optimize the total cost of ownership of their assets. To do this, we provide IoT-enabled solutions, as well as upgrade, repair, retrofit, and remanufacture services.

Peace of mind through... Well-being Performance

Green Premium products are RoHS and REACH compliant. We're going beyond regulatory compliance with step-by-step substitution of certain materials and substances from our products.

Improved sales through... Differentiation

Green Premium delivers strong value propositions through third-party labels and services. By collaborating with third-party organizations we can support our customers in meeting their sustainability goals such as green building certifications.
